Dynavox Group wins the 2026 Allbright Prize for diversity and inclusion

Dynavox Group AB (publ), the parent company for Tobii Dynavox, the global leader in assistive communication, has been awarded the 2026 Allbright Prize. The prize was presented today at a ceremony at the company's office in Stockholm. The evaluation is based in part on a survey in which employees shared how they experience the company's work on diversity and inclusion.

The Allbright Prize is awarded to a listed Swedish company that works for, and shows results in, gender equality, diversity and inclusion. The winner is selected through surveys of both the CEO and employees, which are then reviewed by an expert jury. Behind the prize is Allbright, a non-partisan and non-profit foundation in Sweden working to advance gender equality and diversity in business.

In its motivation, the jury highlights how diversity and inclusion are integrated into how Dynavox Group conducts its business, both in management's priorities and in employees' everyday work. The company is particularly recognized for the broad diversity of its workforce, with employees from a wide range of ethnic and religious backgrounds. In the employee survey that formed part of the evaluation, nine out of ten said that the company hires people from different ethnic backgrounds at all levels of the organization.

Behind these results is systematic work to create fairer opportunities. Dynavox Group has established diversity and inclusion committees at both global and local level, conducts recurring mandatory training on topics including discrimination and unconscious bias, and bases recruitment and promotion on competency-based processes.

Earlier this year, Tobii Dynavox, a subsidiary of Dynavox Group, was named to the Forbes Accessibility 200 for the second consecutive year, a list of innovators and impact-makers improving the lives of people with disabilities. Together, the two recognitions show that Dynavox Group is committed to inclusion, both in what the company offers its users and in how the business is run.

"This award belongs to all our employees. We are a global company whose business is about giving people with disabilities a voice, and that makes diversity, with a breadth of experiences and perspectives, perhaps our single strongest competitive advantage. It is a strategic issue for us, from the boardroom to every individual employee. That it also makes us a better workplace and a role model in society is something we are very proud of," said Fredrik Ruben, CEO of Dynavox Group.

"Diversity is a matter of values for us, and it is critical to how we help and support our customers. That is what drives our work, and results are what matter most. It is gratifying to see this recognized by Allbright," said Gitte Pugholm Aabo, Chair of the Board of Dynavox Group.

"This year's winner is a role model for how ambitions can be turned into concrete processes, shared responsibility and a workplace where people are empowered to contribute and grow," said the jury in its statement.

About Dynavox Group

Dynavox Group AB (publ) is the parent company for Tobii Dynavox, the global leader in assistive communication. Headquartered in Stockholm, and listed on Nasdaq Stockholm (DYVOX), Dynavox Group, together with its brands has over 1,000 employees and serves customers in 65+ countries. Tobii Dynavox's custom designed solutions enable people with disabilities such as cerebral palsy, ALS, autism and spinal cord injury to communicate with a voice of their own, develop literacy skills and live more independently. To date, hundreds of thousands of people worldwide have benefited from our integrated solutions, which include hardware, software, clinically developed language systems, mounting solutions, training, and dedicated support. We offer extensive funding expertise to facilitate funding for as many people as possible. As voice and motor impairments are common among our users, our solutions are accessed via alternative methods, such as eye gaze or touch screen. Using AI-based speech synthesis, we offer users a personalized voice identity in over 30 languages, for children and adults.
