Svea Mining AB Shares Now Quoted on Gettex Exchange Expanding Access for German and European Investors

Svea Mining AB Shares Now Quoted on Gettex Exchange Expanding Access for German and European Investors

Stockholm, Sweden — November 27, 2026 — Svea Mining AB (Spotlight: SVEA) (Xetra: 5WV) (WKN: A42NH6), a Swedish mineral exploration company, today announced that its shares are now quoted on the Gettex Exchange in Munich, operated by Bayerische Börse AG. The additional quotations make Svea Mining shares readily accessible to investors across Germany and the wider European market.

A quotation on Gettex places Svea Mining alongside thousands of domestic and international securities on a highly transparent, fully electronic market that is widely followed by European investors and data providers. Gettex connects to a wide network of online brokerage platforms used by retail investors across Germany and Europe, including brokers such as Scalable Capital, Comdirect and finanzen.net, among many others. Through this network, investors can buy and sell Svea Mining shares with ease.

"Being quoted on Gettex is an important step in broadening our shareholder base and giving German and European investors straightforward access to Svea Mining," said Ken Osborne, Chief Executive Officer of Svea Mining AB. "Sweden has been a mining region for well over a century, and we are pleased to make it easier for a wider community of investors to follow and participate in our exploration story."

The Company's primary listing remains on the Spotlight Stock Market in Sweden. The Gettex quotation represents an additional trading venue for the same shares (ISIN SE0030252599) and does not involve the issue of any new shares.

About Svea Mining AB

Svea Mining AB is a Swedish mineral exploration company exploring for gold, copper and silver across approximately 7,500 hectares in the Skellefteå volcanogenic massive sulphide (VMS) district of northern Sweden, one of Europe's most productive regions for gold, copper and silver for more than a century. The Company holds two exploration permits: the Kalvträsk project (approximately 7,000 hectares) and the Stöverfors project (451.93 hectares), both within or on the margin of a geological system that has produced almost 30 mines and still hosts active mining today. The Company's registered office is in Sweden.
