

## Mycronic's customers continue to replace older mask writers

Täby, 13 July, 2017 - Mycronic AB (publ), has received the ninth order from yet another customer in Asia for a mask writer replacing an older system for manufacturing of display photomasks. The system is scheduled to be delivered during the second half of 2018.

The price level for a replacement mask writer built on the Prexision platform is normally in the range of USD 12–16 million depending on the configuration and type of system traded in.

Mycronic occupies a unique position as the sole supplier in the world of equipment for manufacturing of advanced photomasks. Many systems are today 10 or more years old. Maintaining these systems is increasingly a challenge. Some of Mycronic's customers also need to modernize their production equipment. Mycronic offers a scalable system in exchange for an older system.

"More and more of our customers want to secure a long term service solution, which at the same time allow them to increase productivity. That is why our customers continue the exchange of older systems," says Magnus Råberg, Sr VP & General Manager Pattern Generators at Mycronic AB.
