

PRESS RELEASE

QuickPouch and Ginolis Announce Strategic Partnership

Ronkonkoma NY - Packaging Automation firm **QuickPouch**, a division of Adaptive Manufacturing Technologies, has announced a new strategic partnership with **Ginolis**, a global provider of innovative production automation solutions.

This partnership allows IVD manufacturers around the globe the opportunity to enjoy easy integration of their test kit assembly and packaging processes. The revolutionary **Ginolis Lateral Flow Device Assembly (LFDA-3)** system provides manufacturers flexible production capacity within a desktop footprint and utilizes automated visual inspection and guidance ensuring the highest standard of quality control. The **QuickPouch Vertical** is a fully validatable automated form/fill/seal machine that forms pouches from rollstock. A wide variety of available options include in-line printing or label application for variable data, print and pouch visual inspection with automatic reject, and QuickChange dies which allow for 5 minute pouch size changeovers.

QuickPouch and Ginolis will be demonstrating the integrated LFDA-3 and QuickPouch Vertical for the first time at the **AACC Clinical Lab Expo** in San Diego, CA, August 1-3 in Ginolis booth 4446, and again at **PackExpo** in Las Vegas, NV, September 25-27 in QuickPouch booth N-518.
