## **Courion Named Finalist in SC Magazine Europe Awards for Best Identity Management Solution**

### ***Market Leading Identity Analytics and Intelligence Solution, Access Insight, Recognized***

**WESTBOROUGH, Mass., March 31, 2015** — [Courion](#)<sup>®</sup>, the market leading provider of intelligent identity and access management (IAM) solutions, today announced that [Access Insight](#)<sup>®</sup>, the industry leading and award-winning Identity Analytics and Intelligence (IAI) solution, is nominated for a prestigious European security technology award.

Access Insight is a finalist in the 2015 SC Magazine Europe Best Identity Management Solution category. The 2015 SC Magazine Europe awards honour professionals working to secure organizations of all sizes and the vendors that deliver innovative security technologies. The winners will be announced in London on 2<sup>nd</sup> June 2015.

Access Insight applies custom risk analytics to massive amounts of identity and access data to dramatically improve how IT staff create, manage and terminate access rights for resources and how they identify and eliminate access risk. Access Insight provides a comprehensive, real-time view of the multi-dimensional relationships between identities, access rights, policies, resources and activities across the entire network.

Chris Sullivan, vice president of EMEA Operations, said: “We’re delighted to be shortlisted for this important award. Industry analysts are increasingly recommending the use of identity analytics not only to improve the efficiency of day to day identity and governance operations, but also as a crucial tool in cyber security detection and deterrence strategy. Access Insight uncovers hidden access risks to be remediated that might otherwise lead to a data breach.”

In January 2015, Courion was placed in the leaders quadrant in the [Gartner Magic Quadrant for Identity Governance and Administration \(IGA\)](#). This is the tenth time Courion was placed in the leaders quadrant in a Gartner Magic Quadrant since 2007. Courion was also recognized as a leader in the recent [KuppingerCole Leadership Compasses for Access Governance and Identity Provisioning](#).
