Phase Holographic Imaging PHI AB (publ)

Lund, March 22, 2018

Phase Holographic Imaging launches new website

Today Phase Holographic Imaging (PHI) launches a new website. The new website has been created to comprehensively provide extensive product information, as well as an introduction to the range of cell biology applications supported by the HoloMonitor® system.

The new site provides improved navigation and has been designed using modern technology ensuring compliance with various browsers and mobile devices. Customers and other interested parties will easily find the benefits of HoloMonitor and its applications, as well as marketing- and product material, images and videos produced with HoloMonitor. Moreover, the website has a comprehensive investor section with up to date company news, events, and CEO commentaries together with financial reports.

PHI's new website will continuously be extended with focus on product and company news, new scientific publications, and educational material.

The new website is located at the same address as previously: www.phiab.se

ABOUT PHI

Phase Holographic Imaging (PHI) leads the ground-breaking development of time-lapse cytometry instrumentation and software. With the first instrument introduced in 2011, the company today offers a range of products for long-term quantitative analysis of living cell dynamics that circumvent the drawbacks of traditional methods requiring toxic stains. Head-quartered in Lund, Sweden, PHI trades through a network of international distributors. Committed to promoting the science and practice of time-lapse cytometry, PHI is actively expanding its customer base and scientific collaborations in cancer research, inflammatory and autoimmune diseases, stem cell biology, gene therapy, regenerative medicine and toxicological studies.
