Nordnet reaches one million accounts

In November, 2,310,817 trades were made in stocks, warrants and options among Nordnet's customers in Sweden, Norway, Denmark and Finland. That corresponds to 107,480 trades on average per day.

- Three out of four Nordic exchanges had a negative development in November, with Copenhagen as an exception. The activity was high at the beginning of the month, but decreased towards the end, and in total our customers made over 2.3 million trades, said Johan Tidestad, Head of Communications at Nordnet.
- During the month, Nordnet has passed a million active accounts, which is something of a milestone. Almost half of the number of accounts is in Sweden, and our second largest market measured in this way is Finland with just over 25 percent, says Johan Tidestad, Head of Communications at Nordnet.

Table: Nordnet's total trades on all exchanges and market places for all customers, and average number of trades per day. Average number of trades per day is calculated as total trades divided by the number of days the Swedish exchanges are open.
