

Stockholm, 4 April, 2016

HDR Partners Corporate Finance has advised Hermes Medical Solutions in the divestment to Segulah.

Hermes Medical Solutions provides systems and software for integrating, visualizing, processing and archiving multi-format imaging data from scanning devices within molecular imaging and radiology. The systems are primarily used by physicians enabling faster and more accurate diagnosis and treatment of patients, thereby increasing efficiency for hospitals. Hermes is vendor-neutral and can integrate data from any scanning device (e.g. PET, CT, MRI and SPECT) irrespective of manufacturer or model, as well as third party planning and reporting systems.

Segulah is a private equity firm based in Stockholm that invests in Nordic mid-market companies.
