“I have always seen films as the most efficient and technically most advanced way of telling a story, but gaming is fascinating as it is interactive and if you can only find a way of lifting the drama, increasing the tension and the total emotional link to the same level as films, then we have the future of storytelling,” says Frank Coraci.

About The Descendant:

The Descendant is a five-part episodic adventure game series where the end of the world is only the start.

After climate change wrecked the planet, a man-made extinction event wiped humankind off the face of the Earth. Only a few thousand ‘descendants of humanity’ were hand-picked to survive the apocalypse, cryogenically suspended in underground bunkers known as Arks. Centuries passed. The world recovered from the nuclear holocaust, and all the Arks reopened, except one — Ark-01.
