

Four Years Strong: Audubon Companies Earns Prestigious Award for 'Fastest' Company Growth

Audubon Companies proudly announces that its affiliates, Audubon Engineering Solutions and Audubon Field Solutions, have once again landed on the Inc. 5000 "Fastest Growing Private Companies" list for 2015, placing #3040. The honor marks Audubon Companies' fourth consecutive year of recognition.

For over 30 years, Inc. Magazine has acknowledged the successes of privately-held, for-profit, independent companies across the nation. To be considered, companies must apply and meet the qualifying criteria as outlined by the magazine.

This year's award is especially notable for Audubon Companies, given the economic downturn felt by the oil and gas industry amid reduced oil prices. Receiving the distinction of Inc. 5000 "Fastest Growing Private Companies" not only speaks to the ingenuity of Audubon Companies but to its tenacity.

"We are proud to be recognized by Inc. for the fourth consecutive year" says Lee Beckett, CEO of Audubon Companies. "The economic downturn was felt industry wide. Our ranking is a true reflection of the company's ability to deliver innovative and flexible solutions specific to our clients' needs."
