

Grand Hôtel chooses BizView

The Swedish high profile hotel Grand Hôtel has chosen BizView as their budgeting and forecasting tool for their operational planning, budgets and forecasts.

This solution was sold and implemented by our partner Climber. Jonas Grundström, BI Manager at Climber, says: "Over the last few years Grand Hotel has considerably improved their budget and forecasting process by focusing on relevant drivers important to their business. Although, they have had challenges with time consuming processes for input, budget consolidation and analysis. Therefore, we really appreciate the opportunity to help taking their internal processes to an even higher level by implementing BizView together with Qlik Sense."

Jens Karlsson, VP Global Partner Program at Bizview says "Grand Hôtel is a most welcome customer to us that brings great value to our portfolio of high profile brand references. We've had previous success in the travel and leisure industry, and Grand Hôtel certainly adds to that. We are confident that BizView will help Grand Hôtel in running their operations, and achieving great control over their financials to further improve their offering."
