

TactivoTM order from South American insurance company

Precise Biometrics has received an order of 2000 Tactivo from a South American insurance company to a value of 1.12 million SEK. The order consists of two delivery's that will impact fourth quarter revenues 2014 with 720.000 SEK and first quarter revenues 2015 with 400.000 SEK.

The insurance company has chosen to implement Tactivo in its existing mobility solution, enabling identity verification on mobile devices through fingerprint recognition. The improved mobility solution makes business processes more efficient and reduces time spent on administration. The order includes Tactivo mini for iOS and Android, and smaller quantities of Tactivo for iPad.

“Tactivo supports a wide range of use cases for secure mobile access. This deal is an excellent example of an innovative implementation of Tactivo to verify people’s identity using the functionality for fingerprint recognition. The solution makes daily work more convenient, while saving time and money for the customer, says Håkan Persson, CEO of Precise Biometrics.

The order is a result of Precise Biometrics’ focus on providing Tactivo to the enterprise market.

Tactivo is a product line of mobile smart card readers for iOS and Android devices that provides convenient and secure access to restricted resources from mobile devices. Tactivo brings true mobility to organizations using smart cards and can be used with a wide range of applications that enable many different use cases, such as secure browsing, e-mail, document signing and more. Fingerprint recognition is available for a selection of the readers.
