

Update on the Actiste CE certification process.

During the past year, Brighter has been working on finalizing and CE certifying the company's diabetes solution [Actiste](#). Due to adjustments of the production tools for the final audit, the final step of the certification, the certification process will take longer than expected.

– This is connected to minor fine-tunings in the production, which naturally causes a delay in the process, says Truls Sjöstedt, Brighter's CEO and founder.

Actiste is Brighter's unique service that facilitates everyday life for diabetics, stimulates behavioral change, and enables better care by means of data.

About Brighter

Brighter is a Swedish-based company that, from a unique IP portfolio, creates smart solutions for one of the most serious healthcare problems: changing patient behavior. Chronic diseases such as diabetes are rapidly increasing and account for an increasing share of healthcare costs globally. Brighter's Business Model and Multi-Sided Market Platform - The Benefit Loop™ - is based on the fact that many special interests create value for each other. By increasing access to valid health data, Brighter creates value for all stakeholders in the care chain: patients and close associates, healthcare providers, research, pharmaceutical industry and society. www.brighter.se

About Actiste

Brighter's solution Actiste® handles most of the self-monitoring and treatment of insulin-treated diabetes in a single easy-to-use device. Measurement of glucose levels, insulin injection, and automatic logging and timing of all activity are done in a single unit. Actiste is connected via an autonomous and secure mobile connection, the information can be automatically shared with selected recipients through The Benefit Loop®, Brighter's open cloud-based service where data is collected, processed and analyzed.

Validated user-generated data, such as test results, can be automatically transferred electronically to many different constituents. The patient selects when and how data is shared and who will have access to it. Through The Benefit Loop, different services can motivate patients with chronic illnesses to change their behavior, which can save lives, reduce relatives' concerns, and release enormous healthcare resources. www.actiste.com

The Company's shares are listed on [NASDAQOMX First North/BRIG](#).
