Directors' report

THE GROUP

Operations

The Group, which is one of the leading commercial companies in the Nordic region, offers professional users a wide range of goods and associated services in the areas of heating and plumbing, electrical, tools and machinery, refrigeration and DIY. The Group has business operations in Sweden, Norway, Finland, Denmark, Estonia, Russia and Poland. Group operations are conducted primarily under the Ahlsell trademark.

The company operates locally and the organisational model of the Ahlsell Group is designed to support this. The organisational structure focuses on the local marketplace where it has a large number of sales offices and stores. The Group has a strong foundation with clearly defined areas of responsibility and multiple local entities in each country. This structure allows Ahlsell to maintain a high level of flexibility and proximity to its customers. Coordination of purchasing, logistics, administration and IT results in economies of scale in its operations.

Sales and earnings

As we entered 2010, the economy was still in the grip of the global financial crisis and the recession that prevailed throughout 2009. The harsh winter and abundant snow in the Nordic countries contributed to the decline in activity in the construction sector. It was not until the second quarter of 2010 that an upswing was observed with a noticeable increase in construction activities. This resulted in positive growth for the Ahlsell Group.

Consolidated sales for the Ahlsell Group amounted to SEK 19,256 million (18,985). EBITA totalled SEK 1,250 million (1,087). The operating profit was SEK 871 million (740), which corresponds to an operating margin of 4.5% (3.9%). The Group's improved operating

margin in 2010 is largely attributable to developments after the first quarter and the market-related increase in volumes. Margin developments have also had a positive impact on consolidated results.

The Group's net financial items to-talled SEK -216 million (-780), equivalent to an average interest cost of 8% (8%). The decline in net financial items is primarily attributable to effects of exchange rate movements and the lower interest rates during the year. Loss for the year totalled SEK 492 million (-59) and comprehensive income for the year totalled SEK 309 million (41).

Operations in Sweden delivered net sales of SEK 10,838 million (10,022) with EBITA of SEK 1,101 million (884). The operating profit was SEK 875 million (661). Since the second quarter, Swedish operations have experienced strong, stable growth and have extended facilities at the central warehouse in Hallsberg to facilitate the handling of future increases in volumes. Other investments have been made in the priority growth areas throughout the year and the operations have focused more intensely on the function of the store so that customers needs can be better served in the future.

Net sales from operations in Norway totalled SEK 5,033 million (5,498) with EBITA of SEK 18 million (167). The operating profit was SEK 74 million (112). The decrease in volume is largely attributable to a decline in activity in the oil and gas industry. However, even the general recovery in the construction sector has been weaker than in the other Nordic countries. The construction of a new central warehouse was completed during the year. The new central warehouse will replace six regional warehouses that will gradually be phased out during 2011. The Norwegian operations have also implemented a number of organisational changes during the year, aimed at creating better

structure within the company. Now that these changes and the new logistics system are in place, the company is entering a new developmental phase and the former President of the company has stepped down to be replaced for the foreseeable future by CEO Göran Näsholm. Restructuring costs of SEK 27 million (79) have been charged to EBITA and the operating profit for 2010. Goodwill impairment of SEK 38 million, attributable to Oil & Gas, has also been charged to operating profit. See Note 13. In 2009, pension agreements in Norway were renegotiated, from defined benefit to defined contribution schemes. This had a favourable impact of SEK 117 million on results in 2009.

Net sales from operations in Finland, which also includes the operations in Russia and Estonia, totalled SEK 3,070 million (3,059) with EBITA of SEK 157 million (94). The operating profit was SEK 105 million (35). The Finnish market was hit the hardest by the economic downturn which also forced down prices in the market. However, volumes and margins both recovered in 2010 and, along with cost reductions implemented within the company, this has led to improved financial performance for the Finnish operations. Finland has also been preparing for future increases in volumes with the extension of its central warehouse in Hyvinge.

The business area Denmark, including operations in Poland, reported sales of SEK 467 million (591) with EBITA of SEK 37 million (0) for the financial year. The operating profit was SEK 28 million (-11). Restructuring costs of SEK 21 million were charged to EBITA and the operating profit for 2009. These costs are attributable to the closure of the Heating & Plumbing and Electrical product areas.

Market trends in 2010

As we entered 2010, the economy was still in the relatively deep recession that had prevailed throughout 2009 and we were experiencing an unusually harsh winter. The snow and cold in the Nordic countries meant that construction sector activities were lower than normal. The Group reported negative growth of 7% in the first quarter of 2010, which affected Ahlsell's operations in all markets. There was a clear upswing in market activity in the construction sector during the second quarter of the year, which helped to boost growth for the Group. These positive developments continued throughout the second half of the year and the Group achieved organic growth of 3.2% for the year as a whole. The indications for 2011 are encouraging and show continued strong growth across the Nordic countries.

Investments

In 2010, gross fixed investment in property, plant and equipment totalled SEK 163 million (83). Of this total, SEK 47 million (35) was accounted for by financial leasing. The investment during the year was mainly in logistics and IT-related activities. In 2010, depreciation of property, plant and equipment was SEK 102 million (114). Gross investment for the year was mainly attributable to the construction of a new central warehouse in Norway.

Financing

The Ahlsell Group's financing is primarily through four credit facilities managed by Nordea Bank AB (publ): a Senior Facility of SEK 7,209 million and a Mezzanine Credit Facility of SEK 2,044 million. Ahlsell also has an Acquisition Credit Facility with an outstanding amount of SEK 1,013 million on the balance sheet date and a revolving facility of SEK 500 million.

The Group companies have pledged

considerable collateral to guarantee repayment of amounts borrowed under the facilities.

Significant events in 2010

Acquisition of Solar Oy In the fourth quarter of 2009, Ahlsell signed a Letter of Intent with the Danish listed Group of companies, Solar A/S, for the acquisition of Solar's Finnish operations. The operations, which have sales of just under SEK 200 million, operate in seven locations and employ about 50 workers. This acquisition strengthens Ahlsell's presence and competitive advantage by adding further volumes to its already existing operations in the electrical area in Finland. The deal was concluded with the take-over of the operations on 18 January 2010.

Acquisition of Wallgren & Eriksson Bygg & Industri AB (Wallers AB)

During the second quarter, Ahlsell acquired Eskilstuna-based Wallers AB.

Wallers' core activities are in the Tools & Machinery product area, mainly serving the construction sector in and around Eskilstuna. The company has sales in excess of SEK 20 million and employs 6 workers. Take-over of the operations took place on 10 May 2010.

Central warehouse in Norway
The construction of a central warehouse in Norway, Gardemoen outside of Oslo, was completed in the last quarter of 2010. The warehouse will gradually come into operation as the regional warehouses are phased out. The implementation of the new logistics system is expected to eventually lead to an enhanced delivery service for the company's customers and a streamlining of the Norwegian operations, which will result in greater profits.

Financial risks

In the course of its operations, the Ahlsell Group is exposed to different types of financial risks. Financial risks refer to the risk of fluctuations in earnings and cash flows as a result of changes in foreign exchange rates, interest rates, customers' ability to pay and business refinancing options. Ahlsell's finance policy comprises a number of guidelines and rules that define a risk period for its financing activities. The general objective is to optimise the ratio between a risk level and the return to the shareholders within the framework of this period.

The currency risk is concentrated on the import of goods (transaction exposure), lending and borrowing between the companies in the Ahlsell Group, financing in foreign currencies, and currency risk due to restatement of investments in foreign subsidiaries (translation exposure).

The impact of translation exposure is limited by matching foreign net assets with loans in the same currencies. 19 percent of the Group's loans are in Swedish kronor (SEK) and the rest in foreign currencies. The percentage in SEK after exchange rate swaps and forwards is 62 percent. The key individual currencies are SEK against the Euro and NOK.

Fluctuations in interest rate levels have a direct impact on Ahlsell's net interest income/expense. The company uses interest rate derivatives, interest rate ceilings and interest rate swaps to limit exposure to fluctuations in interest rates. These instruments are not used for speculative purposes but to reduce the underlying risks. A one-percent change in the market rate affects the Group's profit through increased interest expense by about SEK 24 million. The fixed rate interest period for Ahlsell's four facilities was 17 months on 31 December 2010.

The company has a defined credit policy for managing credit risk associated with trade receivables. This requires a credit check for all customers.

Other risks and uncertainties

The economy

Activity in the building sector, comprising new construction projects, service and repairs, and renovation, maintenance and improvement (RMI), is the single most important driving force for Ahlsell's sales development. More than half of Ahlsell's total sales in 2010 went to the building sector. The trend for new construction projects reacts, with some delay, to the general economy and was positive during the latter part of the year. However, service and maintenance and the RMI sectors were less affected by the economic downturn.

Acquisitions and integration work
Acquisitions play a key role in the fulfilment of Ahlsell's growth strategy and
goal of becoming the leading player in
all operational product segments in each
market. The company therefore has a
policy of regularly identifying and evaluating potential acquisitions. Ahlsell's
growth opportunities can be constrained
if it encounters difficulties in identifying
and implementing acquisitions.

Ahlsell gives priority to acquisitions with evident cost synergies. To realise the value of these synergies, Ahlsell aims to integrate the acquired entity into its system and structures as quickly as possible. This involves the coordination of IT systems, logistics, purchasing, administration and sales. These measures normally result in a significant improvement in profitability. Ahlsell considers there to be minimal risk of declining profitability in conjunction with the integration of acquired entities as the synergies mainly relate to activities that contribute to cost reductions and are confined to areas over which Ahlsell has control. If difficulties are encountered during the integration process in spite of this, then there is a risk that expected synergies may not be brought to fruition.

IT systems

Ahlsell is dependant on technical systems for collecting, processing and communicating information securely and efficiently. This applies to our customised order/warehouse management system, IMI Order, which also incorporates Web/Internet/mobile access and the centralised warehouse and distribution system Astro. We also provide larger customers and suppliers with EDI services for the integration of their order and warehouse management systems with IMI Order. External partners are responsible for the administration and maintenance of all of Ahlsell's central IT systems. Serious errors or longer periods of down-time in business-critical information systems can eventually cause goods delivery problems or limit our ability to receive orders or invoice customers. Ahlsell was affected by two brief disruptions (three to four hours) in availability in its Groupwide businesscritical IT systems in 2010.

Warehousing and distribution
Ahlsell relies on a number of main
warehouse facilities and distribution
centres, including central warehouses
in Hallsberg (Sweden), Gardemoen
(Norway) and Hyvinge (Finland). In addition, Ahlsell depends on a small number
of transport operators to provide daily
delivery of products to stores and endcustomers. Ahlsell's ability to deliver
goods would be seriously affected if
the warehouses or distribution facilities suffered damage or the contracted
transport companies were unable to
provide sufficient capacity.

Personnel

The average number of employees in the Group in the period January - December 2010 was 4,206 (4,358). The number of employees in the Group on 31 December 2010 was 4,344 (4,264).

Environment

Ahlsell's activities at its central warehouse in Sweden are subject to statutory reporting as it handles used coolants. These activities have also been licensed by the county administration board. The grant of this licence is conditional upon the submission of an annual environmental report to Hallsberg Local Authorities. Ahlsell also has licences for the handling of products that pose fire or explosion hazards, chemical products and biotechnical organisms. It also has some 70 stores that have licences for the storage of flammable liquids >100 litres or indoor gas. Ten stores also have licences for having gas depots.

Ahlsell endeavours to be one of the leading companies in the industry with regard to environmental protection. The company has clear guidelines for the areas of its business that are considered to have the greatest impact on the environment. This includes an environmental policy on how Ahlsell shall work to reduce the environmental impacts of its operations within the framework of efficient commercial activities. Ahlsell's purchasing system, its stores and logistics centres in Sweden and related distribution operations are accredited to ISO 14001.

The main focus of Ahlsell's operations is trading and distribution. The environmental impacts of the Group's activities therefore relate primarily to transport, waste, chemical-technical products and energy use.

Outlook

A general decline in the economy during 2009 and a global financial crisis that further weakened market conditions resulted in low levels of activity in the construction and industrial sectors in all of Ahlsell's geographic markets during early 2010. A clear upswing was observed in the second quarter when Ahlsell reported positive sales growth for the first time since April 2008. The turnaround has been most apparent in the Swedish and Finnish market segments. This positive market trend continued during the second half of the year.

The predictions for 2011 are somewhat uncertain, but suggest continued positive growth for the Nordic construction industry. It is thought that growth will be strongest in Sweden and Norway while in Finland and Denmark it is expected to slow slightly in 2011 and then regain momentum in 2012.

Events after the reporting period

At the end of January 2011, Ahlsell entered into an agreement with the Norwegian company Stream AS, which means that Ahlsell is selling 100% of its shares in Ahlsell Oil & Gas AS. The transaction took place on 28 February 2011. See Note 42.

PARENT COMPANY

Ahlsell AB (publ) is owned by Nybrojarl New 1 AB and senior executives of the Ahlsell Group (4.15%). Nybrojarl New 1 AB is owned by the Luxembourg-based company Alchemy Holding S.á.r.l, which in turn is owned by Goldman Sachs Capital Partners and Cinven.

The Parent Company's operations for the financial year consisted of ownership of shares in subsidiaries and the provision of intra-Group services corresponding to SEK 22.1 million (16.5). At the year-end the company had seven (eight) employees.

Ahlsell AB (publ) is owned by Nybrojarl New 1 AB and senior executives of the Ahlsell Group (4.15%). Nybrojarl New 1 AB is owned by the Luxembourg-based company Alchemy Holding S.á.r.l, which in turn is owned by Goldman Sachs Capital Partners and Cinven.

Proposed appropriation of profit

The following funds (SEK) are at the disposal of the Annual General Meeting:

Total	5,062,998,931
Profit for the year	642,374,834
Retained earnings	913,208,132
Share premium reserve	3,507,415,965

The Board of Directors and CEO propose that the available profits of SEK 5,062,998,931 be carried forward.

For information on the company's earnings and financial status in general, please refer to the following income statements, balance sheets, cash flow statements and notes to the accounts.

Operating cash flow

Supplementary information

In addition to the cash flow statement which has been prepared in accordance with IAS 7, Ahlsell has prepared a cash flow which is based on operations excluding financial transactions and taxes, and acquisitions and divestment of operations. This cash flow is used by management to monitor business performance.

SEK million	Note	2010	2009
On another was fit		070 7	740.0

Cash flow reconciliation

The consolidated operating statement of cash flows is based on the operating profit, which means there are no tax payments or incoming and outgoing financial payments in the operating cash flow before investments. These receipts and payments must be taken into account in order to report cash flows from the operating activities according to IAS 7 Cash Flow Statement. The table below shows reconciliation between operating cash flows before investments and cash flows from the operating activities according to IAS 7.

Cash flow from operating investments includes the type of investments and sales which are attributable to the ongoing operations, while the cash flow from investing activities in the cash flow statement according to IAS 7 also includes investments and divestment of operations and financial assets. The table below shows reconciliation between cash flows from operating investments and cash flows from investing activities.

The cash flow from financing activities must also be taken into account in order to see cash flows for the year according to IAS 7 Cash Flow Statement, as shown in the table below. This cash flow is not included in the Group's operating cash flow.

SEK million	2010	2009
Operating cash flow before investments	1,453.7	1,712.7
Finance income (according to the income statement)	1,073.6	424.3

Notes

Note 1 General information and basis of accounting

General information

Ahlsell AB (publ) (the Parent company) and its subsidiaries (together referred to as the Group) is a leading Nordic company in the areas of installation products, tools and machinery. The Group offers professional users a wide range of goods and associated services in the product areas of Heating & Plumbing, Electrical, Tools & Machinery, and Refrigeration. Sales to retail companies in the DIY area account for a smaller share of its sales.

The Parent company is a limited liability company registered in Stockholm. The address of the Head Office is Liljeholmsvägen 30, Stockholm, Sweden.

The annual accounts and consolidated financial statements have been approved for issue by the Board on 15 March 2011. The consolidated income statement and balance sheet and the Parent Company's income statement and balance sheet will be presented for adoption at the Annual General Meeting to be held on 30 March 2011.

Summary of the principal accounting policies

The principal accounting policies used in the preparation of this year's annual accounts and consolidated financial statements are set out below. The following policies have been consistently applied for all the years presented unless otherwise stated.

Basis of preparation

The consolidated accounts for Ahlsell AB (publ) have been prepared on the basis of International Financial Reporting Standards (IFRS) as they have been adopted by the European Union. In addition, the Swedish Financial Reporting Board's recommendation RFR 1 Supplementary Accounting Rules for Groups has been applied. Assets and liabilities are measured at historical cost or at cost of acquisition. Financial assets classified as held for sale and financial assets and liabilities (including derivative financial instruments) measured at fair value through profit or loss are measured at fair value. Accounting policies adopted by the Parent company are set out below.

Preparation of financial statements in compliance with IFRS requires the use of certain accounting estimates and assumptions. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. The areas that involve a significant degree of estimation, that are complex, or are areas where assumptions and estimates are of considerable importance to the consolidated financial statements are set out in Note 40.

Non-current assets and liabilities are essentially amounts that are expected to be recovered or paid more than twelve months after the reporting date. Current assets and liabilities are essentially amounts that are expected to be recovered or paid within twelve months of the reporting date.

Information about IFRS standards or interpretations that became effective in 2010:

With effect from 1 January 2010, the Group is applying the revised IFRS 3 Business Combinations and the amended IAS 27 Consolidated and Separate Financial Statements. The amendments to the accounting policies entail the following: the definition of a business has been amended, transaction costs associated with an acquisition must be expensed, contingent considerations are measured at fair value at the date of acquisition and the effects of the revaluation of liabilities relating to contingent considerations are recognised as income or expense in the income statement. Furthermore, there are two options for reporting non-controlling interests and goodwill. Either at fair value, i.e. goodwill is included in non-controlling inter-

ests, or non-controlling interests consist of a share of the net assets. One of these two methods is chosen for each acquisition and applied individually. Additional acquisitions, which take place after the controlling interest has been transferred, are treated as ownership transactions and are recognised directly in equity, which constitutes an amendment to the previous accounting policy which was to recognise excess amounts as goodwill.

Information about IFRS standards or interpretations that are not yet effective.

IFRS 9 Financial Instruments is expected to replace IAS 39 Financial instruments: Recognition and measurement beginning on 1 January 2013 at the latest. The IASB has published the first of three parts of IFRS 9. This first part concerns classification and measurement of financial assets. Under IAS 39, the financial asset categories have been replaced by two categories, where financial assets and liabilities are measured either at fair value or amortised cost. The financial asset can be measured at amortised cost if the asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows. The contractual terms must give rise, on specified dates, to cash flows that are solely payments of capital and interest on the capital amount outstanding. Any other financial asset is measured at fair value and the possibility of using the fair value option as specified in IAS 39 is maintained. Changes in fair value should be recognised in the income statement, with the exception of changes in value of equity instruments held for trading and for which an initial choice is made to recognise changes in value in other comprehensive income. The company has not decided whether it will early adopt the new policies or adopt them as of 1 January 2013.

Other changes in accounting policies with prospective application are not expected to have an effect on the Group's accounts.

Consolidated financial statements

(a) Subsidiaries

Subsidiaries are companies over which Ahlsell AB (publ) has a controlling interest. Control exists when the Company has the power, directly or indirectly, to govern the financial and operating policies of an enterprise so as to obtain benefits from its activities. The existence and impact of potential voting rights relating to shares which may be immediately exercised or converted is taken into consideration when assessing whether a company has a controlling interest.

Subsidiaries are accounted for by applying the acquisition method. The acquisition is treated as a transaction through which the Group indirectly acquires the subsidiary's assets and assumes its liabilities. The acquisition analysis determines the fair value on the acquisition date of acquired identifiable assets and assumed liabilities, and any non-controlling interests. Transaction costs, with the exception of transaction costs relating to the issue of equity or liability instruments, that arise are recognised directly in the income statement for that year.

If as a result of a business combination the sum of the fair value of the consideration transferred, any non-controlling interest and fair value of any previously held equity (in a step acquisition) exceeds the fair value of identifiable acquired assets and assumed liabilities that are recognised separately, the difference is recognised as goodwill. If the difference is negative, this is recognised immediately in the income statement for the year.

The consideration transferred in connection with the business combination does not include payments for the settlement of previous business affairs. Such settlement amounts are recognised in the income statement.

Contingent considerations are recognised at fair value at the date of acquisition. If the contingent consideration is classified as an equity instrument, then it is not remeasured and any settlement is accounted for within

equity. The fair value of other contingent considerations is measured at each reporting date and the change in fair value is recognised in the income statement for the year.

(b) Non-controlling interests

A non-controlling interest account is added if the company acquires a subsidiary but does not hold 100% of the interests in the subsidiary. There is a choice of two options for measuring a non-controlling interest. It can either be measured at the non-controlling interest's proportionate share of the fair value of the identifiable net assets of the subsidiary acquired, or at its fair value, which means a non-controlling interest includes a share of goodwill. The alternative used for measuring a non-controlling interest is chosen on a transaction-by-transaction basis.

When business combinations are achieved in stages (step acquisition), goodwill is measured on the date that control is obtained, the acquirer must remeasure its previously held equity interest based on the fair values of the acquired entity's assets and liabilities and any resulting adjustments are recognised in the income statement.

If the Group should sell its controlling interest in a subsidiary but continue to hold an interest, the retained interest is remeasured to fair value and any gain or loss is recognised in the income statement for the year.

(c) Transactions eliminated on consolidation

Intra-group transactions and balances and unrealised gains and losses on transactions between Group companies are eliminated on consolidation. Unrealised gains and losses are also eliminated unless the transaction provides evidence of an impairment loss for the transferred asset. The subsidiaries' accounting policies have been changed where necessary to ensure consistency with Group policies.

Segment reporting

An operating segment is a component of the Group that engages in business activities from which it may earn revenues and incur expenses and about which separate financial information is available. The performance of an operating segment is assessed regularly by the chief operating decision maker to evaluate segment performance and to decide how to allocate resources to the operating segment. The Ahlsell AB (publ) Group's operating segments are primarily determined by geographical areas, which comprise individual countries and groups of comparable countries. See Note 2 for further information about determination and presentation of operating segments.

Foreign currency translation

(a) Functional and presentation currencies

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. The consolidated financial statements are presented in SEK (Swedish kronor), which is the Parent company's functional and presentation currency.

(b) Transactions and balances

Transactions in foreign currencies are translated to the functional currency rate prevailing at the date of the transaction. Any gain or loss arising from the payment of such transactions and in the restatement of monetary assets and liabilities in foreign currencies at the balance sheet date is included in the income statement. The exception to this is when transactions are designated as hedges that qualify for hedge accounting of the cash flows or net investments. Such transaction gains or losses are included in other comprehensive income.

(c) Group companies

The results and financial position of all Group companies (none of which has a high-inflation currency as its functional currency) whose functional currency is different to its presentation currency are translated into the Group's presentation currency as follows:

- a) assets and liabilities of each foreign operation are translated at the closing rate on the balance sheet date,
- b) income and expenses of each foreign operation are translated at the average exchange rate for the period, unless this average is not a reasonable approximation of the rate prevailing on transaction date, in which case income and expenses are translated at the exchange rate ruling at transaction date; and
- all resulting exchange differences are recognised in a separate section in other comprehensive income.

Upon consolidation, exchange differences arising from the restatement of net investments in foreign operations and of borrowing and other currency instruments identified as hedges of such investments, are transferred to other comprehensive income. When a foreign operation is disposed, either fully or in part, the exchange differences that are recognised in other comprehensive income are transferred to the income statement and reported as part of the gain or loss on sale.

Goodwill and adjustments to fair value arising on the acquisition of a foreign entity are treated as assets and liabilities in this entity's functional currency

Property, plant & equipment

Property, plant and equipment are stated at cost less depreciation and any impairment losses. The cost of property, plant and equipment includes directly attributable costs incurred in their acquisition. Borrowing costs directly attributable to purchase, construction or production of assets that take a long time before they are ready for use or sale are included in the cost of acquisition.

Assets can consist of different parts and as each part has an acquisition cost significant in relation to the combined acquisition cost of the asset, each part is depreciated separately.

Subsequent costs are added to the asset's carrying amount or are recognised as a separate asset, depending on which is appropriate, only when it is probable that any future economic benefits associated with the asset will flow to the Group and the asset has a cost value that can be measured with reliability. In order for subsequent costs to qualify for inclusion in the carrying amount, they must relate to the replacement of identified components or parts thereof. If this is the case, these costs are capitalised. The carrying amount (residual value) of a replaced component or part thereof is derecognised at the time of replacement. Repairs are recognised as an expense in the financial period in which they are incurred.

Land is not depreciated. Other assets are depreciated at rates calculated to write down to estimated residual value on a straight-line basis over their estimated useful lives as follows:

- Buildings 20–50 years

- Machinery 3–10 years

Equipment, fixtures & fittings
 3–10 years

The residual values and useful lives of assets are assessed at each reporting date and adjusted if necessary.

If the assets' carrying amount exceeds its estimated recoverable amount, the asset's carrying amount is immediately written down to its recoverable amount calculated under IAS 36.

Any gain or loss on the disposal of equipment, fixtures or fittings is determined as the difference between the proceeds of disposal and carrying amount and is recognised in the income statement as Other operating income or Other operating expenses.

Intangible assets

(a) Goodwill

Goodwill is the excess of the cost of an acquisition over the fair value of the Group's interest in the acquired subsidiary's identifiable net assets at the date of acquisition. Goodwill arising from the acquisition of subsidiaries is reported as intangible assets. Goodwill is tested annually for impairment and is recognised at cost less accumulated impairment losses. Any gain or loss on the disposal an entity includes the remaining carrying amount of the goodwill relating to the entity sold.

If negative goodwill arises (the acquisition cost falls below the net value of the acquired assets and assumed liabilities and contingent liabilities), the whole amount is immediately reported in the income statement under Other operating income.

Goodwill is allocated to cash-generating units when testing for impairment.

(b) Customer relations, licences, lease contracts and similar rights

Customer relations and other intangible assets (mainly licences, software and lease contracts) are recognised at cost of acquisition. The assets have a limited useful life and are recognised at cost of acquisition less accumulated depreciation. Depreciation is charged on a straight-line basis to distribute costs over the estimated useful lives, which is 3-20 years.

(c) Brands

Brands are recognised at cost of acquisition.

The useful life is considered to be indeterminable as it is a question of

a well-established trademark that the Group intends to retain and develop. Brands are tested annually for impairment and are recognised at cost of acquisition less accumulated impairment losses.

(d) Capitalised development expenses

Capitalised development expenses are reported as intangible assets in the balance sheet if they are directly associated with the development of identifiable products controlled by the Group, have probable economic benefits for more than one year and exceed the expenses. Development expenses include employee expenses during the development period.

Capitalised development expenses have a limited useful life and are recognised at cost of acquisition less accumulated depreciation. Depreciation is charged on a straight-line basis to distribute costs for capitalised development expenses over the estimated useful lives of 3-7 years.

The residual values and useful lives of assets are assessed at each reporting date and adjusted if necessary. If the assets' carrying amount exceeds its estimated recoverable amount, the asset's carrying amount is written down to its recoverable amount calculated under IAS 36.

Any gain or loss on the disposal of equipment, fixtures or fittings is determined as the difference between the proceeds of disposal and carrying amount and is recognised in the income statement as Other operating income or Other operating expenses.

Research costs are recognised as expenses as incurred.

Entry and removal of financial instruments from the balance sheet

A financial asset or liability is recognised in the balance statement when the company becomes a party to the instrument's contractual terms. Trade receivables are recognised in the balance sheet when an invoice has been sent. A liability is recognised when the counterparty has performed and there is a contractual obligation to pay, even if an invoice has not yet been received. Liabilities are recognised when invoices are received.

Financial assets are derecognised in the balance sheet when the rights under the contract have been realised, have expired or the company loses control over them. The same applies to a part of a financial asset. Financial liabilities are derecognised in the balance sheet when the contractual obligation has been discharged or extinguished in some other way. The same applies to a part of a financial liability.

A financial asset and a financial liability may be offset and the net amount recognised in the balance sheet only when the company has a legally enforceable right to set off the recognised amounts; and the company intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Financial instruments

Financial assets

The Group classifies its financial assets in the following three categories: financial assets measured at fair value via the income statement, loans and receivables and available-for-sale financial assets. The classification depends on the purpose for which the instrument was acquired. Management determines the classification of the instrument the first time each instrument is reported. The Group has divided its financial instruments into the following categories:

(a) Financial assets at fair value via the income statement

Financial assets measured at fair value via the income statement are financial assets that are held for trading. A financial asset is classified in this category if acquired principally for the purpose of selling in the short term. Derivatives are classified as held for trading unless they are designated as hedges.

(b) Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise when the Group provides money, goods or services directly to a customer with no intention of trading with the receivables. They are included in current assets, except for those with maturities greater than 12 months after the balance sheet date, which are classified as non-current assets. Trade and other receivables have been classified as Loans and receivables.

(c) Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available for sale or not classified in any of the other categories. They are included in non-current assets unless management

intends to dispose of the asset within 12 months of the balance sheet date.

Purchases and sales of financial asset are accounted for at trade date, i.e. the date that the Group commits itself to purchase or sell the asset. Financial instruments are initially recognised at fair value and transaction costs. This applies for all financial assets that are not recognised at fair value via the income statement. Financial assets measured at fair value via the income statement are initially recognised at fair value, while attributable transaction costs are recognised in the income statement. Financial assets are derecognised from the balance sheet when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets and financial assets at fair value via the income statement are carried at fair value subsequent to initial recognition. Loans and receivables are measured at amortised cost using the effective interest method.

Any gains or losses arising from changes in fair value of financial assets measured at fair value via the income statement are recognised in the period in which they arise in the income statement as Finance income or costs. Dividend income from securities in the category financial assets measured at fair value via the income statement is recognised in the income statement as Finance income when the Group's right to receive payment is established.

When securities classified as available-for-sale financial assets are sold, the accumulated adjustments in fair value are transferred from Other comprehensive income to the income statement as gains and losses from financial instruments

Interest on available-for-sale securities measured using the effective interest method is recognised in the income statement as Finance income. Dividends on available-for-sale shares are recognised in the income statement as Finance income when the Group's right to receive payment is established.

If the market for a financial instrument is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques including the use information about recent arm's length transactions, reference to fair value of other instruments that are substantially the same, discounted cash flow analysis and option pricing models. This must make maximum use of market information and as little use of company-specific information as possible.

At each balance sheet date, the Group assesses whether there is objective evidence that a financial asset or group of financial assets is impaired. In the case of shares classified as available-for-sale, a significant or prolonged decline in the fair value of a security below its cost is considered in determining whether the security is impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current value, less any impairment loss on that financial asset previously recognised in the income statement, is removed from equity and recognised in the income statement. Impairment losses of equity instruments, which have been recognised in the income statement, are not written back to the income statement. Impairment of trade receivables is described below.

Financial liabilities

Borrowings are initially recognised at fair value, net of transaction costs incurred. Borrowings are subsequently measured at amortised cost and any difference between the proceeds (net of transaction costs) and the redemption amount is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

Derivative instruments and hedging activities

Derivative instruments are recognised in the balance sheet on the contract date and are valued at fair value both initially and in connection with subsequent revaluations. The method of recognising resulting gains or losses depends on whether the derivative financial instrument is designated as a hedging instrument, and if so, on the nature of the item being hedged. The Group identifies certain derivatives as either: (i) hedges of fair value of a recognised liability (fair value hedge); ii) hedges of a cash flow risk associated with a recognised liability or a highly probable forecast transaction (cash flow hedge); or iii) hedges of a net investment in foreign operations (hedge of net investment).

Information about fair value for different derivative instruments used for hedging purposes is given in Note 33. Changes in the hedging reserves in Other comprehensive income are stated in Note 29. The full fair value of a hedging derivative is classified as a non-current asset or liability if the remaining maturity of the hedged item is more than 12 months and as a current asset or liability if the maturity of the hedged item is less than 12 months. This applies regardless of whether or not hedge accounting is used. Derivatives held for trading are always classified as current assets or liabilities.

Cash flow hedges

The effective portion of the changes in the fair value of a derivative that is designated as a cash flow hedge and which qualifies for cash flow hedge accounting is recognised in Other comprehensive income. Any gains or losses attributable to the ineffective portion are recognised directly in the income statement as Finance income or costs.

Amounts accumulated in equity are recycled to the income statement in the periods when the hedged item affects profit or loss. Any gains or losses attributable to the effective portion of an interest rate swap that hedges variable interest rate borrowings are recognised in the income statement as Finance costs. Any gains or losses attributable to the ineffective portion are recognised as Finance income or costs.

When a hedging instrument expires or is sold or no longer qualifies for hedge accounting and any cumulative gain or loss on the hedging instrument is recognised in equity, the gain/loss is retained in equity until the forecasted transaction occurs and is finally recognised in the income statement. If a forecasted hedged transaction is no longer expected to occur, the net cumulative gain or loss recognised in equity is transferred directly to the income statement as Finance income or costs.

Derivatives at fair value through profit or loss

Changes in the fair value of derivative instruments that do not use hedge accounting are recognised directly in the income statement as Finance income or costs.

Hedges of net investments in foreign operations

The Group has operations in several countries. In the consolidated balance sheet, investments in foreign operations are recognised as net assets in subsidiaries. Some measures have been taken to reduce the currency risks associated with these investments. This was done by taking loans in the same currency as the net investments. These loans are translated at the closing rate on the balance sheet date. The effective part of the period's exchange rate fluctuations from hedging instruments is reported in Other comprehensive income to meet and fully or partially match the translation differences that are reported for the net assets in the foreign operations which are currency-hedged. The cumulative changes are recognised in a separate component in equity (translation reserve). The exchange differences from net investments and hedging instruments are reversed and reported in the income statement when a foreign operation is sold. When hedging is ineffective, the ineffective part is recognised directly in the income statement.

Inventories

Inventories are measured at the lower of cost and net realisable value. Cost is determined on the basis of weighted average prices. Borrowing costs are not included. Net realisable value is the estimated selling price in operating activities less the estimated costs necessary to make the sale.

Trade receivables

Trade receivables are initially recognised at fair value and subsequently at the amounts expected to be paid, i.e. cost of acquisition less any provision for depreciation determined on an individual basis. Trade receivables are considered to be of short duration and are not discounted and are stated at their nominal value. Impairment of trade receivables is reported in operating expenses.

Cash & cash equivalents

Cash and cash equivalents includes cash on hand, deposits held with banks and other short-term investments with maturities of less than three months from the date of purchase. Overdraft facilities are also available. Overdraft facilities are reported in the balance sheet as borrowing under Current liabilities.

Share capital

Ordinary shares and preference shares are classified as equity. Transaction costs directly attributable to the issue of new shares or options are recognised net after tax in equity as a deduction from the proceeds of the issue.

Trade payables

Trade payables are initially recognised at fair value. Trade payables are considered to be of short duration and are not discounted and are stated at their nominal value.

Income tax

Income tax consists of current tax and deferred tax. Income tax is recognised in the income statement except when the underlying transaction is recognised directly in Other comprehensive income, in which case the related tax effect is also recognised in Other comprehensive income. Current tax is the amount of income taxes payable or recoverable in respect of the taxable profit or loss for the current year, and is calculated using tax rates enacted or substantially enacted by the reporting date, and any adjustments relating to prior periods.

Deferred tax is recognised in full, using the balance sheet method, on all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss, it is not accounted for. Deferred income tax is determined using tax rates (and laws) that have been enacted or announced by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Employee benefit costs

(a) Pension obligations

Group companies operate various pension schemes. The schemes are normally financed through payments to insurance companies or funds managed by asset managers in accordance with periodic actuarial calculations. The Group has both defined-benefit and defined-contribution pension schemes.

The liability recognised in the balance sheet in respect to defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of the plan assets, together with adjustments for unrecognised actuarial gains or losses and for unrecognised past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate or government bonds that are denominated in the same currency in which the benefits will be paid, and that have terms of maturity approximating the terms in the related pension liability.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions exceeding the greater of 10 percent of the value of the plan assets and 10 percent of the defined benefit obligation are charged or credited to income over the employees' expected average remaining working lives.

Past-service costs are recognised immediately in income, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time. In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

When there is a difference in how the pension cost is determined for a legal entity and the Group, a provision or receivable for the special employer's contribution arises based on this difference. The present value of the provision or receivable is not determined.

Obligations relating to retirement for civil servants in Sweden are secured by an insurance policy provided by Alecta. In accordance with Statement UFR 3 issued by the Swedish Financial Reporting Board, this is a multi-employer defined benefit pension plan. For the 2010 financial year, the Company did not have access to sufficient information to enable it to report this plan as a defined benefit plan. The pension obligation is therefore reported as a defined contribution plan. The same conditions apply to the new AFP plan in Norway, which is thus also reported as defined contribution.

For the defined contribution schemes, the Group pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Group has no further payment obligations once the contributions have been paid. The contributions are recognised as staff costs in the period that the services are rendered by the

employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments will flow to the Group.

(b) Share based compensation

The Group has a share-based compensation plan where payment is made with shares. A market-based premium has been received for the outstanding options and shares which means that their fair value on the grant date is in line with the received premium and no cost has been charged to the income statement.

Payments received net of any directly attributable transaction costs are credited to Contributed equity when the premium is paid in.

(c) Termination benefits

Employees receive termination benefits before normal retirement age or when they voluntarily accept termination in exchange for such benefits. The Group recognises severance payments where it is under a manifest obligation either to give notice to employees following a detailed, formal plan without right to rescission or to provide compensation in the event of notice being given as a result of an offer made as an incentive for voluntary resignation. When compensation is offered as an incentive for voluntary resignation, a cost is recognised if it is probable that the offer will be accepted and it is possible to reliably estimate the number of employees that will accept the offer. Termination benefits that fall due more than 12 months after the balance sheet date are discounted at present value.

(d) Profit share and bonus plans

The Group reports a liability and a cost for bonuses and profit share plans, based on a formula that takes into account the gains that are related to the Parent Company's shareholders after certain adjustments. A provision is reported for the expected cost of the profit-share and bonus payments when the Group has a present obligation (legal or constructive) to make such payments for services received from employees and the obligations can be reliably estimated.

Provisions

A provision is recognised in the balance sheet when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

A provision for warranties is recognised when the underlying products are sold. The provision is based on historical warranty data and a weighting of all possible outcomes with their associated probabilities.

Provisions for restructuring costs and legal claims are recognised when the Group has a present obligation (legal or constructive) as a result of a past event and it is more probable that an outflow of resources will be required to settle the obligation, and when the amount has been measured with reliability. Provision for restructuring includes costs for termination of leasing agreements and severance pay. There are no provisions for future operating losses.

If there are a number of similar obligations, an assessment is made of the probability that an outflow of resources will be required for an overall regulation of the entire group of obligations. A provision is recognised even if the probability that an outflow for a special item in this group of obligations is low.

Provisions are valued at the present value of the amount expected to be required to clear the existing commitment. In this case, a pre-tax discount rate is used which reflects current market assessments of the time value of money and the risks specific to the provision. The increase in provisions resulting from the passage of time is reported as interest cost.

Non-current assets held for sale and discontinued operations

The significance of a non-current asset (or a disposal group) classified as held for sale is that its carrying amount will be recovered principally through a sale and not through use.

Immediately before classification as held-for-sale, the carrying amount of the assets (and all assets and liabilities in a disposal group) is measured according to applicable standards. At the initial classification of the asset as held for sale, non-current assets and disposal groups are measured at the lower of carrying amount and fair value less selling costs. The measurement provisions do not apply to the following assets, either as individual assets or as part of a disposal group:

- Deferred tax assets
- Assets arising from employee benefits
- Financial assets within the scope of IAS 39 Financial Instruments: Recognition and Measurement"

A gain is recognised for each increase in the fair value less selling costs. This gain is limited to an amount equivalent to all previous impairment losses. Losses arising from a decline in value at initial classification as held for sale are recognised in the income statement. Subsequent value changes, both gains and losses, are also reported in the income statement A discontinued operation is a component of an entity's business that represents a separate line of business or a significant operation in a geographical area or is a subsidiary acquired exclusively with a view to resale. Classification as a discontinued operation occurs upon disposal or when the operation meets the criteria to be classified as held-for-sale, if earlier. Profit/loss from discontinued operations after tax is shown as a single line in the income statement . When an operation is classified as discontinued, the comparative income statement is re-presented as if the operation had been discontinued from the start of the comparative year. The presentation of the balance sheet for current and previous years is not re-presented in the equivalent manner. Also see Note 13.

Revenue recognition

Revenue is the fair value arising from the sale of goods and services, excluding VAT and discounts, and after elimination of intra-group sales. Revenue is recognised as follows:

(a) Sale of goods

Revenue arising from the sale of goods is recognised when a Group company has supplied products to a customer and the significant risks and rewards associated with the product have been transferred to the customer and it is reasonable to assume that the equivalent charge will be paid.

The products are often sold with volume discounts and the customers are entitled to return faulty products. The sale is based on specified prices in the sales agreements after deductions for calculated volume discounts and returns. Accumulated experience is used for assessing and making provisions for such returns at the time of sale. The volume discounts are assessed on the basis of expected annual volumes.

(b) Interest income

Interest income is recognised on a time proportion basis using the effective interest rate method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income.

(c) Dividend income

Dividend income is recognised when the right to receive payment is established.

Leases

Leases, where the lessor substantially retains the risks and rewards of ownership, are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the lease period.

Leased non-current assets, where the Group has substantially all the financial risks and rewards of ownership, are classified as finance leases. Finance leases are recognised at the inception of the lease at the lower of fair value and the present value of the minimum lease payments.

Finance lease payments are apportioned between the repayment of the liability and the finance costs for the liability. Corresponding payment obligations, net of finance costs, are included in Other non-current liabilities. The interest element of the finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Non-current assets held under finance lease agreements are depreciated over the shorter of the useful life of the asset or lease period.

Borrowing costs

Borrowing costs attributable to the production of qualifying assets are capitalised as part of the acquisition cost of such assets. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale.

Dividends

Dividends to the Parent Company's shareholders are recognised as a liability in the Group's financial statements for the period in which the dividend was established at the general shareholders' meeting/annual general meeting by the Parent Company's shareholders.

Statement of cash flows

The statement of cash flows has been prepared in accordance with IAS 7, using the indirect method. In addition to the statement of cash flows in accordance with IAS 7, an operating statement shows the cash flows from the operating activities, i.e. cash flows generated by the operations and investments made in existing activities. This statement of cash flows therefore excludes financial transactions for incoming and outgoing interest payments and the borrowing and repayment of loans, payments attributable to investments in and divestment of operations and tax payments.

Accounting policies - Parent company

The Parent Company's annual financial statements have been prepared in accordance with the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities. In addition, the Swedish Financial Reporting Board's statements concerning public limited liability companies also apply. RFR 2 requires the Parent Company, as a legal entity, to prepare its annual financial statements in compliance with all the IFRS and IFRIC interpretations endorsed by the EU, to the extent possible within the framework of the Swedish Annual Accounts Act and the Swedish Act on Safeguarding of Pension Obligations, and taking into account the relationship between tax expense (income) and accounting profit. The recommendation also specifies exceptions from and additions to the standards issued by the IFRS.

Differences between the Group's and the Parent Company's accounting policies

Differences between the Group's and the Parent Company's accounting policies are described below.

Presentation

The Parent Company's income statement and balance sheet have been prepared in accordance with the format described in the Swedish Annual Accounts Act.

Subsidiaries

Investments in subsidiaries are recognised in the Parent Company using the cost method, including transactions costs, less any impairment.

Financial instruments

Following amendments to rules in the Swedish Financial Reporting Board's recommendation RFR 2 and the relationship between tax expense and accounting profit, the rules on financial instruments and hedge accounting in IAS 39 are not applied in the Parent company as a legal entity.

The Parent company's non-current financial assets are carried at cost less impairment losses, while its current financial assets are measured using the "lower value" principle.

Employee benefit costs

The Parent company calculates defined-benefit pension plans on a different basis to that required by IAS 19. The Parent company complies with the provisions of the Act on Safeguarding Pension Obligations and the regulations of the Swedish Financial Supervisory Authority, which is the requirement for making tax deductions. The significant differences from the rules in IAS 19 relate to how the discount rates are defined, that the measurement of defined-benefit obligation is based on present salary levels without assumptions about future salary increases, and that all actuarial gains and losses are recognised in the income statement as they arise.

Taxes

Untaxed reserves are recognised inclusive of deferred tax liability in the Parent company. In the consolidated financial statements, untaxed reserves are divided into deferred tax liability and equity.

Group contribution

The company recognises Group contributions and shareholder contributions in accordance with Statement UFR 2 issued by the Swedish Financial Reporting Board. Shareholder contributions are recognised directly in the recipient's equity and are capitalised in the issuer's shares and participating interests, to the extent that impairment is not required. Group contributions are reported in accordance with financial substance. This means Group contributions aimed at minimising the Group's total tax are recognised directly in retained earnings, net of the current tax effect of the transaction.

Note 2 Segment reporting

Ahlsell manages its business on a geographical basis corresponding to the countries in which it has operations. The Ahlsell Group geographical segmentation is as follows: Sweden, Norway, Finland (including Estonia and Russia), Denmark (including Poland), Central and Eliminations. This is a natural grouping of segments as business is conducted locally and Ahlsell's organisation is structured to provide the best support for local sales. Segment results are reported as EBITA and operating profit/loss. Finance income and costs are not distributed by segment. As a result of this, financial assets and liabilities are not distributed by segment. Goods and services are priced at market rates across the various segments. The trademark has not been distributed by country but is reported as a central asset.

Sweden

Ahlsell's history began on 1 March 1877, when partners John Bernström and Jakob Tornblad registered John Bernström & Co to sell machinery, pumps, oil and agricultural equipment. The foundation of today's Group was laid in 1922 when Bernström & Co merged with R Ahlsell & Co, to form Ahlsell and Bernström with a stronger focus on heating and plumbing. The company has been in business for more than 130 years and is Sweden's leading commercial company in the areas of installation products, tools and machinery. The operations in Sweden include the Group's product areas: Heating & Plumbing, Electrical, Tools & Machinery, Refrigeration and DIY. The Swedish market accounted for 56 (52) percent of the Group's external net sales in 2010. Sales in Sweden totalled SEK 10,838 million (10,022). At year-end, Ahlsell had about 80 sales units in Sweden.

Norway

Ahlsell established its operations in Norway in 1990 through acquisitions in the Refrigeration product area. They have since expanded and now encompass the Heating & Plumbing, Electrical, Refrigeration and DIY product areas. In 2010, Norwegian operations accounted for 26 (29) percent of the Group's external net sales. Sales in Norway totalled SEK 5,033 million (5,498). At year-end, Ahlsell had about 60 sales units in Norway.

Finland

Ahlsell established its operations in Finland in 1990 through acquisitions in the Refrigeration segment. These were expanded in 1999 by acquisitions in Heating & Plumbing products. Ahlsell established a DIY presence in Finland by acquiring leading DIY wholesaler Malk in 2005. The Tools & Machinery product area was introduced in Finland in 2006 through the acquisition of Kojaltek. The operations today cover Heating & Plumbing, Tools & Machinery, Refrigeration and DIY. The Finland segment incorporates the operations in Estonia and Russia. The operations in Latvia are reported as "Loss from discontinued operations" and are not included in net sales for the segment Finland. At year-end, Ahlsell had about 40 sales units in Finland. The Finnish market accounted for 16 (16) percent of the Group's external net sales. Sales in Finland totalled SEK 3,070 million (3,059).

Denmark

Ahlsell has had a presence in Denmark since 1990 when the Refrigeration operation was acquired. Since then, the number of product areas has expanded to include DIY in 1998 and Heating & Plumbing and Electrical in 2000. At the end of 2008, it was decided to wind down the Electrical and Heating & Plumbing operations. The operations today cover Refrigeration and DIY. The segment Denmark also includes Ahlsell's operations in Poland. In 2010, the segment accounted for 2 (3) percent of the Group's external net sales. Sales in Denmark totalled SEK 467 million (591). At year-end, Ahlsell had 7 sales units in Denmark.

Central and Eliminations

Comprises costs for Parent company personnel (7 persons), finance income and costs, and tax not distributed by segment. The eliminations contain eliminations of internal sales.

Ahlsell's operations are based on our product areas being supplied in all essentials through jointly-controlled distribution and sales channels in each geographic area. This means that the assets used in each product area are in all essentials the same for all product groups in each geographical area (such as storage facilities and distribution equipment). It is therefore not possible to define the use of the assets and related investments in a meaningful way for each product area.

Remuneration of Senior Executives

The Board Chairman and board members receive fees in accordance with the decision of the Annual General Meeting. Employer and employee representatives do not receive Board fees. Remuneration of CEO (Göran Näsholm) and other senior executives consists of basic salary, variable remuneration, other benefits and pension, etc. Other senior executives refers to the 5 people who along with the CEO constitute the Group management.

Basic salary and variable remuneration must be in proportion to the responsibility and authority of the executive concerned. The maximum variable remuneration of the CEO is one year's salary. The maximum variable

remuneration of the other senior executives is 30-100% of basic salary. Variable remuneration is based on performance in relation to individual targets. Pensions and other benefits of the CEO and other senior executives are paid as part of the total remuneration package.

Planning and decision process

The Group implements a process whereby recommendations for salaries, remuneration, benefits and other employment terms and conditions for the CEO and other senior executives, who report directly to the CEO, are presented to the Board Chairman for acceptance and approval.

Remuneration and other benefits

2010	Basic salary/ board fees	Variable remuneration	Other benefits	Pension costs	Total
Rolf Börjesson, Chairman of the Board	1.1	_	-	_	1.1
Caroline Sundewall, Board member	0.4	-	-	-	0.4

Other senior executives (4 people)	12.2	0.9	1.0	1.7	15.8
Total	20.4	3.0	1.2	5.3	29.8

For the financial year 2010, variable remuneration refers to a bonus charged as a cost and paid out in 2011. Other benefits refers to company cars.

Bonus

The CEO's bonus is determined by the Board of Directors. Other bonuses are determined by the CEO.

Pension benefits

The CEO has a defined premium-based scheme whereby the company pays a premium of 30% of pensionable salary. The CEO is entitled to retire at the age of 60. 60% of the full-time basic salary is paid out upon retirement between the ages of 60 and 65. Pension benefits are paid according to agreement after the age of 65.

60% of the full-time basic salary is paid out to the Vice President/CFO at the age of 62. After the age of 65, the pension is paid according to agreement.

The retirement age for other senior executives varies between 60 and 67. Pension obligations to the CEO and Vice President amounted to SEK 22.1 million (19.0) at year-end.

All retirement benefits are vested, i.e. not conditional on future employment.

Termination benefits

The CEO has a termination period of 24 months if employment is terminated by the company. If employment is terminated by the CEO, the termination period is 12 months. The Vice-President/CFO has a termination period of 12 months plus severance pay of 12 monthly salaries if employment is terminated by the company. If employment is terminated by the

Vice-President/CFO, the termination period is 6 months and there is no severance pay. Other senior executives who are in office on the balance sheet date have a termination period of 18 months if employment is terminated by the company and 6 months if employment is terminated by the executive. One of the other senior executives has a severance pay equivalent to 18 monthly salaries. The other executives receive no severance pay.

Incentive programmes

Senior executives and other key employees in the Ahlsell Group (a total of 90 at the end of the year) are part of an incentive programme that comprises ownership of shares and warrants in Ahlsell AB (publ).

The programme in Ahlsell AB (publ) includes 168,974 class B preference shares, 58,137 ordinary class B shares, 246,617 A warrants and 528,787 B warrants. The warrants mature on 31 January 2016 at an issue price of SEK 879.18 for A warrants and SEK 1,786.29 for B warrants. The shares in Ahlsell AB (publ)'s incentive programme are equivalent to about 4% of the company's shares and voting rights and, when the warrants are fully exercised, the programme corresponds to approximately 16% of the company's shares and voting rights. The incentive programme is governed by an agreement between the parties in the programme, Ahlsell AB (publ) and Nybroiarl New 1 AB.

The premiums in the programme were paid at market rate. The market rate was determined by applying a multiple of the Group's EBITA and deducting the net debt from that amount. The EBITA multiple was based on the official figures of similar listed companies.

Changes in the number of outstanding warrants and their weighted combined redemption price are as follows:

		2010)			2009	9	
	Issue price,	SEK/share	No. of w	arrants	Issue price,	SEK/share	No. of wa	arrants
Programme in Ahlsell AB (publ)	А	В	А	В	А	В	А	В

Allocation new programme	-	-	_	_	_	_	_	-
СВ	879.2	1,786.3	246,617	528,787	879.2	1,786.3	246,617	528,787

Cash settled call options issued by Nybrojarl New 1 AB

Under an incentive scheme in 2010, the Parent Company Nybrojarl New 1 AB issued cash-settled call options for shares in Ahlsell AB (publ) to certain senior executives and key personnel in the Ahlsell Group. At year-end, Nybrojarl New 1 AB had issued 289,995 call options to 18 persons.

Each call option carries a right, under certain terms and on certain conditions, to receive a cash payment equivalent to the difference between the market value of a share in Ahlsell AB (publ) when the call option is exercised and SEK 386. The call options do not therefore carry any right to receive shares in Ahlsell AB (publ). The call options are regulated by an agreement entered into by those participating in the scheme and Nybrojarl New 1 AB.

The premiums for the acquisition of the call options were paid at the market rate. The market rate was determined by applying a multiple of the Group's EBITA and deducting the net debt from that amount. The EBITA multiple has been based on the official figures of similar listed companies.

In 2010, goodwill attributable to Ahlsell Oil & Gas in Norway was written down by SEK 38.1 million. See Note 13.

There were no impairment charges in 2009.

Depreciation is based on the cost of the assets and estimated useful lives. These are stated in the section on accounting policies.

Total depreciation. amortisation and impairment per function

Group. SEK million	2010	2009
Cost of sold goods	-20.1	-29.1
Costs to sell	-436.2	-400.3
Administration expenses	-25.3	-31.3
	-481.6	-460.7

All amortisation and impairment of intangible assets is attributable to selling costs of SEK 373.8 million (-341.2), and cost of goods sold of SEK -5.6 million (-5.7).

Note 7 Operating leases

Group, SEK million	2010	2009
Lease payments for the financial year	-428.6	-427.5
Future minimum lease payments for non-cancellable agreements fall due as follows:		
Within one year	-404.0	-389.0
Two to five years	-969.4	-939.3
After five years	-1,152.1	-594.2
Total operating leases	-2,525.5	-1,922.5

The above lease payments include lease costs for central storage facilities in Sweden and Norway, with contracts through 2028 and 2030 respectively. Lease objects include numerous items, such as storage premises, offices, other buildings and equipment, IT hardware, office equipment, etc.

Note 8 Auditors' fees and remuneration

Deferred and current tax have not been taken into account for the surplus and profit/loss in Estonia as the tax consequences do not arise until dividends have been paid to shareholders (Ahlsell Sverige AB).

The Supreme Administrative Court of Finland has denied the Group's Finnish company the right to deduct part of the interest expense on intercompany borrowings. A similar process is being conducted in Norway. This is not expected to have any significant impact on the tax expense for the Group as a whole.

^{*} Relates to Ahlsell Sweden's Finnish branch

Note 13 Profit/loss from discontinued operations and assets held for sale

Ahlsell's operations in Latvia were reclassified as discontinued operations in 2008. The liquidation of the operations was completed in 2010.

Under IFRS 5, the profit/loss from the Latvian operations is reported in "Net loss from discontinued operations after tax".

The following income statement items have been moved to the line "Net loss from discontinued operations":

Total net loss from discontinued operations after tax	-20.0	-6.9

In 2010, the operations of Ahlsell Oil & Gas in Norway were reclassified under IFRS 5 as "Assets held for sale." The reason for the reclassification is the current sale of the company.

The items that have been reclassified are stated below. The items that have not been reclassified are, apart from equity, intra-group receivables and liabilities. As a result of the reclassification, goodwill has been written down by SEK 38.1 million, as the value of the intangible assets was not equivalent to the estimated market value of the company.

Impairment testing - Brands

Ahlsell's trademark is considered to have an indefinite life. The useful life is considered to be indeterminable as it is a question of a well-established trademark that the Group intends to retain and develop. At the time of acquisition (1 February 2006) the cost of the Ahlsell trademark was determined under the relief-from-royalty method and at the end of the year its recognised value was SEK 2,400 million.

Impairment testing is carried out annually in the fourth quarter. The assessment is performed using the 1 percent royalty rate set at the time of acquisition and estimated future sales growth. A 2 (2) percent growth rate has been used to extrapolate the sales trends beyond the budget period. This amount is discounted using a current cost of capital before tax for the Group of 9.0 (9.5) percent. The results of the impairment test performed in 2010 show there is currently no impairment need.

Carrying amount at end of period	4,131.7	4,326.0

During the year, goodwill attributable to Ahlsell Oil & Gas in Norway was reclassified as "Assets held for sale". Goodwill attributable to Ahlsell Oil & Gas has also been written down by SEK 38.1 million.

Goodwill impairment testing

Goodwill is allocated to the Group's cash-generating units (CGU) designated by country of operation.

Goodwill by geographical area is summarised below:

	2010	2009
Sweden	2,770.4	2,761.0
Norway	570.7	660.2
Finland	699.2	799.1
Estonia	66.9	76.4
Denmark	25.5	29.3
	4,132.7	4,326.0

The recoverable amount of the CGU has been determined based on valuein-use calculations. These calculations use cash flow projections based on financial budgets approved by the management and cover a three-year period.

Cash flows beyond the four-year period have been extrapolated using an estimated growth rate. The rate of growth does not exceed the long-term growth rate of the industry in which the CGUs operate. The discounted cash flows are compared with capital employed in each geographical area.

Key assumptions used for value-in-use measurements:

- Budgeted operating margin
- Growth rate used to extrapolate cash flows beyond the budget period
- Discount rate applied to the cash flow projections

These assumptions have been used for the analysis of each CGU in each geographical area.

Management determined the budgeted operating margin based on past performance and its expectations of market development. A 2 (2) percent growth rate has been used to extrapolate the cash flows beyond the budget period. Furthermore, an average after-tax discount rate in local currency has been used for these calculations. The discount rate has been adjusted to reflect specific risks. Overall, a 9.0 (8.5) percent discount rate has been used.

Corporate management considers, for all the geographical areas except for Estonia, that effects arising from reasonably possible changes in applied variables would not be so considerable as to individually reduce the recoverable amount to an amount less than the carrying amount.

The loss carryforwards are primarily attributable to Ahlsell's operations in Sweden, Norway, Denmark and Finland. In these countries, future profits are expected to be sufficient to enable the tax loss carryforwards to be used. Non-capital loss carryforwards for the year amount to SEK 3.2 million (45.8). The Group does not have a defined maturity period for its loss carryforwards. The Group's unrecognised loss carryforwards total SEK 3.2 million (45.8).

Ahlsell Sverige AB has a subsidiary in Estonia. In Estonia, income tax is not paid on earnings until they are paid to the shareholders. If earned but as-yet-unpaid gains are allocated to the Parent company, the Estonian government can claim up to 21% tax, the equivalent of SEK 23 million (27) on 31 December 2010. No deferred tax has been taken into account for the surplus values from acquisitions of companies in Estonia.

Note 25 Other non-current receivables

Group, SEK million	2010	2009
Accumulated cost		
At beginning of year	95.3	36.3
Settled receivables	-38.5	0.9
Reclassifications	_	22.0
Acquisitions for the year	3.6	38.9
Translation differences for the year	-6.1	1.0
Closing accumulated cost	54.3	95.3
Carrying amount at end of period	54.3	95.3

SEK 54.3 million (95.3) of the above relates to interest-bearing receivables. The majority of the non-current receivables relate to a deposit (interest-bearing) attributable to the central warehouse in Finland (Hyvinge). During the year, the premium fund which was established in Norway in 2009 was used. The above amount also includes a receivable amounting to SEK 23.7 million from the parent company, Nybrojarl New 1 AB.

Note 26 Inventories

There are no significant differences between the carrying amounts of inventories and the fair value.

No adjustment has been made to any items of inventory as a result of an increase in the value of net sales.

The cost of inventories recognised as expense is included in Cost of goods sold and amounts to SEK -13,689.0 million (-13,634.4).

During this period, stocks of finished goods have been written down by SEK -65.9 million (-83.2).

Note 27 Trade receivables

Trade receivables, gross 2,12 Provisions for doubtful receivables -	19.1 37.0	2,099.3 -27.4
Trade receivables, gross 2,12	19.1	2,099.3
Group, SEK million 2	010	2009

Provisions for and reversal of provision for doubtful trade receivables are accounted for on the Income statement under Selling Expenses. This provision is based on customer creditworthiness.

Provision for doubtful receivables

Group, SEK million	2010	2009
Provision at beginning of year	-27.4	-32.8
Provisions for anticipated losses	-50.0	-23.5
Actual losses	37.9	29.6
Exchange differences	2.5	-0.7
Provisions at year-end	-37.0	-27.4

Actual bad debt expenses and recovered bad debt expenses during the year came to a net total of SEK 34.5 million (26.8).

Concentrations of credit risk

The credit risk for trade receivables is not concentrated within any particular geographic region since the Group has a wide spread of customers in the Nordic countries, the Baltic States and Poland. The concentration of credit risk remains the same as in previous years.

Closing balance on 31 December 2010	52.6	52.6

The translation reserve comprises all exchange differences arising on translation of foreign operations reported in a currency other than the Group's presentation currency. Hedging of currency risk in foreign operations includes hedging of net assets in local currencies in Norway and Finland.

PARENT COMPANY

RESTRICTED AND UNRESTRICTED EQUITY

Restricted reserves

Restricted reserves may not be reduced by distribution of dividends.

Statutory reserve

The purpose of the statutory reserve has been to save a proportion of the net profit, rather than using it to cover losses carried forward.

Unrestricted equity

Share premium reserve

Where shares are issued at a premium, i.e. for an amount in excess of their nominal value, an amount equivalent to the premium must be credited to the share premium account.

Retained earnings

The sum of the previous year's earnings after any dividend payout. Retained earnings, net profit for the year and the share premium account together constitute total unrestricted equity, in other words the amount available for distribution to shareholders.

Total equity in Ahlsell AB (publ) was SEK 5,610.4 million (4,798.0) on the balance sheet date.

NUMBER OF SHARES

The number of shares at the beginning of the year was 5,473,741. The number of shares at the end of the year was 5,473,741 with a nominal value of SEK 100. During the year, the average number of shares was 5,473,741.

Under the Articles of Association adopted at the Extraordinary General Meeting on 31 January 2007, shares can be issued in four classes; ordinary class A and B shares and class A and B preference shares. There are a total of 3,902,812 class A preference shares, 168,974 class B preference shares, 1,343,818 class A ordinary shares and 58,137 class B ordinary shares in the company.

The shares are issued in accordance with the Swedish Companies Act (2005:551) and shareholders' rights associated with the shares may only be amended according to the procedures prescribed in the Act.

All classes of shares in the Company carry a voting right of one vote per share and the number of shares that can be issued is limited within the Articles of Association. When new shares are issued, current shareholders are given priority in subscribing to new shares of the same class.

Class A preference shares can be converted into class A ordinary shares and class B preference shares can be converted into class B ordinary shares following a Board decision. Furthermore, the share capital may be reduced through the redemption of class A and B preference shares following a Board decision.

Where dividends are paid out by the Company, class A and B preference shares take priority over class A and B ordinary shares to a dividend payout equivalent to 16.5% of the annual cumulative interest, calculated according to the agreed principal in § 7 of the Articles of Association. The preference shares do not give entitlement to any other dividends than this. The equivalent distribution is made upon liquidation of the Company.

Class B preference shares and class B ordinary shares are covered by the preemption clause included in the Articles of Association.

See Note 3 for information on outstanding options.

Note 30 Pension provisions

The Group has defined-benefit pension plans for Sweden, Norway and Finland. This type of pension guarantees the employee a pension equal to a certain percentage of final salary. Ahlsell also provides defined contribution plans in these countries and in Denmark, Estonia, Russia and Poland. Defined contribution plans represent a percentage of the employee's salary and are included in the Income Statement.

With regard to interest-bearing assets on risk-free interest rates and other assets, the expected return on assets is based on assumptions about risk premiums above the risk-free rate of interest.

The Group expects to make SEK 12 million (5) in payments in 2011 relating to defined benefit plans.

The retirement benefit and family pension obligation for employees in Sweden is covered by insurance with Alecta. In accordance with Statement UFR 3 issued by the Swedish Financial Reporting Board, this is a multi-employer defined benefit pension plan. As the Company did not have access to sufficient information to enable it to report this plan as a defined benefit plan for this financial year, an ITP pension plan, insured through Alecta, will be reported as a defined contribution plan. The same conditions apply to the new AFP plan in Norway, which is thus also reported as defined contribution.

The year's ITP pension insurance contributions through Alecta amount to SEK 48.3 million (45.6). Alecta's surplus may be distributed to the policyholders and/or the insured parties. At the end of 2010, Alecta's surplus, in the form of a collective consolidation level, was 146% (141%). The collective consolidation level is the market value of Alecta's assets as a percentage of its insurance obligations calculated by reference to Alecta's actuarial assumptions. This is not consistent with IAS 19.

Note 33 Financial instruments and financial risk management

Group

170.4

150.7

Ahlsell's financial assets consist of derivative instruments, non-current receivables, trade receivables, shares and cash and cash equivalents.

Ahlsell's financial liabilities consist mainly of loans taken to finance operations and trade payables.

Financial assets and liabilities give rise to different types of risks, which are primarily managed using various derivative instruments.

Ahlsell uses derivative instruments mainly for the purpose of:

- Converting variable rate loans to a fixed rate.
- Limiting the interest rate risk associated with variable rate borrowings.
- Reducing the Group's exposure to foreign currency risk.

Hedge accounting has not been applied for any derivative instruments. However, these instruments are always used to hedge an underlying exposure and not for speculative purposes.

Financial risk management

Ahlsell's financial policy for financial risk management was formulated by Ahlsell's Board and provides a framework of guidelines and rules in the form of a risk mandate for financial activities. The overall aim of Ahlsell's finance function is to ensure that the financial risks are optimised to a risk level that gives the shareholders a good return, within the framework of the risk mandate provided by the Board.

Risk management is handled by a central finance department in accordance with policies approved by the Board. The Group's finance department works closely with the Group's operating units to identify, evaluate and hedge financial risks. The Board provides written principles for overall risk management, as well as policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

International business activities involve different types of risks on a daily basis. The risks fall into two main categories: financial and commercial risks. The financial risks can be further divided into five main areas:

 ${\it Refinancing \, risk:} \ {\rm Is \, the \, risk \, that \, maturing \, loans \, cannot \, be \, refinanced \, at \, maturity, \, or \, that \, existing \, loans \, are \, terminated.}$

Interest rate risk: Is the risk that Group earnings will be adversely affected by changes in the interest rate level.

Currency risk: Is divided into transaction exposure and translation exposure.

Transaction exposure: Is the risk that Group earnings will be adversely affected as a result of negative exchange rate fluctuations.

Translation exposure in foreign net assets: Is the risk of negative equity effects when the assets and liabilities in foreign subsidiary companies are translated into Swedish kronor (SEK).

Credit risk: Is the risk of financial loss to the Group as a result of a counterpart failing to meet its contractual obligations.

Liquidity risk: Is the risk that the Group will have insufficient funds to meet its financial obligations as they fall due.

Refinancing risk

Ahlsell's refinancing risk is related to the financial obligations the Group has agreed with banks. The financing agreements that Ahlsell has entered into include acquisition loans, lines of credit and other loan facilities.

The acquisition loan amounted to SEK 1,013 million at 31 December 2010. Other loan facilities includes senior loans and a mezzanine loan. The acquisition loan and the senior loans have variable interest rates in EUR, SEK and NOK. The mezzanine loan is in EUR with a fixed interest rate. Further information is given under Interest rate risk. The Group is obliged to maintain certain quarterly financial obligations, so-called covenants, which are linked to this financing. The covenants by which Ahlsell must abide are:

- Consolidated EBITDA in relation to net financial expenses
- Consolidated EBITDA in relation to total net liability
- Operating cash flow in relation to amortisation and interest payments

There are specific definitions for each component and some non-recurring items are excluded from EBITDA.

All covenants were met in 2010. Ahlsell's financing risk also depends on the Group's ability to refinance maturing loans, or pay maturing loans from its existing financial resources. The chart below shows the maturity analysis for Ahlsell's bank facilities.

At year-end, Ahlsell's borrowings, with any statutory limits, were as follows:

Loans

	20	10	2009		
	Total borrowing	Statutory limit	Total borrowing	Statutory limit	
Acquisition loans ¹	1,012.6	_	1,128.1	-	
Senior loans ¹	7,021.7	-	8,332.3	-	
Revolving ²	_	500.0	-	385.0	
Mezzanine loans ³	2,044.1	-	2,050.4	-	
Other	_	-	-	_	
Total	10,078.4		11,510.8		

- ¹ Have variable interest rates and are in EUR, SEK and NOK.
- ² The revolving credit can be used for lines of credit in SEK, NOK, DKK and EUR with variable interest rates, for warranties, etc. The figures for 2009 refer to allocated credit lines, while the total revolving credit amount was SEK 500 million
- 3 With fixed interest rates in EUR.

Total	10 297,7	11,747.9

^{*}The difference in amount reported in the balance sheet relates to capitalised borrowing costs.

Interest rate risk

Ahlsell's interest rate risk relates to the possibility of change in the interest rate level having a negative impact on Ahlsell's earnings by increasing the cost of borrowing. Interest rate risk can be offset by tying up loans and using various kinds of financial derivatives, e.g. interest rate caps and floors.

The Group has an SEK 3,000 million interest rate cap of 5.50% through 30 March 2011 and an interest rate floor of 4.50% for the same maturity and amount.

An SEK 3,000 million fixed interest rate swap matures on 30 December 2013. This is a step-up swap which means that the rate of interest it receives gradually increases. The interest rate at the balance sheet date was 3.65%. The Group's mezzanine facility in EUR (equivalent to SEK 2,044 million) is currently at a fixed interest rate of 14%. The loan matures on 31 December 2016. Interest rate risk is managed at Group level by Ahlsell's Finance Department based on the instruments and the standard for fixed interest rate terms decided by the Board. The main floating rates are EURI-BOR, STIBOR and NIBOR.

The impact this year on the net financial result in respect of interest rate derivatives is SEK 148.7 million (-41.3). This positive impact can mainly be attributed to the reduction in the negative value of the interest rate floors as they move closer to maturity.

Given the same borrowings, hedges, short-term investments, cash and cash equivalents and the same fixed rate interest periods as at the end of the year, a change in the market rate by 100 basis points (1 percentage point) would change the interest expense by about SEK 24 million (37) and the interest income by about SEK 19 million (16). Without hedges, a change in the market rate by 100 basis points (1 percentage point) would change the interest expense by about SEK 82 million (97). With regard to financial investments, there is no hedging in place.

Liabilities to credit institutions and interest rate fixes, breakdown by currency before swap, SEK million

Group Currency	Liabilities to credit institutions	Holding, %	Fixed interest period, days	Liabilities to credit institutions	Holding, %	Fixed interest period, days		
		2010			2009			

Effective interest on the reporting date was:

2010				200	19			
	SEK	NOK	EUR	Other	SEK	NOK	EUR	Other
Bank loans	5.42	6.06	8.66	_	3.93	5.59	6.82	_
Leasing liabilities	2.75	_	3.82	_	1.28	_	3.51	_

Currency risk

Ahlsell's transaction exposure is concentrated on the import of goods and lending and borrowing in foreign currencies. The financial policy specifies that future cash flows can be hedged up to twelve (12) months in advance. Transaction exposure from imports is limited. There was no hedging activity on 31 December 2010 with regard to the import of goods. As a rule, cash flow hedging activities are limited. The fact that the Group has loans in foreign currencies means it has an exposure, see above, liabilities to credit institutions broken down by currency. The Group has engaged in foreign exchange swaps to reduce exposure. The exposure in EUR has been reduced by SEK 4,466 million and has increased in SEK by the same amount, which reduces the exposure compared with the table above to SEK 62% (34), EUR 33% (60) and NOK 5% (6). These instruments are not accounted for as hedges.

Based on income and expenses in foreign currencies for 2010, a five percentage point change in the Swedish krona against other currencies, excluding currency hedges, would affect operating income by about SEK 3 million (7) annually. The impact on net financial items, including the currency hedges which were outstanding at the year-end, of a five percentage point change would be about SEK 150 million (356).

The impact this year on the net financial result in respect of exchange rate derivatives is SEK -324.5 million (-174.0). The negative impact during the year can be attributed to the strengthening of the Swedish krona against the Euro. Exchange rate differences on loans for the year amount to SEK 896.2 million (396.6). The impact of exchange rate effects on the net financial result totals SEK 571.7 million (222.6).

The Group has a number of holdings in overseas operations, whose net assets are exposed to translation risk. See the chart below.

Exposed foreign net assets by country, SEK million

Group	2010			2009		
Currency (country)	Net assets	Hedged	Net	Net assets	Hedged	Net
EUR (Finland)	851.6	-830.7	20.9	955.4	-711.9	243.5

Ahlsell's net assets in foreign currencies are hedged where this exposure is significant. Ahlsell hedges nets assets in Norway and Finland. Hedge accounting is not used for other countries.

Fair value

Calculation of fair value

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance date. Quoted market prices or dealer for similar instruments are used for non-current liabilities. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest rate swaps, currency swaps and interest rate caps is based on a valuation of the intermediary credit institution, the fairness of which is tested by discounting the expected cash flows under the terms of each specific contract and maturity dates and based on market rates for similar instruments on the balance sheet date.

The nominal value less estimated credit adjustments of trade receivables and payables is assumed to approximate their fair values.

The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments.

With regard to borrowing, there is no material difference between the carrying value and fair value, as the Group's borrowings are, for the most part, at a variable rate of interest. However, the mezzanine facility mentioned above is at a fixed interest rate and has a fair value that is SEK 377 million higher than the carrying value. Nor does the Group have any other financial assets or liabilities off the balance sheet.

Fair value of financial instruments

	2010)	200	9

Trade payables	3,190.0	3,190.0	2,656.1	2,656.1
Total	13,487.7	13,864.7	14,404.0	14,503.8

Level 2 has been used to determine the fair value of financial instruments whose fair value is recognised in the Income Statement.

Liquid assets

SEK million	2010	2009	
The following components are included in cash & cash equivalents			
Cash on hand and deposits held with banks	867.8	1,085.8	
Short-term investments, comparable with cash and cash equivalents	1,073.2	499.6	
Total cash and cash equivalents	1.940.9	1.585.4	

Short-term investments have been classified as cash and cash equivalents based on the fact that:

- -They are subject to an insignificant risk of changes in value
- -They can easily be converted into cash
- -They have a short maturity

Credit risk

Credit risk is managed at Group level. Credit risk arises through cash and cash equivalents, derivative instruments and deposits with banks and financial institutions and through credit exposures to customers, including outstanding receivables. Only banks and financial institutions that have been given credit rating "A", the lowest rating, by independent valuers are accepted. Ahlsell's credit policy stipulates guidelines for sales to be made to customers with appropriate credit backgrounds and that credit-related decisions are taken by people with the right authority. Credit assessments of all of Ahlsell's clients are conducted by credit departments at country level. Each country's credit department reviews and assesses compliance with credit policies. Ahlsell's commerce system incorporates support functions that help them to keep track of who has the right to grant what, by carrying out a continuous review of authorisations and approvals. Individual risk limits are determined on the basis of internal or external credit assessments in compliance with the limits set by the Board. Credit limit utilisation is reviewed at regular intervals. Ahlsell's maximum credit risk exposure is the carrying value of the Company's financial assets. Ahlsell's total credit risk is also monitored through a database application that enables the analysis of the total accounts receivable balance down to the lowest level. Also see Note 27 Trade receivables.

Liquidity risk

The sound management of liquidity risk involves maintaining sufficient cash and cash equivalents and saleable securities, the availability of funding through an adequate amount of committed credit facility and the ability to close market positions. Due to the dynamic nature of the underlying business, the Group's finance department aims to maintain flexibility in funding by keeping committed credit lines available. The table below summarises maturity of the Group's trade payables.

Maturity profile trade payables

Effect on the Group's cash and o	ash equival	ents	-40.0

Since the acquired operations are integrated into Ahlsell's existing operations immediately after the acquisition, it is not possible to make disclosures about how much the acquired companies have contributed to consolidated turnover and earnings.

If all acquisitions during 2010 had been made on 1 January, turnover would have been approximately SEK 11 million higher and EBITA would have been approximately SEK 2 million higher.

Business combinations in the previous year

No acquisitions were made in 2009.

Note 38 Disposal of assets, liabilities and operations

Disposals have taken place after the balance sheet date. See Note 42.

Disposals in 2010

No disposals have taken place in 2010.

Disposals in 2009

No disposals have taken place in 2009.

Note 39 Related party disclosures

Group

Ahlsell AB (publ), corp. ID 556715-7820 (registered office in Stockholm), is owned to 95.85% by Nybrojarl New 1 AB corp. ID 556715-7812 (registered office in Stockholm) which prepares consolidated financial statements for the highest Group in Sweden. The remaining 4.15% is owned by senior executives of the Ahlsell Group. Nybrojarl New 1 AB is owned by the Luxembourg-based company Alchemy Holding S.á.r.l, which in turn is owned by Goldman Sachs Capital Partners and Cinven.

In 2010, the Ahlsell AB (publ) Group was invoiced a total of SEK 5.0 million (6.1) in management fees by Goldman Sachs Capital Partners and Cinven.

Information about personnel expenses and remuneration of senior executives can be found in Note 3 Personnel.

The Group has a receivable of SEK 23.7 million (22.0) from Nybrojarl New 1 AB.

Parent company

Ahlsell AB (publ) has non-current receivables with other Group companies amounting to SEK 6,105.1 million (5,230.1).

See Note 23. In addition, the Company has current receivables with Group companies amounting to SEK 7.9 million (0.6).

The Company has a non-current liability of SEK 1,430.7 million (652.5) to its subsidiary company Ahlsell Sverige AB.

The Company has a related party relationship with its subsidiaries. See Note 22.

Note 40 Significant accounting estimates and assumptions

The Group's estimates and assumptions are reviewed periodically and are based on historical experience and other factors, including expectations of future events considered reasonable under the prevailing circumstances.

Significant accounting estimates and judgements

The Group makes estimates and judgements about the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Customer relationships

A number of parameters have been used to determine the value of customer relationships. These include WACC, assumptions about growth, loss of existing customers and discount rates. Changes to these parameters would have an impact on the size of the customer relationships.

Goodwill and trademark impairment testing

Each year, the Group assesses whether or not a potential impairment exists for goodwill and trademarks, according to the accounting principles described above. The recoverable amount for cash-generating units has been determined by calculating their value-in-use. Recoverable amounts for trademarks have been determined under the relief-from-royalty method. Certain estimates have to be made for these calculations. See Note 15 and Note 17.

With regards to goodwill, the Group believes that a reasonable change in the key assumptions used in the calculation of recoverable amounts for goodwill, for example, gross margins and discount rates, would not cause the total carrying amount of goodwill attributable to each geographic area to exceed the goodwill's recoverable amount for each geographic area.

With regards to trademarks with an indefinite useful life (the Ahlsell trademark), the Group believes that a reasonable change in the key assumptions used in the calculation of the recoverable amount, for example, future sales growth, royalty rates and discount rates, would not cause the carrying amount for the Ahlsell trademark to exceed its recoverable amount.

Income taxes

The Group is required to pay tax in each country. Significant judgement is required in determining the total provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Group recognises the liabilities for anticipated tax audit issues based on estimates of whether

additional taxes will be due. Where the final tax outcome of these matters is different from the amounts which were initially recorded, such differences will impact the income tax and deferred tax provisions in the period to which such determination is made.

Deferred income tax is calculated on the basis of the temporary differences between the carrying amount of assets and liabilities and their taxable amount. There are mainly two types of assumptions and judgements that affect the recognised deferred tax. These are assumptions and judgements that are used to establish the carrying amounts of assets and liabilities, as well as those relating to future taxable profits. At 31 December 2010, deferred tax assets amounted to SEK 340 million (379), based on the assumptions of future taxable profits. Significant assessments and assumptions are also undertaken in respect of the reporting of provisions and contingent liabilities relating to tax risks.

Note 41 Company information and Disclosure

Ahlsell AB (publ), corp. ID 556715-7820 (registered in Sweden with registered office in Stockholm) is 95.85% owned by Nybrojarl New 1 AB, corp. ID 556715-7812 (registered office in Stockholm). The remaining 4.15% is owned by senior executives of the Ahlsell Group. Ahlsell AB (publ)'s address is Liljeholmsvägen 30, 117 98 Stockholm, Sweden. Ahlsell offers professional users a wide range of goods and associated services in the product areas of Heating & Plumbing, Electrical, Tools & Machinery, Refrigeration and DIY. Ahlsell has business operations in Sweden, Finland, Norway, Denmark, Estonia, Russia and Poland.

Note 42 Events after the reporting period

At the end of January 2011, Ahlsell entered into an agreement with the Norwegian company Stream AS, which means that Ahlsell is selling 100% of its shares in Ahlsell Oil & Gas AS. The transaction took place on 28 February 2011 following approval of the competition authorities.

Ahlsell Oil & Gas AS, which is a key player in its product field, valves and pipes for the Norwegian offshore oil industry, has an annual turnover of approximately SEK 350 million, corresponding to about 7% of Ahlsell's operations in Norway.
