

Meet Nilar at the Scandinavian Electronics Event at Kistamässan

[S.E.E](#) is one of the most prominent trade shows within the professional electronics industry. At this year's event – which takes place at Kistamässan in Sweden on April 19-21 – we will display our modular power technology with bi-polar NiMH energy storage. You are welcome to visit us at the C10:21 [Celltech](#) booth.

About S.E.E.

S.E.E. - Scandinavian Electronics Event, is the arena for innovative electronic solutions, inspiring meetings and business making! Arranged by The Swedish Electronics Trade Association and Stockholmsmässan at the venue of Kistamässan.

About Nilar

Nilar brings you the next generation in modular power technology with the bi-polar NiMH energy storage. The unique construction of the battery delivers incredible power and reliability from a lighter, smaller and greener unit. Furthermore, the modular design allows batteries to be coupled in parallel and series to deliver the power and capacity required to meet virtually any need. Put simply, Nilar batteries deliver more from less.

Since it was founded in 2000 by two of the leading experts from the battery branch, Nilar has always sought to challenge the norms of the battery industry. From its two R&D departments in the USA and Sweden, the company has revolutionized the way industrial batteries are constructed – developing a unique energy storage system that can be easily scaled to fit different applications. Today, the batteries are produced at the company's state-of-the-art factory in Sweden.
