HUB24 deploys Catalys by Itiviti to elevate equities trading execution and routing services in Australia

Sydney, Hong Kong, Tokyo and Mumbai – May 9, 2016 – Itiviti, a world-leading technology provider for the capital markets industry, today announced that Australian company HUB24 Limited (HUB24) has selected Itiviti's Catalys FIX Engine to enhance its proprietary investment and superannuation platform for better execution performance and connectivity.

Itiviti's client connectivity solution provides HUB24 with a rich suite of product functionality based on the Catalys FIX Engine. It ensures highly available quality connectivity and an integrated dashboard for real-time monitoring and system configuration management. Itiviti's Services team has also developed a custom technology adaptor for integration with HUB24's investment and superannuation platform. The solution enables HUB24 to route its domestic and international equities trading flow more effectively from its platform to multiple brokers, improving execution services delivery to its clients.

"Itiviti's market leading Catalys FIX technology has improved the efficiency of our equities trading execution and routing," said Jason Entwistle, Director of Strategic Development, HUB24. "Our platform is now even more flexible and will enable the expansion of our international equity business. We have chosen Catalys by Itiviti for its reliable and proven FIX connectivity, and are confident that our clients will benefit from these enhanced execution services."

"We are truly delighted to see a new addition to Itiviti's Catalys global client base and the smooth deployment of our FIX technology solutions to further elevate HUB24's equities business," said Wais Metzger, VP Sales APAC, Itiviti. "We look forward to working closely with HUB24 to support its FIX infrastructure requirements for their direct market trading and international equities flow."

Formed by the unification of Orc and CameronTec, Itiviti develops, markets, and supports industry standard technology products and solutions including Tbricks and Catalys. Catalys by Itiviti provides an integrated platform for operations, infrastructure and trading. It is the ultimate enabler: open-standard-based and centrally managed to truly harness unprecedented levels of performance, data interoperability, convergence and business insight.

Itiviti will be exhibiting at the 2016 Asia Pacific Trading Summit in Hong Kong on May 12 to showcase its latest trading and connectivity offering.

About HUB24

HUB24 is a financial services company listed on the Australian Stock Exchange (ASX: HUB). The business is focused on the delivery of the HUB24 platform and the growth of its wholly owned financial advice licensee, Paragem. The HUB24 platform supports the achievement of superior superannuation and investment outcomes for investors. It is a next-generation service with state-of-the-art portfolio management, transaction and reporting solutions for licensees, financial advisers, accountants, stockbrokers and institutions. HUB24 is not aligned to any major bank, manager or institution. HUB24 is an independent organisation with award winning technology and a growing number of respected and high profile financial services companies as its customers.
