

TalkPool wins Huawei Outstanding Quality Award

TalkPool has in a short time been awarded the Huawei Outstanding Quality Award in both Botswana and Uganda and was recently also given a quality top score and an upgrade to Huawei Grade-A partner status in Mauritius. Furthermore TalkPool is as of last year Huawei preferred network services partner delivering planning, implementation and maintenance services for Huawei's fiber optics and 3G/4G equipment worldwide. It's unusual to win these awards only a few years after starting a contractual engagement.

"We are proud to receive this extraordinary recognition from our valued customer Huawei. This is the reward for our hard and persistent work to build professional and reliable service organizations in our market units that can deliver top quality services to our customers. Huawei's requirements on technical quality, but also on health and safety, are some of the highest in the telecoms industry and these awards confirm that TalkPool is one of the leading Telecom Network Services companies in the world", says Erik Strömstedt CEO.
