

Invitation to the first international electric road confereⁿs

Dear sirs and madams,

We would like to welcome you to the first international electric road conference on June 14-15 in Högbo, Sandviken, Sweden.

Nearly a year has passed since the inauguration of the world's first Electric Road System (ERS) implementation in Sandviken. Around the world there are ongoing research on the topic of Electric Road Systems and it is time to gather international researchers and experts, to disseminate and discuss cutting edge results from research and pilot projects, to facilitate and stimulate new collaborations, and to facilitate societal uptake of ERS as a sustainable solution for transport.

The conference program consist of key notes and research result presentations, mixed with demonstration activities, poster sessions and industry panel related to all aspects of ERS. Media is welcome to join the whole or part of the conference. Please find attached the conference program. The conference is arranged within the The Swedish research and innovation platform for electric roads by KTH, Royal Institute of Technology (Integrated transport research lab) and it is hosted by RISE Viktoria, VTI, Swedish Road Administration and Region Gävleborg (with funding from European regional development fund, EU).

A press room is prepared at Högbo Brukshotell for interviews during lunchbreak and after closing day one. Should you be interested in joining, please contact Helena Fahlstedt, responsible for communications by email elvag@regiongavleborg.se.
