

PRESS RELEASE
Gothenburg, Sweden – 29 March 2017

ESET/Eurosecure partners with Mullvad throughout entire Nordic region.

Mullvad is a VPN service that keeps your online activity, identity, and location private. Now Eurosecure, distributor of ESET antivirus software products in Scandinavia, has signed a partnership agreement with Mullvad.

The agreement means that Mullvad VPN now will be sold throughout the Nordic region in shops and online stores that already sell ESET products. The VPN service is packaged in ESET's recognizable boxes and comes with an anonymous activation code to be used with a Mullvad account. Mullvad is a perfect retail partner for ESET resellers that do not save any information about their customers.

“The partnership benefits both of us, especially since the demand for VPN services has recently exploded,” says Jim Sadejeff, Nordic sales manager of ESET. “The same request goes for Malware protection, and in cooperation with Mullvad, we now have the possibility to offer our customers solutions for both.”

“We always try to listen to our partners and their needs, and Mullvad requires the visibility that we can offer, together with our products. It's a rewarding and obvious cooperation, that goes both ways,” says Jim.

“This partnership is important now that Mullvad is in a phase of rapid expansion during which we are focused on improving our security and technology,” says Mullvad's CEO Jan Jonsson. “ESET as both a partner and sales route is a perfect fit, one which allows us to focus on what we do best, developing our VPN service.”

About Mullvad

Mullvad is a VPN service offering world-class, online privacy. Mullvad helps keep users' online activity, identity, and location private. Mullvad circumvents censorship and thwarts eavesdropping – from Wi-Fi hackers to local government mass surveillance. Mullvad keeps no activity logs and requires no personal information. Mullvad's goal is to make Internet censorship and mass surveillance ineffective. Privacy is a universal right. The legal entity operating Mullvad is Amagicom AB.

About ESET

Since 1987, [ESET®](#) has been developing award-winning security software that now helps over 100 million users to Enjoy Safer Technology. Its broad security product portfolio covers all popular platforms and provides businesses and consumers around the world with the perfect balance of performance and proactive protection. The company has a global sales network covering more than 200 countries, and regional offices in Bratislava, San Diego, Singapore and Buenos Aires.

ESET has the longest unbroken run of VB100 awards for malware detection of any Internet security vendor in the world – they have passed every test since 2003.
