

Promising clinical results from use of Episealer® will be presented at the annual meeting of British Association for Surgery of the Knee

"Successful clinical results of a focal individualised mini-metal implant for focal cartilage lesions in the knee" by T. Spalding, C. Stevenson, M. Lind, K. Eriksson, T. Jung, G. Histol, P. Emans, and J. Holz has been accepted as a presentation at the BASK (British Association for Surgery of the Knee) annual meeting 2018 in Leicester, UK, which will take place on March 20-21.

The clinical outcome for a European cohort of patients treated with the Episealer® knee implant will be presented.

"We are of course delighted with the fact that clinical results from the use of Episealer® knee implants will be presented at this very important meeting. Treating this middle-aged patient group has been a challenge for a very long time, and we are glad for these very promising results" says Pål Ryfors, CEO of Episurf Medical.
