

Episurf Medical's knee products approved for marketing and sale in Spain

Episurf Medical (NASDAQ: EPIS B) today announces that the Spanish authority AEMPS (Agencia Española de Medicamentos y Productos Sanitarios) has approved the Episealer® knee implant for marketing and sale in Spain. The approval follows a review process and Episurf Medical will now continue the process of establishment on the Spanish market.

"We are happy for this approval which follows our strategy. Spain is a market of significant size with a large number of knee replacements annually. Knee osteoarthritis is a global disease and the global markets are homogenous when it comes to prevalence. We look forward to taking the next steps in Spain shortly", says Pål Ryfors, CEO Episurf Medical.
