02 February 2013

**Silverdell PLC Announce new end-to-end Specialist Environmental Support Services Website**

Silverdell PLC, the Specialist Environmental Support Services group, has launched a new website that further demonstrates their core global capabilities in highly hazardous regulated, industrial environments.

[www.silverdell.plc.uk](http://www.silverdell.plc.uk)

The new website showcases Silverdell’s unique full service offering, spanning everything from initial environmental consulting to final land remediation. Together, their group companies, Silverdell, EDS and Redhills, take a collaborative approach that can support decommissioning, remediation and refurbishment projects, plus on-going maintenance contract requirements for access and regulatory compliance.

Sean Nutley, Chief Executive Officer for Silverdell Plc, commented:

*“Silverdell is one of the few companies worldwide to offer a full suite of end-to-end specialist environmental support services, providing for the safe management and disposal of high hazard materials and built assets. The new website accurately demonstrates our capabilities across the public, private, construction and industrial markets.”*

**ENDS.**

**About Silverdell PLC**

Silverdell PLC Group companies work globally with organisations to help them protect people, assets and reputation.

We provide peace of mind through our unique portfolio of end-to-end Specialist Environmental Support Services. Working in highly hazardous regulated environments, we deliver collaborative decommissioning, asbestos management, process plant remarketing and consulting services to the built environment, industrial and energy sectors.

In choosing to work with the Silverdell Group our customers have confidence that their interests are always protected.
