

Press release 17-14-06

#### **FlexQube receives largest order so far from the Netherlands**

*FlexQube has received its single largest order in the Netherlands when an automotive manufacturing company orders 48 shelf carts.*

Anders Fogelberg, CEO of FlexQube, comments: "The Netherlands is an important market for our growth in Europe and has been a focus for our sales work for some time now. Since the language barrier is low and the country has a large manufacturing and distribution sector the potential for growth is big. This order could be the start of a series of orders from this specific company and we are very happy to learn that the customer appreciates the concept and our high-quality products. The customer is a prominent company with high expectations on intralogistics solutions and that they choose FlexQube is a proof of our performance level in design, fulfillment and quality."

#### **About FlexQube**

FlexQube is a Swedish-American company that provides a robust, modular and flexible concept to design and build industrial trolleys and racking. The company has manufacturing facilities in Sweden and the USA and distribution in North America and Europe. 2015 and 2016 were FlexQube named one of Sweden's most promising and innovative technology companies through the "33 list" as Business Week and New Technology compiles.

Growth during the last three years has been more than 100% on average and FlexQube has some of the world's largest and most prominent manufacturers in the automotive, energy, aerospace, appliance, and engineering industries as clients. Some examples include Autoliv, Dräxlmaier, Kuehne-Nagel, Scania, Whirlpool, Eberspächer, Oshkosh and Cummins.
