

PEIKKO'S DELTABEAM® SLIM FLOOR STRUCTURE CHOSEN FOR AN OFFICE AND RETAIL COMPLEX IN WROCLAW, POLAND

Peikko Group's Polish subsidiary Peikko Polska Sp. z o.o. has received a remarkable order for an office and retail complex Business Garden Wrocław II located in Wrocław, Poland. The order comprises 4.9 kilometers of DELTABEAM® Composite Beams and more than 800 pieces of PCs® Corbels for the project's beam connections. The deliveries for the project will start in January and are estimated to continue until September 2018. The complex is planned to be finished by the end of 2019.

Business Garden Wrocław II is the continuation of Business Park I project. The second phase currently under construction includes six buildings, one of them 15 storeys and five of them 7 storeys, and a floor area of 79,000 m² in total. Business Garden Wrocław II is designed according to LEED principles. The project is developed by Vastint Poland, and the architect is APA Wojciechowski. The main contractor is HOCHTIEF Polska, and the structural design is made by Arcade Polska. Project's precast elements are manufactured by Pekabex.

"Our DELTABEAM® was chosen for this project because of the flexibility it offers for the interior. Combined with hollow-core slabs, DELTABEAM® forms a slender structure enabling wide open spaces and thus adaptable floor plans. By using DELTABEAM®, changing the use of the building during its lifecycle is easy and sustainable", tells Topi Paananen, CEO of Peikko Group Corporation.

Distribution: Main media, Peikko websites

DELTABEAM® is Peikko's composite slim-floor system for multi-storey buildings of any kind. It allows flexibility for layout changes throughout the service life of the building, and enables easy HVAC installations. With the use of DELTABEAM® the depth of the whole structure can be reduced, which means savings in construction time and costs as well as in heating and cooling costs. DELTABEAM® enables different kinds of cantilevers and architecturally challenging façade solutions without the use of in-situ casting.

Peikko Group in brief:

Peikko Group Corporation is a leading global supplier of concrete connections and composite structures.
