

ChromoGenics presents ConverLight® dynamic glass at Nordbygg 2018

ChromoGenics AB (publ) will present its unique technology ConverLight® to stakeholders and active members of the construction and real estate industry at the trade show Nordbygg 2018 in Stockholm, Sweden, April 10-13.

ChromoGenics' dynamic glass ConverLight® offers property owners, architects and other stakeholders an attractive and cost efficient solar control solution. ConverLight® provides residents with increased energy efficiency and indoor comfort in buildings by controlling heat- and light transmission. ConverLight® also contributes to environmental certifications of buildings, which is high on the environmental agenda for both the EU and real estate owners in their efforts for greater sustainability.

The Nordic region's largest and most dynamic meeting place for the construction and real estate industry, Nordbygg, takes place April 10-13th in Stockholm, Sweden. As a further step in our marketing and international expansion, ChromoGenics will attend the trade show and present ConverLight® under the theme "Dynamic solar control for natural contact with the outside world."

"At Nordbygg 2018, ChromoGenics will showcase one of our customers, ICEHOTEL 365 in Jukkasjärvi, Sweden. ICEHOTEL 365 maintains a permanent temperature of -5°C year-round in the new building, using a cooling system that runs on energy from a solar cell facility. ICEHOTEL 365 is located 200 km north of the Arctic Circle and the sun remains above the horizon for 100 consecutive days during the summer. ConverLight® dynamic glass was installed a year ago to provide daylight while saving energy by reducing cooling requirements" states Thomas Almesjö, CEO ChromoGenics.

About ChromoGenics

ChromoGenics offers dynamic glass with controllable heat- and light transmission. The company's unique technology ConverLight® provides sustainable solar control for increased indoor comfort and energy efficiency. ConverLight® also contributes to Green Building certifications. In 2016 the company started commercial sales to real estate projects in Scandinavia.

ChromoGenics is located in Uppsala, Sweden, and the technology is derived from the world leading research center at Ångström Laboratory at Uppsala University. The plant has been partly financed by a conditional loan from the Swedish Energy Agency. ChromoGenics share (CHRO) is listed on Nasdaq First North Stockholm with G&W Fondkommission as Certified Adviser.
