

UPS CUSTOMS BROKERAGE GROUP SUCCESSFULLY FILES ACE ENTRY DURING CBP PILOT TEST PROGRAM USING KEWILL

Kewill One of Three Vendors Recognized for Providing Software for the Pilot Program

June 11, 2012 - Chelmsford, MA - Kewill (LSE: KWL), a leading provider of software solutions that accelerate global trade and logistics, today announced that UPSO, a global leader in logistics has successfully completed a Simplified Entry filing using Kewill Customs Brokerage solution for participation in the U.S. Customs & Border Protection's (CBP) Simplified Entry Pilot.

UPS was one of only nine selected by CBP to participate in the Pilot. Simplified Entry streamlines the release of goods and enhances cargo security. It segregates the filing of the transportation information from the filing of the entry information. This allows for the earlier filing of entry information which will in turn allow CBP personnel to apply more time and resources as part of its risk-segmented approach in identifying high-risk shipments while potentially reducing transaction costs for the trade community. The capability for filers to update information will result in more accurate data for CBP and Participating Government Agencies.

News Facts:

- Simplified Entry (SE) is a new ACE feature to enable the release of cargo with as few as 13 data elements as opposed to the 27 currently required
- Only nine companies were selected to participate in the pilot program
- Kewill Customs Solution increases the speed of processing and management of US imports and CBP entry
- Kewill Customs Solution serves the top customs brokers in the market today

Supporting Quote:

- **“Kewill is the leading authority on global trade and logistics and the fact that we were one of only 3 vendors that had been selected to participate in the program underscores our leadership in this space,” said Joseph Cowan, vice president of LSP Solutions for Kewill Americas. “We look forward to continuing our work with industry trade regulators and our customers to ensure we continue providing solutions that help organizations remain compliant and maintain their competitive edge.”**
