

TERRANET IN PARTNERSHIP WITH IBM

TerraNet have on this Friday March 10, 2017, entered into a partnership with IBM to leverage the scalability of its connectivity solutions inside the IoT segment on a global reach. TerraNet will with this collaboration be able to leverage the IBM Watson and Bluemix platforms which include access to the widest range of cognitive technologies. IBM Watson is a versatile cognition framework with a set of open APIs and SaaS products. IBM Bluemix is a hybrid cloud architecture for enterprise-level services.

Our sketch-to scale-partnership with IBM strengthens our competitive advantage significantly. It starts effective immediately and enables us to in a more powerful way market, design and develop our social, mobile and localisation awareness features, says Pär-Olof Johannesson, CEO, TerraNet.

ABOUT TERRANET

TerraNet is a world leader of proximal connectivity software solutions for audio, video and bandwidth rich streaming solutions. A recognized leader in proximity awareness connectivity, TerraNet offers customers access to an extensive experience in Wi-Fi Aware and IEEE 802.11s mesh. TerraNet is headquartered in Lund, Sweden, with satellite offices in San José, Silicon Valley, Hyderabad, India, and Taipei, Taiwan.
