

Press release 3 November 2017 (8:30 CET)

DALAB expands into electrical installations

Instalco's subsidiary DALAB Sverige opens a new unit with focus on electrical installations. As a result, DALAB becomes a complete provider of installation services within ventilation, heating and plumbing, and electricity.

The new electrical installation unit with customers within construction will have offices in Gävle and Borlänge. Its services will be offered in mid-Sweden.

"We are very proud of this initiative and that we now will be able to offer multi-technical solutions within ventilation, heating and plumbing and electricity, which has been in demand among our customers", says Henrik Ekgren, CEO of DALAB Sverige.

Mikael Lindqvist has been appointed as new unit manager for DALAB EI Installation. He joins from Midroc Electro, where he previously held the position as manager of large projects.

"It is very exciting to open up and manage the new unit. DALAB has a sound reputation in the industry and I am really looking forward to initiate the build-up of the business", says Mikael Lindqvist.

Through this initiative, DALAB Sverige will work with three brands – DALAB Dala Luftbehandling (ventilation), DALAB VVS Installation (heating and plumbing) and DALAB EL Installation (electricity).

"DALAB has a strong position in mid-Sweden, and we have noticed a demand for complete installation services among our customers. To start a new unit is a fast and efficient method to take advantage of this opportunity", says Johan Larsson, Head of Business Area North at Instalco.
