

Press release**13. August 2018****OmniCar to launch Service Agreement Management 2.0 in Q4**

Since the introduction of our Service Agreement Management (SAM) solution in 2017 the market has responded positively. We are proud to announce new software updates and features in SAM 2.0 which we plan to launch beginning of Q4.

SAM 2.0 will launch in October 2018 with new design and features making the process of selling and administrating local service agreements even more automatized and secure. The workshops and dealers will be able to act proactively and check the status and current economic value of the service agreements. SAM 2.0 will also include a dashboard enabling the management to track the KPIs of the service agreement.

Claus T. Hansen, Group CEO OmniCar Holding AB says: *After one and a half year we have almost achieved full market penetration in Denmark with workshops and dealers using OMNICAR SAM. We are proud to announce that we are very close to launching SAM 2.0. The new version of SAM will make it even easier for workshops and dealers to handle their service agreements while tracking the performance of each service agreement.*
