Press Release. Fast, stylish and practical. The new Store 'n' Go V3 USB Drive with USB 3.0 "SuperSpeed."

Verbatim is unveiling a new family of USB Drives with a USB 3.0 interface for "SuperSpeed" data transfer. The new Store 'n' Go V3 features a small form factor with a tapered design and uses a "slide and lock" mechanism that protects the connector of the drive. The Store 'n' Go V3 is available in seven vibrant colours and goes up to 64GB in storage capacity.

- **USB 3.0 "Super Speed"**
- **'Slide and Lock' mechanism to protect the connector**
- **System requirements: Windows 7, Vista, XP, Mac OS X 10.4 or higher, Linux 2.4.0 or higher**
- **Available in 7 different colours in 16GB**
- **Grey version available in 8, 16, 32 and 64GB**

With its USB 3.0 interface the Store 'n' Go V3 offers data transfer up to 10 times the speed of USB 2.0*, making it faster for transferring/saving larger files sizes of all types. USB 3.0 is backwards compatible with USB 2.0.

The practical 'Slide and Lock' mechanism helps to protect the interface. It locks into position when using the drive and retracts back into a closed position while not in use. Available in "Sunkissed Yellow", "Eucalyptus Green", "Hot Pink", "Caribbean Blue", "Volcanic Orange" and "Violet" in 16GB. The grey Store 'n' Go V3 is available in four different capacities of 8GB, 16GB, 32GB and 64 GB to store larger media files such as video and photos.

* Based on USB 3.0 theoretical bus speed. Actual speeds dependent on file size and computer capabilities.
