## Travel app Qixxit goes live

- The intermodal travel platform combines long-distance bus, train and air travel
- Available now for iOS, Android and desktop

Thanks to the digital travel planner Qixxit, combining several different means of transportation into one trip has become a lot easier. For the very first time, the three main modes of long-haul transportation – long-distance bus, train and air travel – can be compared in one single search query, and then combined to create one connected journey. Layovers and check-in times are fully considered. The travel platform app can now be downloaded from the iOS and Android stores and can also be accessed at [www.qixxit.com](http://www.qixxit.com).

“We’ve been continuing to work on the development of the app over the past few months, and our main focus has been on the needs of travellers. We’ve integrated the results of our various user tests, as well as feedback from beta users, into the software development and platform design. We’re truly indebted to everyone who’s supported us throughout this crucial phase,” says Stefan Kellner, CEO at Qixxit.

Qixxit’s travel planning includes access to train connections with Deutsche Bahn and other railway companies. This includes FlixTrain, as well as German and European FlixBus connections. Air travel options are integrated through Qixxit’s partner Skyscanner. While Deutsche Bahn train tickets can be booked directly through Qixxit, other bookings are carried out through travel service providers or travel agents.

### About Qixxit

Qixxit is a digital travel planner that combines long-distance bus, train and flight options into one route and creates a custom itinerary. For the first time, travellers can find it all in one place: smart connections, advantageous, exact fares as well as tickets. The international team at the Berlin-based start-up works to make travelling easier for everyone. Qixxit is an investment of Deutsche Bahn Digital Ventures GmbH.
