The search for internet's best live casino games have finally been made much easier. The site, which is Swedish, is available in English and aims to guide both Swedish and British players, regardless of experience level. In the future, the site will be available in Norwegian and Finnish as well.

What is live casino?

Livecasinokings.com is a site specialized within the area of live casino – a form of gambling where you play against a flesh and blood dealer via a live stream. That means live casino games aren't run by a program or a machine but by an actual human, unlike games at online casinos. Usually a chat function is included which allows players to interact with the dealer during gameplay.

The most common live casino games include roulette, black jack and poker. Unfortunately the range of live casino games is not as extensive as for online casino games due to the complexity of setting up a live casino. But as the demand for live casino games continue to rise, more casinos are expected to offer the live experience in the future.
