### **About Kerasal Nail™ and nail disease**

Kerasal Nail™ is a topical treatment used to treat nail disease. Launched in the Nordic region in late 2010, it quickly became the market leader. In the U.S. the product is sold over-the-counter under the name Kerasal Nail™, in other markets under the names Nalox™ and Emtrix®. Safety and efficacy have been demonstrated in several clinical studies including more than 600 patients. Kerasal Nail™ has a unique and rapid mechanism of action which brings visible improvements within 2-4 weeks of treatment. Nail fungus is the most common nail disease and afflicts approximately 10 percent of the population and is more common among the elderly. It is generally recognized that there is a need for new efficacious and safe topical treatments.
