

## Sales start of HIOD One

Sports Nut and intercycle have placed their first orders of HIOD One. This marks the sales start of the world's first communication device.

/// Winner 2012  
Product

**Press release, May 30, 2012:** HIOD One will be distributed in Germany and Austria by Sports Nut and in Switzerland and Liechtenstein by intercycle. Both distributors have placed their first orders and their retailers will sell the communication device HIOD One with start next week, June 4. HIOD One can also be bought online today at Bikemia in the USA and Cykelmagneten in Sweden, see the links below.

"We are very pleased that we now can offer this new technology to the cycling community. The functions of HIOD One will give the cyclist a new exiting communication experience", says Per-Arne Wiberg, CEO at Free2move, the company that has developed HIOD One.

The new cycling product HIOD One simplifies communication between cyclists. It is the first sports communicator with a performance mode as well as an instant link to your friends, phone calls and music. It makes the impossible possible – to freely talk in a normal speaking tone while cycling at high speed, hundreds of meters apart.
