

Fleetwood RV Introduces New Floor Plans for Excursion

Decatur, Ind. – (July 26, 2012) – Fleetwood RV, Inc., a leading producer of Class A and Class C recreational vehicles, announced the addition of two new floor plans for its compact Class A diesel pusher, the Excursion. Both floor plans boast contemporary layouts featuring the latest in décor and design, including a mid-coach Whirlpool 18 cubic foot residential refrigerator and wrap-around kitchen.

“We listened to our customers in creating these two new floor plans for our compact Excursion diesel,” said John Draheim, President and CEO of Fleetwood RV, Inc. “The blending of kitchen function and design in the new 2013 Excursion models give buyers more options for maximizing space and storage.”

With extra large windows to enjoy your surroundings, both the 35B and 35C Excursion models feature a spacious galley design with polished Volcanic Series solid-surface countertops, vertical pullout pantry and provide just enough room to let

chefs roam. Showcasing contemporary interior décor throughout, both models also include a massive 170 cubic feet of interior storage, dwarfing coaches of similar lengths. The company’s innovative Hide-A-Loft option, with an incredible 650-pound weight capacity, gives customers more sleeping capacity without sacrificing additional floor plan space.

The open floor plan design of the 35B Excursion makes it great for entertaining family and friends with the hide-away dinette table and chairs plus free-standing euro-recliner to expand seating. A breakfast bar with two swivel chairs adds to the charm of this model. The 35B bedroom features an additional bedroom slide-out for increased wardrobe storage.

The modern characteristics of the 35C Excursion highlights a conventional extending dinette with deep credenza that doubles as a convenient computer workspace. Adding to the already spacious countertop is an extended oversized flip-up countertop for unprecedented counter space. The 35C bedroom also features additional bedroom slide-out for maximum storage. A sofa bed is also included for increased sleeping capacity.

Fleetwood RV’s Excursion is built on the durable Powerbridge® chassis construction utilizing the Freightliner XCS Series Chassis and equipped with a 300HP Cummins® ISB 6.7L engine with exhaust brake, providing exceptional performance for the open road.
