Scania adds Norway to its gas bus market

Scania has delivered 36 gas-powered buses to passenger transport company Nobina in Norway. This marks a Scania break-through for gas buses in Norway.

Norway is the newest market to which Scania delivers gas buses. Recently, public transport companies in Colombia and Indonesia have also taken deliveries of Scania gas buses.

The new Scania OmniExpress 3.20 LE Euro 6 buses are replacing older buses operating in the Ski area, southeast of Oslo.

The buses can be fuelled with compressed natural gas, CNG and biogas which all contribute to lower emissions of greenhouse gases and noise.

Nobina is the largest bus transport company in the Nordic region. The company has 7,000 employees and operates 4,000 buses in Denmark, Finland, Norway and Sweden.

Scania is one of the world's leading manufacturers of trucks and buses for heavy transport applications, and of industrial and marine engines. Service-related products account for a growing proportion of the company's operations, assuring Scania customers of cost-effective transport solutions and maximum uptime. Scania also offers financial services. Employing some 42,000 people, the company operates in about 100 countries. Research and development activities are concentrated in Sweden, while production takes place in Europe and South America, with facilities for global interchange of both components and complete vehicles. In 2014, net sales totalled SEK 92.1 billion and net income amounted to SEK 6 billion. Scania press releases are available on www.scania.com
