CANADIAN INVESTIGATION INTO DUMPED AND SUBSIDIZED IMPORTS OF CHINESE PILING PIPE

Harrow, Ontario (May 4, 2012) - Atlas Tube Canada Inc., Harrow, Ontario, is pleased that the Canada Border Services Agency has responded to its trade complaint and has launched a full investigation into the dumping and subsidizing of piling pipe from China.

As a major Canadian producer of piling pipe and an employer of hundreds of persons at its Harrow, Ontario, plant, Atlas filed this complaint in response to a continuous flood of low-priced Chinese pipe into Western Canada. This was done to protect Atlas' manufacturing operations and safeguard the jobs of its employees from the injurious effect of this unfair pricing of Chinese-origin products.

Atlas anticipates that the CBSA investigation will ultimately lead to the curtailment of this injurious activity through the application of anti-dumping and countervailing duties to the imports concerned.

About Atlas Tube

Atlas Tube was founded in Harrow, Ontario in 1984 and produces a range of steel tubular products at its state-of-the-art production facility. Atlas Tube's steel piling products are used in some of the most demanding applications, including commercial and industrial buildings and major oil and gas refineries and other facilities across Canada. Atlas Tube is a major employer in the Windsor, Ontario, region and, through its manufacturing and Canada-wide distribution operations, makes a significant contribution to the provincial and national economy.

For more information about Atlas Tube and its piling products go to www.atlastube.com, email sales@atlastube.com, or call 800-265-6912.
