Cybercom's Sustainability Report

Cybercom's complete Sustainability Report for 2017 has been published on the company's website at www.cybercom.com/2017-sv and www.cybercom.com/2017-eng

President and CEO Niklas Flyborg comments:

"All Cybercom operations are delivering strong development in the desired strategic direction, albeit at somewhat different rates. We are following our strategic plan with good results and we are within reach of our targets. However, the 17 global Sustainable Development Goals demand more forceful action by Cybercom and our clients. ICT and technical advancements are playing a major role in the global economy and in sustainable development. Digitalisation is behind the most important forces of change this decade. The industrialisation of IT, including the focus on 5G, cloud services, cybersecurity and disruptive technologies like artificial intelligence (AI), the Internet of Things and blockchain technology will be affecting us at an accelerating rate in the next decade. And this is what the days of Cybercom consultants are made of. This is a thrilling evolution, but we are not stopping there. We see beyond technical developments and engage in the consequences of our solutions.

We are putting the new technologies in relation to the sustainability risks of our time to more effectively craft the solutions of tomorrow, add business models and open new markets. In 2017, 88% of business with our largest clients had a positive sustainability effect. We now measure Sustainable Business in our CRM system and we continue to develop our Digital Sustainability Process to enable our clients to achieve a net positive impact on our society."

This is Cybercom's eighth Annual Sustainability Report. The Sustainability Report was prepared in accordance with the requirements set forth in the Swedish Annual Accounts Act (ARL) and GRI G4, Core Option. The Sustainability Report is also Cybercom's annual account to the UN Global Compact. Cybercom has been a signatory of the Global Compact since 2011.

About Cybercom

Cybercom is an innovative IT consulting firm that enables leading companies and organisations to capture the opportunities of digitalisation. We provide innovative, secure and sustainable solutions in IT and communications technology by combining technical edge and strong business insight. This applies whether the issue is transforming products into services, developing new business models or helping the public sector get closer to citizens. We are found where technology and business development meet. We think big. We test, we learn and we adapt. And the distance from planning to action is short. The single objective is for our clients to succeed in the connected world. This is how we are making tomorrow, today. We are a richly diverse company with a large range of ages, 44 nationalities and assignments in 21 countries. We are creating the world of tomorrow in unison, we are creative, fearless and inquisitive – always ready to challenge the status quo. We turn our words into action and empower change. We are the #Makers of tomorrow. Cybercom has been a privately owned company since 2015. Its main shareholders are JCE Group AB and Tequity AB. Cybercom's domestic markets are the Nordic region and Poland, and in addition the company offers global delivery capacity for local and international business. www.cybercom.com
