## **Cybercom signs framework agreement with City of Copenhagen**

**Denmark's largest employer, the City of Copenhagen, signs a framework agreement with Cybercom. The agreement is valid for 4 years with a possibility of extension.**

In all, the agreement is for services with an expected turnover of between 15 and 20 million Danish kroner, which the City of Copenhagen will now procure through the framework agreement. Cybercom has been chosen to deliver the framework agreement, along with five other companies.

"This is an extremely important contract for Cybercom in Denmark. The City of Copenhagen is a major purchaser of IT systems," says Karsten Ademark, MD of Cybercom Denmark.

The agreement includes development and maintenance of Service-Oriented Architecture (SOA), where distributed IT systems are organised as communicating services.

The first specific order within the framework agreement will be on May 2, with sub-orders on May 15.
