Tobii Dynavox launches I-110, the next generation speech generating touch device

Tobii Dynavox, the global leader in assistive technology for communication, announced today the introduction of the **Tobii Dynavox I-110**, its next generation Windows 10 touch-based speech generating device for Augmentative and Alternative Communication (AAC). The device is ideal for individuals who are non-verbal or have speech difficulties, with conditions such as autism, cerebral palsy, or Down syndrome.

The I-110 is a purpose-built speech generating device that breaks new ground in AAC technology. With its highly durable and water-resistant design, it offers fully integrated features such as powerful, outward facing speakers that project clear speech and sound in any environment, even when in a crowd or on a playground.

“The I-110 completes our portfolio in the segment for touch-based communication,” said Fredrik Ruben, President of Tobii Dynavox. “We can now offer our users a comprehensive range of products ranging from iOS or Windows apps, through the Indi speech tablet that is offered directly to consumers, to the medical grade I-110 tailored for the reimbursement market. With its range of first-class features and its outstanding durability, the I-110 is a more than worthy successor to our long-standing T-Series.”

The I-110 features a sleek and durable design. It has been drop-tested 5 feet (1.5m), has a water and dust resistant casing, and a battery life of 10+ hours of usage. It also includes Infrared (IR) capabilities for environmental controls, a built-in kickstand, and numerous compatible inputs beyond touch, including switch scanning, head-mouse, and touch with key guards.

The device comes with a full suite of Tobii Dynavox’ communication software pre-installed, including the industry leading Communicator 5 and Snap + Core First. These software solutions support the users at any point on their communication journey – from the emerging, symbol-based communicator all the way to the fully literate. Fully backed by an ecosystem of support and an extensive technical support warranty, the I-110 gives users the peace of mind and confidence to communicate whenever or wherever.

The I-110 can be ordered via www.tobiidynavox.com or through our network of Tobii Dynavox sales consultants and resellers. Learn more about the I-110: www.tobiidynavox.com/I-110/.

About Tobii

Tobii is the global leader in eye tracking. Our vision is a world where all technology works in harmony with natural human behavior. Tobii operates through three business units: Tobii Dynavox makes specially designed devices that are controlled by eye movement or touch screens for use by people with special needs due to spinal cord injuries, CP, ALS or other medical conditions. Tobii Pro develops and sells eye-tracking equipment and services used today by more than 3,000 companies and 2,000 research institutions, including all of the world's 50 highest ranked universities. Tobii Tech further develops Tobii's technology for new volume markets, such as computer games, personal computers, virtual reality and vehicles. Tobii is headquartered in Sweden and is listed on Nasdaq Stockholm (TOBII). The group has over 800 employees. For more information: www.tobii.com.
