

UK's National Health Service signs GBP 22 million agreement for Elekta cancer treatment systems

NHS to upgrade radiation therapy capacity with several Elekta Synergy linear accelerators

CRAWLEY, United Kingdom, November 29, 2017 – Elekta (EKTA-B.ST) announced today that it has signed a framework agreement with the National Health Service (NHS) Supply Chain to deliver several Elekta Synergy® digital accelerators, together with Agility™ multileaf collimators for high speed beam shaping and Elekta's MOSAIQ® oncology information system.

Steve Tomkins, Elekta's Business Unit Manager for the UK and Nordics, says: "This new agreement provides NHS hospitals with greater opportunity to offer advanced cancer care. Elekta is proud to continue its established position as a major supplier of neurosurgery and cancer treatment systems to the NHS."

More than 36,000 new cases of cancer are diagnosed annually in the UK. Radiotherapy is currently given to around 39 percent of all UK cancer patients, although the recommendation is that more than half of all cancer cases could be treated with radiotherapy.

The total value of the agreement is GBP 22 million and will be booked in the third quarter of Elekta's 2017/18 fiscal year. The first deliveries are planned for mid-2018.
