

Handelsbanken's Interim Report

JANUARY – MARCH 2017

Summary January – March 2017, compared with January – March 2016

- Operating profit rose by 8% to SEK 5,347m (4,967)
- The period's profit after tax for total operations increased by 2% to SEK 4,111m (4,043)
- Earnings per share for total operations were SEK 2.11 (2.12)
- Return on equity for total operations declined to 12.4% (13.1)
- Income fell by 2% to SEK 10,036m (10,243), but rose by 7% after adjustment for capital gains in the period of comparison
- Net interest income rose by 4% to SEK 7,081m (6,795)
- The C/I ratio decreased to 44.8% (49.8)
- The loan loss ratio was unchanged at 0.04% (0.04)
- New PD models were approved by the Swedish Financial Supervisory Authority
- The common equity tier 1 ratio increased to 23.8% (22.7) and the total capital ratio was 29.7% (28.8)

Summary of Q1 2017, compared with Q4 2016

- Operating profit increased by 14% to SEK 5,347m (4,698)
- The period's profit after tax for total operations grew by 19% to SEK 4,111m (3,444) and earnings per share increased to SEK 2.11 (1.77)
- Return on equity for total operations rose to 12.4% (10.6)
- Income fell by 1% to SEK 10,036m (10,125)
- Net interest income declined by 3% to SEK 7,081m (7,299), mainly due to a doubling of the fee to the Resolution Fund
- The loan loss ratio decreased to 0.04% (0.17)

Group performance

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

The Group's operating profit grew by 8% to SEK 5,347m (4,967). The period's profit after tax for total operations increased by 2% to SEK 4,111m (4,043) and earnings per share were SEK 2.11 (2.12).

The common equity tier 1 ratio increased to 23.8% (22.7), and the return on equity for total operations decreased to 12.4% (13.1). The C/I ratio decreased to 44.8% (49.8)

Income

SEK m	Jan-Mar 2017	Jan-Mar 2016	Change
Net interest income	7,081	6,795	4%
Net fee and commission income	2,354	2,170	8%
Net gains/losses on financial trans.	547	1,162	-53%
Other income	54	116	-53%
Total income	10,036	10,243	-2%

Income fell by 2% to SEK 10,036m (10,243), but increased by 7% after adjustment for capital gains from the sales of shares in the period of comparison. The effect of exchange rate movements was marginal.

Net interest income rose by 4% to SEK 7,081m (6,795).

Starting from 2017, the Bank defines its lending and deposit margins as the customer interest rate minus the internal interest rates which are either debited or credited to branch operations. Growing lending volumes increased net interest income by SEK 277m. At the same time, lending margins in branch operations had a SEK -18m negative effect. Net interest income from deposit operations increased by SEK 76m.

The benchmark effect in Stadshypotek decreased to SEK -8m (35) and the fee to the Resolution Fund doubled to SEK -438m (-255). Including fees for various deposit guarantees, government fees increased by SEK 191m to SEK -527m (-336).

The average volume of loans to the public grew by 5% to SEK 1,988bn (1,895). The effect of exchange rate movements was marginal. Household lending increased by 7% to SEK 1,039bn (970), while corporate lending grew by 3% to SEK 948bn (925). In local currencies, lending increased in all home markets.

The average volume of deposits and borrowing declined by 2% to SEK 962bn (979). The average volume of household deposits went up by 13% to SEK 403bn (357), while corporate deposits decreased by 10% to SEK 559bn (621).

Net fee and commission income rose by 8% to SEK 2,354m (2,170), primarily due to higher fund management and payment commissions. Fund management commissions increased by 22% to SEK 849m (695) and other custody and asset management

commissions grew by 12%. Brokerage income increased by 12% to SEK 261m (233), and net payment commissions grew by 3% to SEK 429m (418). Net fee and commission income from card operations declined to SEK 266m (279).

Net gains/losses on financial transactions declined to SEK 547m (1,162); this was chiefly attributable to capital gains from the sale of shares totalling SEK 827m during the period of comparison.

Other income decreased to SEK 54m (116). The reduction was chiefly attributable to a lower risk result in insurance operations and lower shares of profits from associated companies.

Expenses

SEK m	Jan-Mar 2017	Jan-Mar 2016	Change
Staff costs	-2,918	-3,668	-20%
Other expenses	-1,430	-1,303	10%
Depreciation and amortisation	-150	-125	20%
Total expenses	-4,498	-5,096	-12%

Total expenses decreased by 12% to SEK -4,498m (-5,096). The effect of exchange rate movements was marginal.

Staff costs went down by 20% to SEK -2,918m (-3,668), but adjusted for items affecting comparability in the quarter and for the previous year's provision of SEK -700m, staff costs decreased by 2%. A transition to a defined contribution pension plan in the Norwegian operations resulted in a non-recurring item which reduced staff costs by SEK 239m. The provision for Oktogonen was resumed in the first quarter and amounted to SEK 243m (-). Adjusted for the above items and the provision of SEK -700m made in the period of comparison, staff costs fell by 2%. Variable remuneration, including social security costs and other payroll overheads, decreased to SEK -20m (-31).

The average number of employees fell by 2%, or 251, to 11,584 employees (11,835). Excluding the expanding operations in the UK and the Netherlands, the average number of employees decreased by 4% and the ongoing work to improve efficiency continues according to plan.

Other expenses rose by 10% to SEK -1,430m (-1,303), chiefly due to higher costs for IT development. The Bank estimates that its investments in IT development during 2017 will increase by about SEK 200m compared to the previous year.

Loan losses

SEK m	Jan-Mar 2017	Jan-Mar 2016	Change
Net loan losses	-196	-187	9
Loan loss ratio as a % of loans, acc.	0.04	0.04	0.00
Impaired loans, net	3,164	3,508	-10%
Proportion of impaired loans, %	0.16	0.18	-0.02

Loan losses increased marginally to SEK -196m (-187), and the loan loss ratio was 0.04% (0.04). Net impaired loans decreased by 10% to SEK 3,164m (3,508), equivalent to 0.16% (0.18) of lending.

Q1 2017 COMPARED WITH Q4 2016

Operating profit grew by 14% to SEK 5,347m (4,698). The period's profit after tax for total operations went up by 19% to SEK 4,111m (3,444). Earnings per share increased to SEK 2.11 (1.77) and the return on equity was 12.4% (10.6).

The C/I ratio went down to 44.8% (45.6).

Income

SEK m	Q1 2017	Q4 2016	Change
Net interest income	7,081	7,299	-3%
Net fee and commission income	2,354	2,447	-4%
Net gains/losses on financial trans.	547	269	103%
Other income	54	110	-51%
Total income	10,036	10,125	-1%

Income went down by 1% till SEK 10,036m (10,125). The reduction was chiefly attributable to increased fees to the Swedish Resolution Fund, as well as exchange rate effects of SEK -72m.

Net interest income decreased by 3%, or SEK 218m, to SEK 7,081m (7,299), of which SEK -54m was attributable to exchange rate effects and SEK -55m to there being fewer days in the quarter. Fees to the Swedish Resolution Fund rose by SEK 198m to SEK -438m (-240). Together with expenses for deposit guarantees, government fees increased to SEK -527m (-320). The benchmark effect in Stadshypotek decreased to SEK -8m (37).

Increasing lending volumes had a positive impact of SEK 75m, while lending margins in branch operations reduced net interest income by SEK -29m. Increased deposit volumes contributed SEK 6m, while deposit margins had a negative impact of SEK -2m.

The average volume of loans to the public grew marginally to SEK 1,988bn (1,981). Exchange rate effects reduced lending by SEK 15bn. Household lending grew by 1%, while the average volume of corporate lending was unchanged. The total average volume of deposits and borrowing rose by 1% to SEK 962bn (957). Exchange rate effects reduced deposit volumes by SEK 7bn. Household deposits grew by 1%, while the average volume of corporate deposits was largely unchanged.

Net fee and commission income declined by 4% to SEK 2,354m (2,447). The reduction was mainly attributable to seasonally lower payment commissions. Fund management commissions increased by 2% to SEK 849m (835). Commissions from custody and other asset management business declined to SEK 164m (183) and were chiefly attributable to performance fees in Optimix amounting to SEK 15m in the period of

comparison. Net payment commissions decreased by 15% to SEK 429m (502), with the net result of card operations declining to SEK 266m (313).

Net gains/losses on financial transactions rose to SEK 547m (269). Profits in the comparison quarter were negatively impacted by market turbulence at year-end. This effect was reversed at the start of the first quarter when the market returned to normal.

Other income amounted to SEK 54m (110).

Expenses

SEK m	Q1 2017	Q4 2016	Change
Staff costs	-2,918	-2,981	-2%
Other expenses	-1,430	-1,518	-6%
Depreciation and amortisation	-150	-114	32%
Total expenses	-4,498	-4,613	-2%

Expenses fell by 2% to SEK -4,498m (-4,613).

Exchange rate effects reduced expenses by SEK 44m.

Staff costs fell by 2% to SEK -2,918m (-2,981). The effect of exchange rate movements totalled SEK 25m. The provision to the Oktogonen profit-sharing foundation amounted to SEK -243m (-). During the first quarter, the Norwegian operations transferred to a defined contribution pension plan. This transition involved a non-recurring item which reduced staff costs by SEK 239m in the quarter. The period's provision for variable remuneration decreased to SEK -20m (-34). The average number of employees fell to 11,584 (11,615).

Other expenses fell by 6% to SEK -1,430m (-1,518), mainly as a result of seasonally higher expenses in the fourth quarter.

Loan losses

SEK m	Q1 2017	Q4 2016	Change
Net loan losses	-196	-832	-636
Loan loss ratio as a % of loans	0.04	0.17	-0.13
Impaired loans, net	3,164	3,103	2%
Proportion of impaired loans, %	0.16	0.16	0.00

Loan losses decreased to SEK -196m (-832) and the loan loss ratio declined to 0.04% (0.17). The underlying credit quality remained stable.

Net impaired loans amounted to SEK 3,164m (3,103), equivalent to 0.16% (0.16) of lending.

Taxes

The tax rate in Q1 was 23.1% (26.7). A normal tax rate for the Group is 22-23%. Starting in 2017, interest expenses on subordinated loans are no longer tax-deductible. On an annual basis, this increases the Bank's corporate tax by about SEK 280m.

FUNDING AND LIQUIDITY

Handelsbanken's bond issues during the quarter decreased to SEK 57bn (70), consisting of SEK 47bn

(49) in covered bonds and SEK 10bn (21) in senior bonds.

The Bank has large volumes of liquid funds, mortgage loans and other assets that are not encumbered and therefore represent protection for the Bank's senior lenders. At the end of the period, the ratio of non-encumbered assets to all unsecured market funding was 227% (210% at year-end 2016).

The Bank has strong liquidity. Cash funds and liquid assets invested with central banks amounted to SEK 465bn, while the volume of liquid bonds and other liquid assets totalled SEK 156bn.

According to the current Swedish definition from January 2013, the Handelsbanken Group's liquidity coverage ratio (LCR) at the end of Q1 was 148% (126). In USD, the LCR was 236% (322), and in EUR it was 178% (136). The Group's LCR, calculated according to the European Commission's delegated act, was 169% (170). At the end of Q1, the net stable funding ratio (NSFR) was 106% (102% at year-end).

CAPITAL

The Bank's goal is that its common equity tier 1 ratio under normal circumstances should exceed by 1-3 percentage points the common equity tier 1 capital requirement communicated to the Bank by the Swedish Financial Supervisory Authority.

At the end of March, the Swedish Financial Supervisory Authority approved the Bank's new PD models for corporate exposures. Calculated according to these models, the Bank's common equity tier 1 ratio at the end of Q1 was 23.8%. Based on the new models and the increased countercyclical buffer level in Sweden applicable from March, the Bank's assessment is that the Supervisory Authority's common equity tier 1 capital requirement at the end of Q1 amounted to 20.3%. The Bank's common equity tier 1 ratio is thus 0.5 percentage points above the Board's target interval. The Bank continues to see good potential for growth, particularly in the home markets outside Sweden. At the same time, the Bank continues to constantly generate capital.

The Bank's capital target remains unchanged, and the goal is that the common equity tier 1 ratio should fall within the target interval of 1-3 percentage points above the Supervisory Authority's required level. If the current situation remains with capitalisation above the target interval, the capital level will be calibrated by means of repurchase of shares, an extra dividend or a combination of these measures.

Capital situation 31 March 2017 compared with 31 March 2016

SEK m	31 Mar 2017	31 Mar 2016	Change
Common equity tier 1 ratio, CRR	23.8%	22.7%	1.1
Total capital ratio, CRR	29.7%	28.8%	0.9
Risk exposure amount CRR, SEK m	489,456	456,104	7%
Common equity tier 1 capital	116,529	103,624	12%
Total own funds	145,291	131,176	11%
Capital requirement, Basel I floor	98,946	95,358	4%
Total own funds, Basel I floor	147,561	132,628	11%

Own funds increased to SEK 145bn (131) and the Bank's total capital ratio rose to 29.7% (28.8).

The common equity tier 1 capital increased to SEK 117bn (104) and the common equity tier 1 ratio rose by 1.1 percentage points to 23.8% (22.7). Conversions of the 2011 staff convertible bond increased the ratio by 0.6 percentage points. The period's profit contributed 1.7 percentage points after a deduction for the accrued dividend.

Implementation of new PD models reduced the common equity tier 1 ratio by 1.9 percentage points. Higher lending volumes reduced the common equity tier 1 ratio by 0.4 percentage points and credit risk migration in the loan portfolio impacted with a further -0.4 percentage points. At the same time, the effect of new lending volumes having lower risk than the exposures leaving the credit portfolio (known as volume migration) increased the common equity tier 1 ratio by 0.9 percentage points.

The effect of IAS 19 increased the common equity tier 1 capital ratio by 1.0 percentage points, due to both higher asset values and raised discount rates. The sale of AFS shares had a positive effect of 0.6 percentage points. Exchange rate movements were neutral, and the net effect of other factors reduced the common equity tier 1 ratio by 1.0 percentage point.

Capital situation 31 March 2017 compared with 31 December 2016

SEK m	31 Mar 2017	31 Dec 2016	Change
Common equity tier 1 ratio, CRR	23.8%	25.1%	-1.3
Total capital ratio, CRR	29.7%	31.4%	-1.7
Risk exposure amount CRR, SEK m	489,456	458,787	7%
Common equity tier 1 capital	116,529	115,240	1%
Total own funds	145,291	144,233	1%
Capital requirement, Basel I floor	98,946	98,235	1%
Total own funds, Basel I floor	147,561	145,760	1%

Own funds increased to SEK 145bn (144) and the total capital ratio decreased to 29.7% (31.4) as a consequence of the introduction of new PD models for corporate exposures. The common equity tier 1 capital increased to SEK 117bn (115) and the common equity tier 1 ratio according to CRR fell by 1.3 percentage points to 23.8% (25.1). Implementation of new PD models reduced the

common equity tier 1 ratio by 1.8 percentage points. The period's profit contributed 0.3 percentage points after a deduction for the dividend generated.

Overall, changed lending volumes and the impact of credit risk and volume migration had only a slight impact on the common equity tier 1 ratio.

The effect of IAS 19 increased the common equity tier 1 ratio by 0.5 percentage points, mainly due to higher asset values. The discount rate in Sweden was reduced to 2.30% (2.40).

Foreign exchange effects were marginal, and the net effect of other factors was -0.3 percentage points.

Economic capital and available financial resources

Handelsbanken's internal assessment of the capital requirement is based on the Bank's capital requirement, stress tests, and the Bank's model for economic capital (EC). Economic capital is measured in relation to the Bank's available financial resources (AFR). The Board stipulates that the AFR/EC ratio for the Group must exceed 120%. At the end of Q1, EC for the Group totalled SEK 60.4bn, while AFR was SEK 152.2bn.

Thus, the ratio between AFR and EC was 252%. For the parent company, EC totalled SEK 51.5bn, and AFR was SEK 128.3bn.

For the consolidated situation, EC totalled SEK 33.4bn, and AFR was SEK 151.5bn.

RATING

During Q1, Standard & Poor's changed their outlook for Handelsbanken to stable from negative. Otherwise, Handelsbanken's short-term and long-term ratings with the rating agencies which monitor the Bank were unchanged.

	Long-term	Short-term	Counterparty risk assessment
Standard & Poor's	AA-	A-1+	
Fitch	AA	F1+	
Moody's	Aa2	P-1	Aa1

* Internal income which is included in total income comprises income from transactions between other operating segments and Other. Since interest income and interest expense are reported net as income, this means that internal income includes the net amount of the internal funding cost between segments and Other.

The business segments consist of Handelsbanken Sweden, Handelsbanken UK, Handelsbanken Denmark, Handelsbanken Finland, Handelsbanken Norway, Handelsbanken the Netherlands and Handelsbanken Capital Markets. The income statements by segment include internal items such as internal interest,

commissions and payment for internal services rendered, primarily according to the cost price principle. The part of Handelsbanken Capital Markets' operating profit that does not involve risk-taking is allocated to branches with customer responsibility.

Handelsbanken Sweden

Handelsbanken Sweden comprises five regional banks, as well as Handelsbanken Finans's and Stadshypotek's operations in Sweden. At Handelsbanken, the branches are the base of all operations, with responsibility for all customers of the Bank. The regional banks offer a full range of banking services at 425 branches and meeting places throughout Sweden. Handelsbanken Finans offers finance company services and works through the Bank's branches.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit increased by 36% to SEK 3,148m (2,317). Adjusted for the staff cost provision of SEK -700m in Q1 2016, the increase was 4%.

Net interest income increased by 5% to SEK 3,946m (3,759). Fees for the Resolution Fund and the deposit guarantee rose by SEK 105m to -274m (-169), and the benchmark effect in Stadshypotek was SEK -8m (35). Growing lending volumes increased net interest income by SEK 120m and improved lending margins provided a further increase of SEK 52m. Deposit operations contributed SEK 29m in terms of volumes and SEK 7m as a result of improved margins. The remainder of the increase in net interest income was mainly due to lower funding costs.

Net fee and commission income increased by 5% to SEK 1,058m (1,004). The increase is mainly due to higher asset management and insurance commissions.

Net gains/losses on financial transactions grew by 11% to SEK 147m (132), mainly as a result of improved profits in foreign exchange business.

Total expenses decreased by 24% to SEK -1,954m (-2,564), chiefly as a result of last year's staff cost provision of SEK -700m. Adjusted for the provision, staff costs went down by 6% to SEK -856m (-906). The average number of employees fell by 9% to 4,006 (4,412). Expenses for services bought and sold internally increased by 20% to SEK -792m, mainly due to higher IT development costs and higher income from services sold in the quarter of comparison. The C/I ratio decreased to 35.8% (50.2)

Loan losses rose to SEK -60m (-24), and the loan loss ratio was 0.02% (0.01).

Business development

At the beginning of April, Kantar Sifo presented the 2017 Company Reputation Index. This shows the degree of trust and quality that the Swedish public attaches to different companies. As in previous years, Handelsbanken was the major bank in which the general public had the most confidence. Handelsbanken is the only bank among the ten companies with the best reputation in Sweden. In addition, confidence in the Bank increased and Handelsbanken was given an index value of 58 (54). This can be compared with the average for the other three major banks, which went down to 31 (35). During the first quarter, new savings in the Bank's mutual funds in Sweden amounted to SEK 5.6bn (7.6), corresponding to a market share of 23%.

The average volume of deposits from households rose by 9% to SEK 307bn (281). The average volume of mortgage loans to private individuals increased by 7% to SEK 714bn (667), while the average volume of lending to companies fell slightly to SEK 479bn (482).

During the first quarter, the Bank continued to adapt its branch operations, partly as a result of changed customer behaviour resulting from digitalisation. The business operations of 11 branches were merged with nearby larger branches. As a result, Handelsbanken had 415 branches (463) and 10 meeting places (11) in Sweden.

Q1 2017 COMPARED WITH Q4 2016

Operating profit decreased by 4% to SEK 3,148 (3,291) and the return on allocated capital was 13.6% (14.4).

Net interest income declined by 2%, or SEK 72m, to 3,946m (4,018). The reduction was entirely attributable to the fees for the Resolution Fund and the deposit guarantee increasing by SEK 110m to -274m (-164). The benchmark effect in Stadshypotek decreased to SEK -8m (37).

Increasing lending volumes had a positive impact of SEK 40m, which was offset by a SEK -47m negative effect caused by pressure on lending margins. Net interest income from deposit operations went down by SEK 2m.

The average volume of mortgage loans to private individuals grew by 1% to SEK 714bn (705). The gross margin on the mortgage portfolio – before advisory and administration expenses – was 1.06% (1.07).

The average volume of corporate lending increased by 1% to SEK 479bn (473).

Net fee and commission income fell by 4% to SEK 1,058m (1,102), due to lower payment commissions. This reduction was offset by increasing mutual fund management commissions.

Net gains/losses on financial transactions decreased to SEK 147m (184), chiefly as a result of reduced early repayment charges.

Expenses rose by 5% to SEK -1,954m (-1,860); this was entirely attributable to increasing costs for services bought and sold internally and the fact that the period of comparison had higher income from services sold. Staff costs decreased by 1% and the average number of employees fell by 3%, or 103, to 4,006 employees (4,109).

Loan losses decreased to SEK -60m (-180), and the loan loss ratio was 0.02% (0.06).

Handelsbanken UK

Handelsbanken UK comprises branch operations in five regional banks and the asset management company Heartwood. Handelsbanken Finans's operations in the UK are also included. At Handelsbanken, the branches are the base of all operations, with responsibility for all customers of the Bank. The regional banks offer banking services at 207 branches and meeting places throughout the UK.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit went down by 3% to SEK 521m (536). Exchange rate movements reduced operating profit by SEK -46m, and expressed in local currency, operating profit grew by 7%. Return on allocated capital was 12.8% (15.6).

Income decreased by 2%, due entirely to the depreciation of sterling. In local currency, income rose by 8%.

Net interest income went down by 3% to SEK 1,079m (1,116). Exchange rate movements reduced net interest income by SEK -95m, but expressed in local currency, net interest income grew by 6%. Both lending and deposit margins are under pressure and the underlying growth was entirely attributable to increased business volumes. Increased lending volumes contributed SEK 86m, and deposit volumes contributed SEK 27m. Lower lending margins negatively affected net interest income by SEK -41m and deposit margins by SEK -6m. Government fees which affect net interest income rose to SEK -45m (-22).

Net fee and commission income increased by 18% to SEK 140m (119). In local currency, the increase was 30%, mainly due to higher payment and asset management commissions.

Net gains/losses on financial transactions decreased to SEK 46m (50).

Expenses rose by 3% to SEK -731m (-712). In local currency, expenses were up by 12%, as a result of expanding operations.

The average number of employees grew by 4% to 1,991 (1,912).

Loan losses went down to SEK -12m (-41), and the loan loss ratio fell to 0.02% (0.08).

Business development

Business volumes continued to grow. During the year, the average volume of deposits from households climbed by 60%, while lending to households grew by

12% compared with Q1 2016. Overall, the average volume of lending increased by 11% to GBP 17.6bn, while total deposits grew by 26% to GBP 11.1bn. The loan-to-deposit ratio continued to decrease and at the end of Q1 was 158%, compared with 180% in the corresponding quarter of 2016.

The assets managed by Heartwood totalled GBP 3.1bn, as compared to GBP 2.9bn at the year-end.

The number of branches and meeting places in the UK was unchanged at 207.

Q1 2017 COMPARED WITH Q4 2016

Operating profit rose by 10% to SEK 521m (472), chiefly due to lower loan losses. Exchange rate effects reduced operating profit by SEK 6m. Return on allocated capital was 12.8% (13.1).

Income went down by 4% till SEK 1,265m (1,320). Net interest income decreased by 3%, or SEK -32m, to SEK 1,079m (1,111), of which SEK -16m was attributable to exchange rate effects, SEK -21m to there being fewer days in the quarter, and SEK -20m to increased expenses to the Swedish Resolution Fund. Adjusted for these three items, net interest income increased by 2%. Increasing business volumes had a positive impact of SEK 31m while lower lending and deposit margins reduced net interest income by SEK -10m.

Net fee and commission income declined to SEK 140m (147), mainly as a result of lower payment commissions.

Net gains/losses on financial transactions decreased to SEK 46m (59), due to a lower result in the foreign exchange business.

Expenses fell by 6% to SEK -731m (-775). The decrease was chiefly due to temporarily higher expenses in the quarter of comparison. Exchange rate effects reduced expenses by SEK 12m. The average number of employees rose to 1,991 (1,980).

Loan losses decreased to SEK -12m (-73), and the loan loss ratio was 0.02% (0.15).

Handelsbanken Denmark

Handelsbanken Denmark consists of the branch operations in Denmark, which are organised as a regional bank, as well as Stadshypotek's operations in Denmark. At Handelsbanken, the branches are the base of all operations, with responsibility for all customers of the Bank. The regional bank offers a full range of banking services at 57 branches throughout Denmark.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit rose by 10% to SEK 270m (246), chiefly due to lower loan losses. Return on allocated capital was 14.4% (13.7).

Net interest income increased by 2% to SEK 417m (409). Adjusted for exchange rate movements, net interest income was more or less unchanged. Increasing lending volumes had a positive impact of SEK 24m, although this was offset by lower lending margins which reduced net interest income by SEK -16m. Deposit margins remained unchanged and higher deposit volumes increased net interest income by SEK 1m.

Fees for the Swedish Resolution Fund and the deposit guarantee increased by SEK 7m, burdening net interest income by SEK -19m (-12).

Net fee and commission income rose by 10% to SEK 108m (98). The increase is mainly attributable to higher brokerage income and increased asset management commissions as a consequence of high customer activity.

Net gains/losses on financial transactions increased to SEK 24m (17) due to higher profits in the foreign exchange business.

Expenses rose by 5% to SEK -288m (-275). Adjusted for the effect of exchange rate movements, the increase was 3%.

Loan losses were SEK -4m (-6), and the loan loss ratio decreased to 0.02% (0.03).

Business development

The Bank continued to have a stable inflow of new customers, and business volumes continued to increase. During the year, the average volume of lending to households increased by 11%, while deposits from households grew by 8%. Corporate lending increased by 3%, while corporate deposits grew by 8%. The average volume of lending rose by 8% to DKK 73.0bn (67.8), while deposits increased by 8% to DKK 30.7bn (28.4).

Q1 2017 COMPARED WITH Q4 2016

Operating profit rose to SEK 270m (-236), due to lower loan losses. Profit before loan losses increased by 11% to SEK 268m (241), chiefly due to lower expenses.

Net interest income went down by 7% to SEK 417m (447). Adjusted for exchange rate effects of SEK -10m, a day effect of SEK -7m, and a SEK -10m increase in government fees, the decrease was 1%. Higher lending volumes boosted net interest income by SEK 5m, while lending margins reduced net interest income by almost SEK 2m. Net interest income from deposits grew by nearly SEK 2m.

Net fee and commission income increased by 14% to SEK 108m (95). The increase is partly attributable to higher brokerage income and increased asset management commissions as a consequence of high customer activity.

Net gains/losses on financial transactions rose to SEK 24m (21).

Expenses decreased by 11% to SEK -288m (-325); this was partly due to high other expenses in the comparison quarter, relating to an organisational change. Staff costs fell by 6%. Exchange rate effects reduced expenses by SEK 7m.

Loan losses decreased to SEK -4m (-478). Underlying credit quality is deemed to have remained good. The loan loss ratio fell to 0.02% (2.26).

Handelsbanken Finland

Handelsbanken Finland consists of the branch operations in Finland, which are organised as a regional bank, as well as Handelsbanken Finans's and Stadshypotek's operations in Finland. At Handelsbanken, the branches are the base of all operations, with responsibility for all customers of the Bank. The regional bank offers a full range of banking services at 45 branches throughout Finland. Handelsbanken Finans offers finance company services and works through the Bank's branches.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit increased by 16% to SEK 213m (183). Exchange rate effects increased profits by SEK 4m. Return on allocated capital was 12.4% (11.2).

Income fell by 1%. Net interest income declined by 8% to SEK 292m (318). The decrease was entirely due to lower lending margins which negatively affected net interest income by SEK 36m. Government fees to the Resolution Fund and the deposit guarantee reduced net interest income by SEK -27m (-14).

Net fee and commission income grew by 22% to SEK 113m (93), due to higher payment commissions, and net gains/losses on financial transactions increased to SEK 14m (13).

Total expenses decreased by 4% to SEK -213m (-221). Adjusted for movements in exchange rates, total expenses declined 2%. Staff costs rose by 4%, with half of this increase attributable to exchange rate movements. The average number of employees decreased slightly to 482 (489).

Loan losses consisted of net recoveries on loan losses and equalled SEK 3m (-23). The loan loss ratio was -0.01% (0.08).

Business development

The average volume of deposits from households was 18% more than in the corresponding period of the previous year, while lending to households grew by 2%.

The average volume of corporate deposits climbed by 35% while corporate lending grew by 2% compared with the corresponding period in the previous year.

Q1 2017 COMPARED WITH Q4 2016

Operating profit decreased by 10% to SEK 213m (236) due in part to higher net recoveries on loan losses in the preceding quarter. Adjusted for negative exchange rate effects of SEK 4m, operating profit fell by 8%.

Net interest income decreased to SEK 292m (302). Adjusted for exchange rate effects, fewer days in the quarter and increased government fees, net interest income rose by 5%.

Net fee and commission income declined by 3% to SEK 113m (116), which was entirely attributable to the strengthening of the Swedish krona.

Net gains/losses on financial transactions decreased to SEK 14m (21) as a result of more customer activity in foreign exchange business during the quarter for comparison.

Expenses fell by 3% to SEK -213m (-220). Adjusted for exchange rate movements, expenses in local currency terms fell by 6%, which was partly due to expenses in the fourth quarter associated with the relocation of the head office.

Loan losses consisted of net recoveries and totalled SEK 3m (14). The loan loss ratio was -0.01% (-0.05).

Handelsbanken Norway

Handelsbanken Norway consists of the branch operations in Norway, which are organised as a regional bank, as well as Handelsbanken Finans's and Stadshypotek's operations in Norway. At Handelsbanken, the branches are the base of all operations, with responsibility for all customers of the Bank. The regional bank offers a full range of banking services at 49 branches throughout Norway. Handelsbanken Finans offers finance company services and works through the Bank's branches.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit increased by 69% to SEK 833m (492). It was affected by a non-recurring item which reduced staff costs by SEK 206m, as a result of the transition to a defined contribution pension plan in the Norwegian operations. Lower loan losses and exchange rate movements also had a positive impact on profit, and, expressed in local currency and adjusted for the items mentioned above, profit before loan losses increased by 5%.

Return on allocated capital was 15.9% (12.0).

Adjusted for exchange rate effects, income rose by 6%. Net interest income increased by SEK 116m, or 15%, to SEK 885m (769), of which SEK 57m was attributable to exchange rate movements. Lending margins rose by SEK 27m, while increased lending volumes had a positive effect of SEK 12m on net interest income. Improved deposit margins positively affected net interest income by SEK 9m. The fees for the Swedish Resolution Fund and the deposit guarantee reduced net interest income by SEK -49m (-27).

Net fee and commission income increased by 23% to SEK 103m (84). Adjusted for exchange rate movements, net fee and commission income rose by 14%, chiefly due to higher payment and fund management commissions.

Net gains/losses on financial transactions decreased by 29% to SEK 27m (38). The decrease was chiefly attributable to capital gains in the period of comparison related to the sale of Visa Europe.

Adjusted for the above-mentioned transition to a defined contribution pension plan, staff costs rose by SEK 28m, or 17%, of which SEK 13m was attributable to exchange rate movements. The new financial sector tax in Norway – a 5% charge payable on wage costs – had an impact of SEK -8m on staff costs. Adjusted for these effects, staff costs increased by 4% compared to the corresponding period in the previous year. The average number of employees declined marginally to 662 (665).

Loan losses decreased to SEK -46m (-103), and the loan loss ratio was 0.08% (0.20).

Business development

Business volumes continued to grow during the first quarter. The average volume of deposits from households climbed by 5% compared to the corresponding period in the previous year, while lending to households grew by 4%. The average volume of corporate lending increased by 5%, while corporate deposits grew by 20%.

In total, the average volume of lending rose by 5% to NOK 233.8bn (223.7), while total deposits rose by 15% to NOK 68.4bn (59.4).

After two branches in Bergen were merged, the number of branches in Norway was 49 (50) at the end of the quarter.

Q1 2017 COMPARED WITH Q4 2016

Operating profit increased by SEK 229m, or 38%, to SEK 833m (604), of which SEK 206m was due to the transition to a defined contribution pension plan. Exchange rate movements had a negative impact of SEK 9m on operating profit. Adjusted for both these effects, operating profit rose by just over 5%, which was entirely due to lower loan losses.

Net interest income declined by 5%, or SEK 48m, to SEK 885m (933). Exchange rate effects had a negative impact of SEK 15m, and two days less in the quarter had a negative impact on net interest income of SEK 17m. The fee for the Swedish Resolution Fund and the deposit guarantee increased by SEK 30m. Adjusted for these three items, net interest income increased by 2%. Higher lending margins contributed SEK 16m and higher deposit margins SEK 7m.

Net fee and commission income decreased to SEK 103m (107), primarily due to lower payment commissions.

Net gains/losses on financial transactions increased to SEK 27m (21), chiefly as a result of higher profits in foreign exchange business.

Expenses decreased by SEK 215m to SEK -140m (-355). Adjusted for the non-recurring item that reduced staff costs by SEK 206m and exchange rate effects of SEK -7m, expenses were largely unchanged.

Loan losses decreased to SEK -46m (-107), and the loan loss ratio was 0.08% (0.20).

Handelsbanken the Netherlands

Handelsbanken the Netherlands consists of the branch operations in the Netherlands, which are organised as a regional bank, as well as asset management operations in Optimix Vermogensbeheer. The regional bank offers banking services at 26 branches throughout the Netherlands.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit grew by 75% to SEK 49m (28), chiefly as a result of business volumes continuing to increase. Income rose by 58%, while expenses went up by 49%. Return on allocated capital was 12.0% (9.8).

Net interest income increased by 32% to SEK 125m (95). Increasing lending volumes contributed SEK 32m, while declining lending margins reduced net interest income by SEK -4m. Deposit margins remained unchanged.

Net fee and commission income increased to SEK 32m (5), predominantly due to the acquisition of the Optimix asset management company, which has been a part of Handelsbanken the Netherlands since 1 September 2016 and made a contribution of SEK 27m.

Expenses rose by 49% to SEK -109m (-73), as a result of the continuing expansion, including the acquisition of the Optimix asset management company. The C/I ratio improved to 68.1% (72.3) and the average number of employees increased by 43% to 259 (181).

Loan losses amounted to SEK -2m (0), and the loan loss ratio was 0.02% (0.00).

Business development

The average volume of lending to households grew by 44% to EUR 1,780m (1,238), while deposits from households increased by 47% to EUR 78m (53). Corporate lending went up by 33% to EUR 1,695m (1,273). The average volume of deposits from companies rose to EUR 768m (408). Business volumes with small and medium-sized companies continued to grow.

During the first quarter, the Bank opened one new branch, bringing the total of Handelsbanken branches in the Netherlands to 26.

In April 2016, Handelsbanken signed an agreement to acquire the Dutch asset management company, Optimix. The company is mainly active within discretionary asset management, with assets under management of EUR 2bn, including its own mutual funds.

Q1 2017 COMPARED WITH Q4 2016

Operating profit went down by 33% to SEK 49m (73).

Income fell by 11% to SEK 160m (180). Net interest income was virtually unchanged at SEK 125m (126).

Net fee and commission income decreased by SEK 17m to SEK 32m (49). The 2016 full-year figure for performance fees within Optimix came in at the year-end, amounting to SEK 15m in the comparison quarter.

Expenses rose by SEK 2m, or 2%, to SEK -109m (-107); this was attributable to a SEK 2m increase in staff costs. The average number of employees increased to 259 (245).

Loan losses were SEK -2m (0), and the loan loss ratio was 0.02% (0.00).

Handelsbanken Capital Markets

Handelsbanken Capital Markets consists of Markets & Asset Management, Pension & Life, Handelsbanken International and Business Support. It has employees in 21 countries.

Markets & Asset Management offers a full range of products and services linked to risk management, securities, derivatives, mutual funds, research, debt capital markets and corporate finance, as well as co-ordinating the Bank's offering in the savings area.

Pension & Life comprises the Handelsbanken Liv subsidiary and offers pension solutions and other insurance solutions for private and corporate customers.

Handelsbanken International encompasses the Bank's branches and representative offices in 16 countries outside the Bank's home markets, as well as the units for Financial Institutions (global banking collaborations) and Transaction Banking (cash management, trade finance and export finance).

A large part of the income from Handelsbanken Capital Markets' products, including asset management commissions and income from currency conversions, is booked directly in branch operations at the branch with customer responsibility, and is thus not included in the income statement below.

For more financial information about the different business areas within Handelsbanken Capital Markets, please see the Fact Book that is available at handelsbanken.se/ireng.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Financial performance

Operating profit increased by 37% to SEK 501m (365). Total income grew by 12% to SEK 1,342m (1,197), mainly as a result of net gains/losses on financial transactions increasing to SEK 399m (240). Net fee and commission income grew by 5% to SEK 782m (742), driven mainly by higher mutual fund commissions.

Total expenses decreased by 9% to SEK -766m (-842). The decrease was mainly attributable to staff costs falling by 11% to SEK -544m (-610), partly as a result of a 4% fall in the average number of employees to 1,643 (1,720).

Loan losses amounted to SEK -75m (10), corresponding to a loan loss ratio of 0.67% (-0.08).

Business development

Asset management operations continued to show a strong performance. Net savings in Handelsbanken's mutual funds in Sweden during the quarter amounted to SEK 5.6bn, corresponding to a market share of 23%. Net savings elsewhere in the Nordic region showed strong growth, increasing to SEK 1.6bn. Total net savings in the Group's funds amounted to SEK 7.9bn. Xact Kapitalförvaltning remained the largest player as regards Nordic exchange-traded funds.

The total fund volume, including exchange-traded funds, increased by 5.6% from the beginning of the year to SEK 449bn (425). Total assets under management in the Group rose during the same period by 4.8% to SEK 568bn (542).

Morningstar, a mutual fund research company, ranked Handelsbanken's equity funds highest of the Nordic banks when it evaluated the 30 largest fund managers on the Swedish market. In addition, during the quarter, Lipper Fund Awards ranked four of the Bank's funds as the best in their respective categories.

The Pension & Life business area showed positive performance, with its fee and commission income increasing. The volume of assets under management by Handelsbanken Liv grew to SEK 128bn (123).

The Bank's investments in the Transaction Banking area are generating higher customer satisfaction, and Global Finance Magazine named Handelsbanken as the "Best Trade Finance Provider 2017 in Sweden."

The Bank's business volumes in terms of capital market funding also showed strong performance. The Bank arranged a total of 37 bond issues during the quarter for a value of EUR 5.4bn.

The average volume of lending in Handelsbanken International, i.e. the operations outside the Bank's home markets, was unchanged from the corresponding period of the previous year at SEK 35.3bn (35.3). During the same period, deposits rose by 1% to SEK 41.0bn (40.7).

Q1 2017 COMPARED WITH Q4 2016

Operating profit rose by 84% to SEK 501m (272), due to higher income and lower expenses, although loan losses were higher. Total income increased by 18% to SEK 1,342m (1,136), due to higher net gains/losses on financial transactions. Net profits in the comparison quarter had been negatively impacted by market turbulence at year-end. A positive counter-effect came at the beginning of the first quarter, when the market normalised again.

Total expenses decreased by 11% to SEK -766m (-856), largely due to seasonally higher costs in the comparison quarter. Staff costs decreased by 6%, partly due to lower variable remuneration. The average number of employees was 1,643 (1,636).

Loan losses were SEK -75m (-8), which corresponds to a loan loss ratio of 0.67% (0.07).

Other units not reported in the business segments

Reported below are the income and expenses related to Treasury and the central staff functions, and also provisions to the Oktogonen profit-sharing foundation. Capital gains/losses, dividends, and other income and expenses that are not attributable to any of the segments are also reported here.

JANUARY – MARCH 2017 COMPARED WITH JANUARY – MARCH 2016

Operating profit in other units not reported in the business segments amounted to SEK -122m (854). The provision for Oktogonen profit-sharing foundation was resumed in the first quarter and amounted to SEK 243m (-). Capital gains from the sale of shares totalling SEK 812m were included in the comparison period. The average number of employees was 1,930 (1,830), chiefly due to increased activity in IT development.

Q1 2017 COMPARED WITH Q4 2016

Operating profit declined to SEK -122m (215). The provision for Oktogonen profit-sharing foundation was resumed in the first quarter and amounted to SEK 243m (-). The average number of employees totalled 1,930 (1,879).

Earnings per share after dilution are calculated by taking into account the effects of a conversion of outstanding convertible debt instruments. This means that the average number of shares is adjusted by potential shares and that the period's earnings are adjusted by the period's interest expense on the outstanding convertible debt instruments after tax.

For the January to March 2017 period, other comprehensive income totalled SEK 969m (1,908) after tax. In individual periods, the results of all items within other comprehensive income may fluctuate due to changes in the discount rate, exchange rates and inflation.

At year-end, net pensions (the net of pension obligations and plan assets) were a liability. At the end of the quarter, net pensions were an asset. This had a positive impact on Other comprehensive income of SEK 1,807m after tax (1,173). The main reason for the change during the period is that the plan assets have increased since 31 December 2016. This has been offset to a certain extent by the pension obligations increasing as a result of a decrease in the discount rate for the Swedish pension obligations, to 2.30% from 2.40% since 31 December 2016. Another reason for the change was a reversal of pension obligations in Norway, due to the transition to a defined contribution pension plan.

Most of the Group's long-term funding is hedged using derivatives, where all cash flows are matched until maturity. Cash flow hedging manages the risk of variations in the cash flows related to changes in variable interest rates and currencies on lending and funding. The underlying funding and the asset which is being funded are measured at amortised cost, while the derivatives which are hedging these

items are measured at market value. The impact on profit/loss of the market valuation is reported under Cash flow hedges. Over time, these values become zero at maturity for each individual hedge, but lead to volatility in other comprehensive income during their term. Changes in the value of hedge derivatives in cash flow hedges had an effect on other comprehensive income of SEK 262m (2,750) after tax. The value changes derived partly from exchange rate movements, but above all from decreasing discount rates in foreign currency. During the period, SEK -4m (-2) was reclassified to the income statement as a result of ineffectiveness.

Unrealised changes in the value of financial assets classified as available for sale had an effect on other comprehensive income of SEK 35m (-1,043) after tax during the year. The preceding year's negative result was mainly due to gains from selling shares having been recognised in the income statement.

Unrealised exchange rate effects related to the restatement of foreign branches and subsidiaries to the Group's presentation currency and the effect of hedging of net investments in foreign operations have affected other comprehensive income by SEK -1,135m (-972) after tax during the year.

NOTES

Note 1 Accounting policies

Accounting policies

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting. The consolidated accounts have been prepared in accordance with international financial reporting standards (IFRS) and interpretations of these standards as adopted by the EU. The accounting policies also follow the Swedish Annual Accounts Act for Credit Institutions and Securities Companies (1995:1559), and the regulations and general guidelines issued by the Swedish Financial Supervisory Authority, FFFS 2008:25 Annual reports in credit institutions and securities companies. RFR 1 Supplementary accounting rules for groups as well as statements from the Swedish Financial Reporting Board are also applied in the consolidated accounts.

The interim report for the parent company has been prepared in accordance with the Swedish Annual Accounts Act for Credit Institutions and Securities Companies, and the regulations and general guidelines issued by the Swedish Financial Supervisory Authority, FFFS 2008:25 Annual reports in credit institutions and securities companies. The parent company also applies RFR 2 Accounting for legal entities, as well as statements issued by the Swedish Financial Reporting Board.

The interim report of the Group and the parent company has been prepared in accordance with the same accounting policies and calculation methods that were applied in the annual report for 2016.

Future amendments to regulations

IFRS 9 Financial Instruments, which is to replace IAS 39 Financial Instruments: Recognition and Measurement, has been adopted for application by the EU. The standard will be applied as of the 2018 financial year. The standard encompasses three areas: classification and measurement, impairment, and general hedge accounting. The forthcoming regulations on impairment are based on expected loan losses, and not on incurred loan losses as in the current IAS 39 regulations. The provisions will also be based on a probability-weighted outcome, unlike the current IAS 39 where the provision is based on the most expected outcome. All in all, in the transition to IFRS 9, this will entail higher provisions for loan losses. This regulatory change may lead to an adjustment of equity. It is still unclear how these effects will be dealt with as regards the relationship between the expected loan loss provisions in accounting terms and the expected loan losses in capital adequacy terms. The Bank is currently analysing the financial effects of the new standard in more detail.

IFRS 15 Revenue from Contracts with Customers has also been adopted for application in the EU. The standard will be applied as of the 2018 financial year. The current assessment is that the new standard will not have any material impact on Handelsbanken's financial reports, capital adequacy or large exposures.

IFRS 16 Leases has also been published by the IASB. Assuming that IFRS 16 is adopted by the EU, and the date of implementation proposed by the IASB is not changed, this standard will be applied as of the 2019 financial year. The Bank is analysing the financial effects of the new standard.

None of the other changes in the accounting regulations issued for application are expected to have any material impact on Handelsbanken's financial reports, capital adequacy, large exposures or other circumstances under the applicable operating rules.

Impaired loans

Impaired loans includes all loans in respect of which all contracted cash flows will probably not be fulfilled. The full amount of all loans which give rise to a specific provision is included in impaired loans, including amounts which are covered by collateral. This means that the impaired loans reserve ratio is stated without taking into account collateral received. Thus, this key figure may vary substantially between the quarters, even though the provisioning policies are unchanged.

SEK m	31 Mar 2017	31 Dec 2016	30 Sep 2016	30 Jun 2016	31 Mar 2016

Derivative contracts are presented gross in the table. Amounts set off on the balance sheet consist of the set-off market value of contracts for which the Bank has the legal right and intention to settle contractual cash flows net (including cleared contracts). These contracts are presented on a net basis on the balance sheet per counterparty and currency.

Net amount	7,288	-	7,288

Derivative instruments are set off on the balance sheet when the settlement of two or more derivatives reflects the Bank's anticipated cash flows. Repurchase agreements and reverse repurchase agreements with central counterparty clearing houses are set off on the balance sheet when this reflects the Bank's anticipated cash flows in the settlement of two or more agreements. This occurs when the Bank has both a contractual right and intention to settle the agreed cash flows with a net amount. The remaining counterparty risk in derivatives is reduced through netting agreements if payments are suspended, i.e. netting positive values against negative values in all derivative transactions with the same counterparty in a bankruptcy situation. Handelsbanken's policy is to sign netting agreements with all bank counterparties. Netting agreements are supplemented with agreements for issuing collateral for the net exposure. The collateral used is mainly cash, but government securities are also used. Collateral for repurchase agreements and borrowing and lending of securities is normally in the form of cash or other securities.

The amount set off for derivative assets includes set-off cash collateral of SEK 2,724m (3,565), derived from the balance sheet item Deposits and borrowing from the public. The amount set off for derivative liabilities include set-off cash collateral of SEK 2,655m (2,367), derived from the balance sheet item Loans to the public.

Valuation process

The risk control function checks that the Group's financial instruments are correctly valued. As far as is possible, the valuations are based on externally generated data.

Financial instruments for which price information is easily available, and which are representative of real and frequently occurring transactions, are valued at their current market price. The current bid price is used for financial assets and the current ask price is used for financial liabilities. For groups of financial instruments which are managed on the basis of the Bank's net exposure to market risk, the current market price is presumed to be the same as the price which would be received or paid if the net position were divested.

For financial instruments where there is no reliable information about market prices, fair value is established using valuation models. These models can, for example, be based on price comparisons, present value calculations or option valuation theory depending on the nature of the instrument.

Valuation hierarchy

In the tables, financial instruments at fair value have been categorised in terms of how the valuations have been carried out and the extent of market data used in the valuation. The categorisation is shown as

levels 1–3 in the tables. Financial instruments which are valued at the current market price are categorised as level 1. These financial instruments mainly comprise government instruments and other interest-bearing securities that are traded actively, listed shares and short-term positions in corresponding assets. Level 1 also includes the majority of shares in mutual funds and other assets which are related to unit-linked insurance contracts and similar agreements and the corresponding liabilities. Financial instruments which are valued using valuation models which substantially are based on market data are categorised as level 2. Level 2 mainly includes interest-bearing securities and interest- and currency-related derivatives. Financial instruments whose value to a material extent is affected by input data that cannot be verified using external market information are categorised as level 3.

The categorisation is based on the valuation method used on the balance sheet date. If the category for a specific instrument has changed since the previous balance sheet date (31 December 2016), the instrument has been moved between the levels in the table. During the period January–March 2017, some of the volumes were moved between level 1 and level 2, as a result of a new assessment of market activity. On the assets side, interest-bearing securities worth SEK 582m and shares worth SEK 20m were transferred from

level 2 to level 1. Interest-bearing securities worth SEK 216m, shares worth SEK 9m, and derivatives worth SEK 5m were transferred from level 1 to level 2. On the liabilities side, derivatives to the value of SEK 5m were transferred from level 2 to level 1. Derivatives worth SEK 5m and short-term positions worth SEK 24m were moved from level 1 to level 2.

The holdings in level 3 mainly comprise unlisted shares and holdings in private equity funds. Holdings in private equity funds are valued using valuation models mainly based on a relative valuation of comparable listed companies in the same sector. The performance measurements used in the comparison are adjusted for factors which distort the comparison between the investment and the company used for comparison. Subsequently, the valuation is based on earnings multiples, e.g. P/E ratios. Most of these holdings represent investment assets in the Group's insurance operations. Value changes on the investment assets are included in the basis for calculating the yield split in the insurance operations and are therefore not reported directly in the income statement.

The Group's holdings of unlisted shares consist mainly of the Bank's participating interests in various types of jointly owned operations which are related to the Bank's business. For example, these may be participating interests in clearing organisations and infrastructure collaboration on Handelsbanken's home markets. In general, such holdings are valued at the Bank's share of the company's net asset value, or alternatively at the price of the last completed transaction. In all material respects, unlisted shares are classified as available for sale. Value changes for these holdings are thus reported in other comprehensive income.

Differences between the transaction price and the value measured by a valuation model

The models use input data in the form of market prices and other variables that are deemed to affect pricing. The models and input data which form the basis of the valuations are regularly validated to ensure that they are consistent with market practice and established financial theory. In cases where there are material positive differences between the value calculated with the help of a valuation model at initial recognition and the transaction price (day 1 gain/loss), the difference is distributed over the maturity period of the instrument. Such differences occur when the applied valuation model does not fully capture all the components which affect the value of the instrument.

As a consequence of the application of this principle, SEK 30m (43) was recognised in net gains/losses on financial transactions during the January–March 2017 period. At the end of the period, non-recognised day 1 gains/losses amounted to SEK 584m; at the year-end, the corresponding figure was SEK 585m.

The Bank regularly conducts separate valuations of the total credit risk component (own credit risk as well as counterparty risk) in outstanding model-valued derivatives. Changes in fair value due to changed credit risk are recognised in profit/loss to the extent that the overall effect exceeds non-recognised day 1 gains/losses.

Note 18 Own funds and capital requirements in the consolidated situation

The requirements for the calculation of own funds and capital requirements are regulated in Regulation (EU) No 575/2013 (CRR) and Directive 2013/36/EU, which comprise the EU's implementation of the international Basel III regulations. All references to CRR in this interim report refer to these regulations in their entirety, regardless of legislative form (regulation, directive, executive decree or national implementation). Figures reported in this section refer to the minimum capital requirements under Pillar 1 and meet the requirements for publication of information relating to capital adequacy in CRR Part Eight, as well as in the Swedish Financial Supervisory Authority's regulation FFFS 2014:12.

* The foundation approach means the IRB approach without own estimates of LGD and CCF. The advanced approach means the IRB approach with own estimates of LGD and CCF.

The capital requirement for credit risk is calculated according to the standardised approach and the IRB Approach in accordance with CRR. There are two different IRB Approaches: the IRB Approach without own estimates of LGD and CCF, and the IRB Approach with own estimates of LGD and CCF.

In the IRB Approach without own estimates of LGD and CCF, the Bank uses its own method to determine the probability of the customer defaulting within one year (PD), while the other parameters are set out in CRR rules. In the IRB Approach with own estimates of LGD and CCF, the Bank uses its own methods to calculate the loss given default (LGD) and the exposure amount.

Handelsbanken uses the IRB approach without own estimates of LGD and CCF for exposures to institutions and for certain product and collateral types for corporate exposures in the whole of the regional banking operations and in the following subsidiaries: Stadshypotek AB, Handelsbanken Finans AB, Handelsbanken Finans (Shanghai) Financial Leasing Co. Ltd and Rahoitus Oy.

The IRB Approach with own estimates of LGD and CCF is applied to the majority of exposures to large corporates, medium-sized companies, property companies and housing co-operative associations in regional bank operations (excluding the Netherlands), Handelsbanken Capital Markets, Stadshypotek AB and Handelsbanken Finans AB, and retail exposures in Sweden, Norway, Finland and Denmark, as well as in the subsidiaries Stadshypotek AB, Handelsbanken Finans AB and Rahoitus Oy.

At the end of Q1, the IRB Approach was applied to 81% of the total risk-weighted exposure amount for credit risk. For the remaining credit risk exposures, the capital requirement is calculated using the standardised approach.

Repos and securities loans for institutions are reported separately in the Credit risk exposures approved for the IRB Approach table, since they give rise to very low capital requirements, while the volumes vary considerably over time. The low capital requirement is due to the exposure being reported gross and being secured.

The total average risk weight for exposures approved for the IRB Approach increased during the quarter and amounted to 15.6% (14.3). The increase in the average risk weight is attributable to the updating of PD estimates for corporates, based on a new model that was approved during the quarter by the Swedish Financial Supervisory Authority.

Credit quality is good. Of Handelsbanken's corporate exposures, 97% were customers with a repayment capacity assessed as normal or better than normal, i.e. with a rating grade between 1 and 5 on the Bank's ten-point risk rating scale. The IRB Approach is based on historical losses from both the financial crisis of recent years and the Swedish banking crisis in the early 1990s. These risk weights reflect the fact that Handelsbanken has reported low loan losses over a long period. The risk measurements applied contain margins of conservatism to ensure that the risk is not underestimated.

The level of the risk weight in the corporate exposures reflects the portfolio composition and how various loans are classified into different exposure classes.

The capital requirement for equity exposures in the IRB Approach is calculated according to a simplified risk weight method.

Total capital requirement for market risks	936	873	817	711	796

The capital requirement for market risks is calculated for the Bank's consolidated situation. The capital requirement for interest rate risks and equity price risks is, however, only calculated for positions in the trading book. When calculating the capital requirement for market risks, the standardised approach is applied.

Capital requirement operational risks

Handelsbanken uses the standardised approach, to calculate the capital requirement for operational risk. According to the standardised approach, the capital requirement is calculated by multiplying a factor specified in the regulations by the average operating income during the last three years of operation. Different factors are applied in different business segments.

Leverage ratio

The provisions of CRR include a reporting requirement regarding a non risk-based leverage ratio. The measurement is to undergo evaluation and no decision to make it mandatory has yet been taken.

Information in Note 19 relates to Handelsbanken's material risks and capital requirements at the time that this interim report is published. A full description of the Bank's risk and capital management can be found in Handelsbanken's Annual Report and in Handelsbanken's Risk and Capital Management – Information according to Pillar 3.

Note 19 Risk and liquidity

Figures reported in this section meet the requirements for publication of information relating to risk and capital management in CRR Part Eight.

Risk and uncertainty factors

Handelsbanken provides credit through its branch operations, exercising a low risk tolerance. The credit process is based on the conviction that a decentralised organisation with local presence ensures high quality in credit decisions. Handelsbanken's exposure to market risks is also low. Essentially, market risks in the banking operations are only taken as part of meeting customers' investment and risk management needs. During the past few years, the Bank has worked actively to reduce the market risks on its balance sheet. One result of this is that a much smaller part of the Bank's earnings comes from net gains/losses on financial transactions.

The situation with regard to regulatory developments continues to evolve rapidly. The UK's decision to leave the EU means there is uncertainty regarding the regulations that will apply to the Bank's British operations. The Bank is preparing for the implementation of Brexit in close consultation with public authorities in both Sweden and the UK. The Bank's low tolerance of risk, sound capitalisation and strong liquidity situation mean that Handelsbanken is also well-equipped to operate under substantially more difficult market conditions than those experienced during the last few years. The Bank's liquidity position is described in more detail below under the heading Liquidity and funding.

Liquidity and funding

Handelsbanken has a strong liquidity position. For many years, the Bank has actively worked with liquidity measures and has adopted a conservative approach. Part of this work has involved centralising liquidity management with the purpose of strengthening control of the liquidity risks and of guaranteeing and optimising the Bank's funding in all scenarios.

For many years, the Bank has worked on extending the maturities of its funding by increasing bond issues and ensuring that liquidity risks are included in internal pricing. Handelsbanken's funding programme covers the maturities in all currencies that the Bank needs to fund its lending and enables the Bank to issue in all currencies of relevance to the Bank.

The table shows holdings of bonds and other interest-bearing securities in the time intervals in which they can be converted to liquidity if they are pledged as collateral or sold. This means that the table does not reflect the actual maturities for the securities included.

In "Other", assets and liabilities are reported as maturing in the time intervals that correspond to the contractual maturity dates, taking into account contractual amortisation plans.

Sight deposits are reported under "Unspecified maturity". "Other" includes market values in derivative transactions.

For maturity tables in SEK, EUR and USD, please see the Fact Book which is available at handelsbanken.se/ireng.

Liquidity coverage ratio (LCR)

USD	236	322	164	121	161
Total*	148	126	162	139	151

* In accordance with the Swedish Financial Supervisory Authority's directive FFFS 2012:6.

	31 Mar 2017	31 Dec 2016	30 Sep 2016	30 Jun 2016	31 Mar 2016
Liquidity coverage ratio (LCR) - decomposition, SEK m					
Liquid assets	606,507	290,058	416,189	433,824	360,481
Liquid assets level 1	565,626	251,189	375,318	394,887	318,791
Liquid assets level 2	40,881	38,869	40,871	38,937	41,690
Cash outflows	489,050	359,659	514,967	697,349	581,222
Deposits from customers	220,330	173,496	191,610	169,582	192,835
Market funding	228,791	151,735	284,083	486,320	349,721
Other cash flows	39,929	34,428	39,274	41,447	38,666
Cash inflows	79,554	129,176	258,526	384,619	342,332
Inflows from maturing lending to non-financial customers	22,186	21,146	18,618	26,985	24,548
Other cash inflows	57,368	108,030	239,908	357,634	317,784

The components are defined in accordance with the Swedish Financial Supervisory Authority's regulations and requirements for the liquidity coverage ratio and reporting of liquid assets and cash flows (FFFS 2012:6). Liquid assets level 1 corresponds to Chapter 3, Section 6. Liquid assets level 2 corresponds to Chapter 3, Section 7. Deposits from customers corresponds to Chapter 4, Sections 4-9. Market funding corresponds to Chapter 4, Sections 10-13. Other cash flows corresponds to Chapter 4, Sections 14-25. Loans to non-financial customers corresponds to Chapter 5, Section 4. Other cash inflows corresponds to Chapter 5, Sections 6-12.

As of 1 October 2015, due to the European Commission's delegated act, there is a European minimum requirement for banks' liquidity in the form of a short-term liquidity buffer: liquidity coverage ratio (LCR). The minimum requirement in 2017 is 80%, and this will be raised to 100% by 2018, when the delegated act will be fully implemented. However, according to the delegated act, the LCR is based on the less stringent LCR proposed by the Basel Committee in 2013 and certain EU-specific changes, for example, that the liquidity reserve may include a higher proportion of covered bonds.

By making requirements for a short-term liquidity buffer in FFFS 2012:6 as early as 2013, Sweden has moved more quickly than required by the EU. The requirement amounts to 100%, but the definition of what comprises a short-term liquidity buffer differs from what applies at EU level. The LCR which the Swedish Financial Supervisory Authority has implemented is a stricter LCR measurement, mainly in terms of deposit outflow assumptions and the composition of the liquidity portfolio. The minimum requirement for the net stable funding ratio is expected to be introduced in the EU in 2018 at the earliest.

At the end of March, Handelsbanken's LCR according to the Swedish Financial Supervisory Authority's regulation FFFS 2012:6 was 148%, which shows that the Bank has high resistance to short-term disruptions in the funding market. This also applies in US dollars and euros. The LCR, as an average of daily observations according to the

same regulation, was 134% during the first quarter. The Bank's LCR, calculated according to the European Commission's delegated act, was 169%.

Stress test with liquidity-creating measures

The Bank's liquidity position is regularly subjected to stress tests. In these tests, the Bank's cash flows are stressed, based on certain defined assumptions. For example, in the stress test aimed at demonstrating resistance to more long-term market disruptions, it is assumed that the Bank is unable to obtain funding in the financial markets at the same time as it experiences a gradual disappearance of 10% of deposits from households and companies over the first month. It is further assumed that the Bank continues to conduct its core activities, i.e. loans to households and companies and that committed loan offers and other credit facilities are partly utilised by customers. Account is also taken of the fact that holdings with central banks are utilised and that the Group Treasury liquidity portfolio can provide immediate additional liquidity. In addition, liquidity-creating measures – for example, unutilised facilities to issue covered bonds – are used in order to gradually provide liquidity to the Bank. The result of the stress test shows that the liquidity reserves, even in a stressed scenario, cover the Bank's liquidity requirement for over three years, even if access to new funding in the markets were to disappear.

Non-encumbered assets, NEA

Comment on results for parent company, January – March 2017 compared with January – March 2016

The parent company's accounts cover parts of the operations that, in organisational terms, are included in branch operations within and outside Sweden, Capital Markets, and central departments and staff functions. Although most of Handelsbanken's business comes from the local branches and is co-ordinated by them, in legal terms a sizeable part of business volumes are outside the parent company in wholly-owned subsidiaries – particularly in the Stadshypotek AB mortgage institution. Thus, the performance of the parent company is not equivalent to the performance of business operations in the Group as a whole.

The parent company's operating profit decreased by 55% to SEK 1,990m (4,425), chiefly owing to reduced dividends, as well as lower net gains/losses on financial transactions. Profit for the period decreased by 64% to SEK 1,491m (4,119). Net interest income rose by 7% to SEK 3,845m (3,589), and net fee and commission income increased by 4% to SEK 1,620m (1,563). Since the start of the year, the parent company's equity has decreased to SEK 108,225m (116,642).

Auditors' report concerning review of interim report

To the Board of Svenska Handelsbanken AB (publ), corporate identity number 502007-7862

INTRODUCTION

We have reviewed the interim report for Svenska Handelsbanken AB (publ) as at 31 March 2017 and for the three-month period ending as at this date. The Board of Directors and the Chief Executive are responsible for the preparation and presentation of this interim report in accordance with IAS 34 and the Swedish Annual Accounts Act for Credit Institutions and Securities Companies. Our responsibility is to express a conclusion on this interim report based on our review.

FOCUS AND SCOPE OF THE REVIEW

We have conducted our review in accordance with the International Standard on Review Engagements ISRE 2410 *Review of interim financial information performed by the auditors elected by the company*. A review consists of making inquiries, primarily to persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review differs from and is substantially

less in scope than an audit conducted in accordance with the International Standards on Auditing. The procedures performed in a review do not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Therefore, the conclusion expressed based on a review does not give the same level of assurance as a conclusion expressed based on an audit.

CONCLUSION

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim report is not, in all material respects, in accordance with IAS 34 and the Annual Accounts Act for Credit Institutions and Securities Companies for the Group and in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies for the parent company.

Stockholm, 26 April 2017
