## **FOR IMMEDIATE RELEASE**

### **Free DCS Migration Flash Diagnostic from MAVERICK Technologies**

COLUMBIA, Ill. (May 1, 2012) — MAVERICK Technologies, the largest independent systems integrator in North America, is now offering a complimentary flash diagnostic for manufacturers struggling with the need to upgrade their distributed control system (DCS) technology. The flash diagnostic includes a phone consultation with a MAVERICK technical expert and a custom, confidential report — a combined estimated value of \$2,000.

“We’re offering our advice for free, simply because we want every manufacturer to understand what’s possible for their business through DCS migration,” said Matt Sigmon, director of DCS Next, MAVERICK’s results-focused, turn-key approach to DCS migration. “Most manufacturers feel like they can either keep patching their old DCS or pour money into a new one that might not deliver. But there is a third option — using DCS migration as an opportunity to advance and become truly agile.”

During the phone consultation, participants will speak to a technical expert about their operational challenges, any control system issues and their DCS technology options.

“This isn’t a sales call,” Sigmon said. “It’s the chance to talk one-on-one with a top specialist here at MAVERICK. We know choosing a new DCS platform is a big decision, and we want to help manufacturers weigh all their options.”

The confidential report provides a clear understanding of each manufacturer’s current situation, along with steps for moving forward with the DCS migration. Participants will feel no obligation to use MAVERICK’s services for the actual migration.

#### **About DCS Next**

MAVERICK has harnessed decades of knowledge to create a true breakthrough in DCS migration: DCS Next. More than a simple I/O or equipment replacement, DCS Next helps manufacturers leverage the complete benefits of the latest DCS technology in order to improve productivity, agility and profitability. MAVERICK’s platform independence and proven methodology ensure manufacturers get a solution that meets operations and business needs. DCS Next is a turn-key solution that entails planning, delivery and sustaining services, so no benefit of the new technology will go unnoticed or underleveraged. DCS Next not only brings manufacturers up to speed, but propels them ahead of the competition for years to come. To learn more about DCS Next, please visit [www.DCSNext.com](http://www.DCSNext.com)

#### **About MAVERICK Technologies**

MAVERICK Technologies is the largest independent systems integrator in North America, and is a global leader in industrial automation, enterprise integration and sustaining services for clients across a wide range of manufacturing and process industries. Leveraging its unique enterprise-wide perspective, MAVERICK identifies suboptimal operations and improves performance for greater safety, efficiency and overall profitability. The company’s people, processes and technical capabilities ensure delivery of the right solution for every project, using the most appropriate technology. Organizations around the world depend on MAVERICK’s responsiveness, results-driven approach and dedication to their success. Over the years, MAVERICK has completed more than 10,000 projects in 45 countries across six continents. To learn more about MAVERICK, please visit [www.mavtechglobal.com](http://www.mavtechglobal.com)
