Clarification of pressrelease 2018-01-22 regarding customer and ordervalue**Studsvik signs a strategic agreement for delivery of isotopes**

The agreement with Elekta Instrument means that Studsvik provides isotopes for application in products that will be sold globally. The isotopes are packaged in special containers at Studsvik's Hot Cell Laboratories in compliance with all current requirements. The agreement runs from now until 2026 and comprises deliveries to a value of approximately four hundred million SEK. Deliveries are scheduled from the end of 2018 and with full volume from 2022.

Studsvik has a long history of supplying isotopes from when the research reactor was in operation and now resumes operations in this area. Studsvik will use its recognized innovative and solution-oriented organization to enable automated and thus effective deliveries of packaged isotopes.

“This as an important milestone for Studsvik and a confirmation of our strategic decision to invest in and develop this new service supplying isotopes,” says Camilla Hoflund, President and CEO of Studsvik.
