

Zensar Technologies Announces Advanced Persistent Threat Mitigation Solution

Managed Service Provides Continuous Advanced Threat Monitoring and Remediation

Westborough, MA – December 15, 2014: [Zensar Technologies IM Inc.](#), the infrastructure management services unit of Zensar Technologies Ltd, a leading software and infrastructure management services provider, today announced the expansion of their existing Managed Security Solutions by offering an Advanced Persistent Threat Mitigation (APT) Solution which provides a 24x7 advanced monitoring and management capability. This new capability is aided by and delivered through a team of certified security experts to combat today's increasingly advancing threats and attacker tactics. This advanced APT defense solution provides enhanced security monitoring, visibility and compliance to stop advanced attacks with award-winning technology and expert analysis.

According to Gartner research, "In 2013, enterprises were predicted to spend more than \$13 billion on firewalls, intrusion prevention systems, endpoint protection platforms and secure Web gateways. Yet, advanced targeted attacks and advanced malware continue to plague enterprises."*

Zensar's team of certified security specialists has expertise in securing all types of environments. With the launch of the Advanced Persistent Threat Mitigation Solution, Zensar provides 24x7 fully-managed or monitoring services to meet clients' needs, enabling them to proactively identify and quickly remediate advanced threats including botnets and Zero Day attacks. The Zensar service offering provides actionable real-time push notifications of advanced threats and bot activity, and can also be instantly delivered via mobile devices. Incident response analysis and recommended remediation is provided just minutes after an event occurs to reduce the dwell time of advanced forms of targeted malware.

"With the continuing emergence of new and more sophisticated threats, enterprises today are challenged more than ever with ensuring their environment is secure and resistant to cyber attacks," said Patrick Zanella, Associate Vice President and Global Security, Compliance and Product Practice Head, Zensar Technologies. "The firewall is critical to an organization's security posture and it must be prepared to proactively handle these threats. Through our strong partnerships with the industry's leading security providers that span over 20 years, and our team's depth of knowledge and extensive experience, we are uniquely positioned to ensure the security and compliance of our customers' environments."

Zensar partners with clients to holistically align IT programs, technologies and services with IT goals and enterprise strategy to deliver flexible solutions that drive improved business processes as well as increase the availability, reliability and performance of Data Center, Security, Compliance, and End User Computing infrastructures. Utilizing its multi-shore methodology Zensar delivers best-in-class IT services through round the clock global delivery centers including Westborough, MA; Slough, UK; Veenendaal, The Netherlands; Shanghai, China; Pune, India and Hyderabad, India.
