New Polygon Franchisees powered by digital solutions

Polygon, the global expert in property damage control, continues its strategic initiative to support customers all over Canada. Polygon has recently added two new Franchisees to its organization in Quebec, in the Montreal West Island and the Lanaudiere region.

The new Polygon members are both competent business owners with experience within water and fire damage restoration as well as temporary climate solutions.

“Since our values are so important to us, we are happy that the franchisees share them; integrity, excellence and empathy, as well as our vision to be the global expert in property damage prevention, control and mitigation,” says Fabio Bernardo Country President for Polygon Canada.

Creating a larger service distribution network to the benefit of our customers is one of Polygon’s main aims. With expansive knowledge and leading edge technology, Polygon is making this happen.

“With the introduction of our new project management platform, we are able to support our customers in a more efficient way. This is one of the most important aspects of our industry. Our field service management system uses technology to allow us to further improve our services” says Fabio Bernardo.

The rate of technological development is increasing rapidly. As a company it is of the utmost importance to utilize technical possibilities to continually improve and innovate.

“With the combination of our field service management system and the widening of our service distribution we make it possible to be always by our customer’s side when disaster strikes,” says Fabio Bernardo Country President for Polygon Canada.
