

Trelleborg Aims to Understand Latest Offshore Market Trends in Annual Next Level Survey

Trelleborg has launched its second annual Next Level Survey, in collaboration with Oil & Gas Engineering magazine, to investigate topics such as supplier relationships, technology investments, workforce deployment and risk assumptions. The survey aims to reveal how these key topics have changed over the past two years due to fluctuating oil prices.

Jo Shailes, Vice President Marketing at Trelleborg's offshore operation states: "By partnering with Oil and Gas Engineering magazine, we hope to explore how a global audience of engineers in the oil and gas market are managing key areas such as technology investments and supplier relationships in a varying market.

"Following on from the success of our 2015 Next Level Report, our goal is to identify ways in which the industry can respond to the challenges of working against a backdrop of slowed market growth. We aim to comprehend what is affecting corporations most and how they are managing their businesses."

"*Oil & Gas Engineering* is pleased to be partnering with Trelleborg on this important study," said Bob Vavra, Content Manager for *Oil & Gas Engineering*. "The results will provide a benchmark as to where the industry stands after two challenging years, and what the areas of growth and opportunity may be in the near future. We look forward to sharing those results with our global audience."

If you would like to participate in the survey, please visit

<http://www.surveygizmo.com/s3/3000690/Next-Level-Performance>. All participants will be added into a drawing for a \$100 gift card.
