Rejlers helps JM to build Norway's most energy-efficient homes

JM is extending its framework agreement with Rejlers Norway concerning electrical project management and energy consultancy relating to buildings. JM is one of Norway's largest operators in the development and sale of residential properties with demanding requirements concerning sustainable projects and energy-efficient homes. Rejlers is proud to help JM realise these ambitions.

Sustainable homes

JM has a very clear approach to sustainability in its strategy concerning the development of homes and long-term value creation. As a result, all homes developed by JM exceed authority requirements by 25 percent as regards energy consumption for heating purposes. With effect from 2018, JM is also the first Nordic construction company to Swan-mark its entire housing production.

Framework agreement for electrical project management and energy consultancy

The framework agreement which JM has now extended with Rejlers covers services relating to the electrical project management of buildings and has a central place in the value chain which realises JM's visions of energy-efficiency and sustainability.

"We have been working with JM for many years and it has been an exciting journey. JM is a demanding and innovative actor and we are very proud to have their renewed trust," says Petter Arnesen, who heads Rejlers Norway's Building division.

Smart, digital and green buildings

"We combine engineering expertise with IT expertise from Rejlers Embriq. Our ambition is to deliver the market's best and most advanced services for designing the smart, digital and environmentally friendly buildings of the future, and this agreement represents an important building block for us," says Thomas Pettersen, CEO of Rejlers Norway.

Rejlers is one of the largest engineering consultancy firms in the Nordic region. Our 2.000 experts work with projects in the areas of Energy, Buildings, Industry, Infrastructure and Telecom. At Rejlers, you will meet specialist engineers with the knowledge, cutting edge expertise and energy to achieve results. We can be found in 75 locations in Sweden, Finland and Norway. Rejlers recorded revenue of SEK 2.5 billion in 2017 and its class B share is listed on Nasdaq Stockholm.

About JM

JM Norge is one of Norway's largest and best-known real estate suppliers. JM Norge is part of the listed Swedish real estate company JM AB, which is one of the Nordic region's leading players in the field. JM was established in the Nordic region in 1945. In 1998, JM established an operation in Norway by incorporating the Norwegian company Byggholt AS into its business. JM's total turnover in the Nordic region is approximately SEK 17 billion, and the company has developed and built almost 100 000 properties since it was founded.

About Rejlers Norway

Rejlers Norway supplies services to customers throughout the Nordic region and is represented in all the major cities in Norway, as well as Motala and Gothenburg in Sweden. Rejlers Norway has about 400 employees, with an expected annual turnover of approximately NOK 550 million. We possess unique knowledge within digitalisation combined with business consultancy expertise in the industries we operate in. We generate business benefits for our customers through the digitalisation of physical infrastructure, smart choices and strategic use of IT within focus areas such as Energy, Retail, Infrastructure, Building and Telecom. We are part of the Rejlers Group, which has 75 years of experience as a supplier of technical consultancy expertise to the Nordic business and public community. Rejlers is listed on Nasdaq Stockholm.
