

Press release, 01-11-2018

## **Rejlers Finland acquires engineering company Pivotech**

**Rejlers Finland Oy has acquired Pivotech Oy, an engineering company specialised in computational fluid dynamics and structural analysis. Established in 2010, Pivotech has a strong customer base and know-how in mining and paper industries, composite structures as well as crane and vehicle technology. The company employs 5 people with a turnover of 455 000 euros in 2017. The acquisition strengthens Rejlers' versatility in technical calculations for different industrial applications.**

- Developing our employees' competence through different projects and wider customer base is one of our highest priorities. Joining Rejlers is a great way to continue to develop even further, says Tero Pesonen, CEO at Pivotech.
- As a part of Rejlers, we can provide our customers a wider range of services and continue as their trusted partner, says Vilho Pesonen, Chairman of the Board at Pivotech.
- Pivotech is an essential addition to Rejlers' capacity and competence in technical calculation. The acquisition also strengthens our foothold in Central Finland, where we already have a solid representation in industrial EIC, says Tero Vuonos, Business Area Director, Industrial Engineering, Rejlers Finland.
