

Rejlers construction manager at Citytunneln

(REJL B)

Rejlers has received the order to work as a construction manager for Citytunneln in Malmö. The project includes three construction managers for all Electrical installations, SCADA, ITV, fire alarm and also heating, ventilation and sanitary. The project will be finished in 2011.

Citytunneln consists of 17 kilometres railway that joins Malmö Central with the Öresund bridge and links the railway net of Skåne and increases the future capacity of railbound traffic. Six kilometres is a tunnel below central Malmö and the remaining eleven kilometres is a railway above ground.

Malmö Central will be extended with an underground part. New stations are being built at Triangeln and Hyllie.
